

## Event Supervisor Review

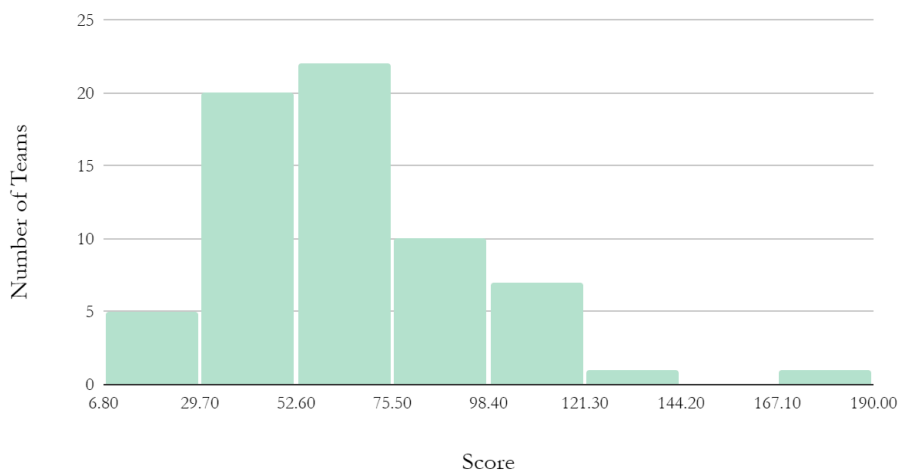

Hello! We were the event supervisors for **Bio-Process Lab** at Rickards. We just want to say a quick thank you to everyone who made this possible. <3

### Statistics

Bio-Process Lab Score Distribution

Bio-Process Lab Histogram

Total points: 324.25

Mean: 64

Median: 59.4

## Thoughts

- The test overall was 139 questions, a bit on the lengthy side. Since the test was taken online and out-of-browser time wasn't counted, we decided to make the test longer to prevent cheating from making a big impact on scores.
- The test average was 19.7 %, making it a difficult test. This was only the second invitational into the season, so we might have overestimated how much people were prepared. Many of the application-based questions were tricky for people.
- We decided not to implement a virtual lab because of potential technical and cheating issues. Instead, there were stations, each based around one or two main topics. Following the stations were a couple of general questions. This worked well in determining which areas teams did well in versus the weaker ones.

## Test Folder
