As I like to repeat it, HYP is going exponential and scalability is the main issue. I will focus on this whilst presstab will continue focusing on coding.

So here is as complete a list as I can, please add on it.

Projects

Project	Initiative	Manager
	HyperShield	
Multipool	HyperShield	
Buy wall	HyperShield	
HyperStats	HyperShield	Zer0sum, presstab
Multisend	HyperSend	davidlatapie, presstab
Tip bots	Three-pronged strategy, social	Crazyloaf
Hyp-casino	Three-pronged strategy, gaming	El_Kabong
Hyp-**	Three-pronged strategy, gaming	dfletcher
Exchanges	Three-pronged strategy, exchanges	CrazyLoaf, Cycoinminer
HyperPool	Independant	Kushed, locohammerhead
"HyperPool-XL"	Independant	
Marketplaces & merchandising	Independant	
HyperLoan	Independant	
HYPberry	Independant	waxo
HYPstick	Independant	
HYPcon Paris	Independant	
HYPcon Vegas	Independant	
HyperHub	Independant	
Messages	Independant	

Wallet	Independant	

Main project

HyperStake (managers: davidlatapie and presstab)

Self-managed projects

1. **HyperPool** (manager: kushed with locohammerhead) - https://bitcointalk.org/index.php?topic=834599
   other proposals:
   – stake for charity to the pool address
   – address donation
   – massive use of "stake for charity" (which really won't deservce its name anymore) to simply add the % and the address of each participant, so once staked, everyone would automaticly get their fair share % AUTOMATION (only with a trigger about the originating address)
   – Comparison charts of Pow pool/cloud mining vs Pos Pool profitability over time (in relation with the HyperStats planned project).
2. **Three-pronged strategy** (manager: crazyloaf and/with waxo) - https://bitcointalk.org/index.php?topic=840187
   focus on Asia (cycoinminer is on it). eatthetree3 is working on a tip for reddit.
   – **Hyp-casino** (manager: El_kabong) - http://hyperstake.wikia.com/wiki/Hyp-casino
   – **Hyp-**** on IRC (manager: dfletcher)
3. **HyperLoan** (manager: davidlatapie) - https://bitcointalk.org/index.php?topic=835772
   http://www.coin-scammers.net (drew) on top of wall of shame + blacklisted on bots (with presstab or zeewolf)
4. **Multisend** (manager: presstab with davidlatapie, HyperPool may use it)
   features: daisy chaining; triggers
5. CrazyLoaf Ideas:
   – Foreign exchanges (BTER, BTC-E, BTC38)
   – Multipool (both custom and/or professionally managed ones like WafflePool, Multipool, Chunkypools, Coinking)
   – Foreign localization (anns, threads, be on different forums - like 8btc since BTC Talk banned in China - foreign subreddits/use on other social media sites, localized memes, PR and content managers, charity organizations, "HYP Everywhere")
   – HyperStake devoted investment journal
   – Tipbots (HYPbots) for Reddit, Imgur, 4Chan, Facebook, Twitter, Steam, etc. and foreign versions/competitors of the same
   – More gaming/gambling sites; add onto preexisting sites, build our own - things like BikiniDice/PrimeDice etc
   – Promote as a gaming/gambing currency; can buy and gamble stake and do what HYPER should have done and target being a curreny for web-based games, things like Runescape microtransactions (HyperRune), etc.
   – Multiple wallet themes:
     ■ HyperDoge; PoS = Proof of Such
     ■ HyperShibe; PoS = Proof of Sharing
     ■ HyperSloth; PoS = Proof of Sloth (check out subreddit with 30k+ people; we need to target other subreddits with a lot of already existing users and build themes/promitions/community for them)
     ■ HyperBaked; PoS = Proof of Stoner; let's play the pot markets :P
     ■ HyperKomodo; Indonesian theme (consider localizing for other countries national

animals/whatever is popular there)
- ■ HyperHotties, HyperMate, HyperHooters; PoS = Proof of Sex; Proof of Sin, etc.
- ■ HyperMona; compete with MonaCoin
- ■ HyperPanda; better Pandacoin XD
- ■ Etc.
- – HyperParty; use Counterparty and/or OpenTransactions as a later for HYP; proof of burn for HYP to build assets that trade on HYP network?
- – HyperReserves: market as asset for exchanges and/or places that pay interest on BTC to invest in

