Backstory of the **Organizația Basarab**

Foundation Period

In 1850 at Galați a Țuica Distillery has been opened by a man named Ion Basarab which will lead up to the foundation of the Basarab Organisation. It was a family business with workers that stayed local at best under Ion's management. In 1854 a son was born to Ion Basarab named Traian Basarab which will be the reason of Organisation being formed. During the 1870s Traian started to smuggle alcohol with friends of his to other countries mainly Serbia, Hungary and profit from it, They also liked to hang around at gambling halls teaming up and scamming people. During the Independence war of Romania in 1877 they sold horses to the army for profit as well as supplying them with alcohol.

Traian Period

Start of the 1880's at newly founded Romania, the Basarab Family and other well-off rich families got hungry for power and knew it was the time to gain power or be stuck in power struggle forever with other families. List of the Families went as:

Basarab Family

Gheauș Family

Codreanu Family

Brătășanu Family

Alexei Family

Gălățan Family

The Gheauș Family which had ties to the government got the Basarab Distillery shut down due to bad history with eachother; It all started with Ion Basarab marrying off with a Gheauș without the family's knowledge.

Due to the Distillery being shut down Basarabs started on bootlegging operations to keep afloat and smuggling became more often.

During the Christmas of 1885 Basarab, Codreanu and Alexei family decided on a new alliance and was hosted at the Alexei home for celebration. Seeing this the rest of the Families united and sent out thugs for gunning down the celebration which dealt a huge blow on Alexei family financially and casualties within the family. This was the start of the power war between 2 factions that will continue on for at least 10 years.

In 1892 son of Dimitriu Basarab born in 1873, made his debut into the family business and started to take part in the war. Until 1892 Basarab family kept very defensive while Alexei family got wiped out with only possible heir still unborn. However 2 families have made a plan on striking the rivals with full force after gathering necessary equipment. Many attempts of convincing that got rejected Dimitriu got the job. With a crew of 15, within 3 years he gave hell

and lots of casualties to **Brătășanu** and **Gălățan** families which drove them out of România. And lastly at 1895 the crew assassinated the Patriarch, Dan Gheauș which ended the war on Basarabs conditions which empowered them. Dimitriu Basarab and daughter of Dan Gheauș got married off to cement a lasting alliance between the families.

Dimitriu Period

Ion Basarab, who died in 1894 due to an illness and Traian Basarab being too tired of the business due to the war, left the majority of the business for Dimitriu to manage at age of 22. Dimitriu started to prosper the families and expand through Serbia, Bulgaria and Greece with Alcohol and Gambling. His period didnt see wars and it was just prospering, he was a very intimidating man and no one dared to wrong him.

He had a son named Nicolae Basarab in 1913 which raised him so strictly to prepare him for being the next Boss. Nicolae and his older brother Andrei constantly got in trouble ever since teenage years which resulted in their father disciplining them.

In 1938 Nicolae Basarab was sent along with Codreanu Patriarch Mihai to Berlin in the growing economy of Berlin. Organisation knew opening a factory in Central Europe would be the best investment for them to spread across Europe. Rumunski Mondschein was formed in the Königsplatz of Berlin. Later on Andrei joined on bringing their cousins to expand their workforce.

Nicolae Period

When business was booming at the end of 1939, Nicolae Basarab got hooked on to gambling and lavish spendings on clubs. Because of this lifestyle he had he started to play big and started to

Office of the Chief of Business

make big earnings that would allow his hunger for power more. He started to send out his cousins on extortion/racketeering jobs and tax-evaded sales on some of the booze that was produced. These actions soon after caught the attention of a Local Italian family named Celero's which they exchanged a few fights on streets before a sitdown being initiated. During the Sitdown they split the city into the half however right after the sitdown ended lower ranks of both families started a gunfight which ended with 4 deaths before Celero's and Basarabs taking off due to police.

Basarab-Celero War

During the war Basarab started off defensive like in the 1885-1895 war, being outnumbered with limited to handguns while their rivals had access to advanced weaponry such as submachine

Organizația Basarab

Office of the Chief of Business

guns and rifles; Basarab's still managed to avoid being wiped out and keeping it on stalemate. Nicolae Basarab ordered his Șef de Armee, who would be his Brother, to mass-weapon smuggling and stealing. They would regularly sneak into Government Buildings and steal weapons. After they formed an arsenal consisting of auto firing pistols and rifles they turned stalemate into their favour.

Downfall of Celero's started when in 1941 during a dinner Celero's was having, 3 Cars containing Basarab gunmen got out and started to spray the restaurant. After that attack Basarab started to kidnap Celero's and kill them in ways to shock the public.

First victim being 2 Celero Soldiers being gunned down:

(Shooting of Hubert and Heinrich Celero)

Followed up with execution of Manfred Celero:

Office of the Chief of Business

And at 1943 the Capo of Celero Family got hanged on the most populated street right across Central Government building and next to the Police station

(Hanging of Ralph Celero)

These murders caused the rest of the Celero's to skip the town and leave the city in the hands of the Romanian gang. Which resulted in the **Afterwar Era**

During the afterwar era another family called von Heisenberg's challenged all the organisations in Berlin. One day when Andrei and Nicolae Basarab were driving, 15 individuals belonging to von Heisenberg stopped the car and recognized the 2. When they started laughing and getting prepared 2 members of the Polish immigrants thought they were government members and started to shoot at them which resulted in the duo to get out of the car and spray down the disorganised von Heisenberg's which ended the war in one shootout.

After 2 wars that happened, the Romanian mob had to cough up 20,000,000 RM of Bribe to the Police Chief of Berlin to stay in business without getting arrested.

Now without a threat they started on Cocaine production, Human Trafficking, Illegal Weapons sales, Racketeering, Contract Killing, Illegal Gambling and Money Laundering.

These crimes went on for a year before having to leave Berlin due to Germany being on the losing side of the war. They fled to Switzerland as a whole, abandoning all operations in the Balkans. After World War II, Communists got elected in Romania thus making their refuge forever. They tried reopening their Distillery however it stayed local at best.