Planned projects

1. **HYPberry** (manager: waxo) - other idea: USB key "ASIC" both HYPberry and "HYPkey/HYPstick" would be preloaded with enough HYP to stake
2. **Multipool** (manager: ???)
3. **HyperStats** (manager: Zer0Sum, with assistance from presstab)
4. **"HyperPool-XL"** (manager: eatthetree3) original idea
5. **Marketplace** both for merchandising with profits to HyperStake and for actual exchange of goods (manager: ???) squiggie for a marketplace in hyperstake.com with both products (TheKingOfPoon 's PexPepper) and services (ShrykeZ's PoW monitoring system)
6. **Buy wall** (davidatapie and waxo are interested in setting it up - who owns the wallet? preferrably someone trusted and with so much personal money that the incentive for stealing are low)
7. **HYPcon Paris** (waxo's flat with davidatapie, hegemoon, onishin, ffmad, Tulsene, superresistant...)
8. **HYPcon Vegas** (or Salt Lake City - Biomech could give a hand, presstab as well)
9. **Multipool** (should become a self-managed project)
10. **HyperHub** (XCash's Xhub, HYP version)
11. **Messages** (manager: presstab)
    - – "Fidelity program": "Dear HYP holder. This is now 14 days you've been staking on a daily basis. Ain't it good to receive daily coins? We propose you to give 1% (or more) of these daily gains to one or more cause(s) of your choice. This will be completely transparent for you, the wallet will handle everything. You can always turn it off later, but remember that a small deed can go a long way."
    - – On the landing page of the wallet "Attention: None of your address contains more than X HYP. You will probaby not stake in less than Y days. We suggest you to join HyperPool for pool mining until you have enough HYP to solomine."
    - – Console when dumping privkey: "Attention! Anyone with this line will be able to empty the address (not the whole wallet)! Only share if you know what you are doing!"
    - – **HyperJobs** (meta-project, manager CrazyLoaf) - https://docs.google.com/document/d/1mc5i4KMbJdOnxn_ee95E6iS1dLcxBBlHmc6cmmg7 mXQ/edit

Ongoing projects

1. **Wallet** (manager: none)
   Place all the themes (HyperBlue, Poloniex Day, Poloniex Night, Celestial, Magma) in one single directory and a carrousel on hyperstake.com

Communication

Social networks

- Twitter Main: waxo
- Twitter Indonesia: atep13
- Google+:
- LinkedIn:
- Imgur:
- Reddit: eatthetree3, working on a tipbot
- Facebook:

Regional

- French crowd: davidlatapie, waxo, hegemoon, ambush5, hypermnesic
- British crowd: Shrykez
- Indonesian crowd: awangn6600, atep, byroe, anticims, ciamisonline
- US crowd: presstab, Kushed, mafort1469
- Cypriot crowd: Qibucks

IRC Channels

- ##hyperstake
- ##hyperstake-dev
- ##hyperstake-otc
- (##hyp-games)
- ##hyp-lotto
- ##hyp-trivia
- ##hyp-roulette
- ##hyp-rain
- ##hyp-casino
- ##hyp-pool

Features/Initiatives

HyperShield - http://hyperstake.wikia.com/wiki/HyperShield

- Bot for market making (presstab, but zeros0m does it also manually)
- Multipool (should become a self-managed project)

HyperSend - http://hyperstake.wikia.com/wiki/HyperShield

- Multisend and Trigger
- Communication with charities, proselitysing, automating HyperPool
