

LAB Tools Overview

watch or download [video](#)

LAB is a multi-chain trading ecosystem. Trade, deploy and analyze tokens with unmatched speed, precision, and control across any platform – all with the lowest fees on the market

We offer four products: **a telegram bot/app** , **sidebar and a browser extension**. Our solutions are designed to work seamlessly on top of any trading terminal.

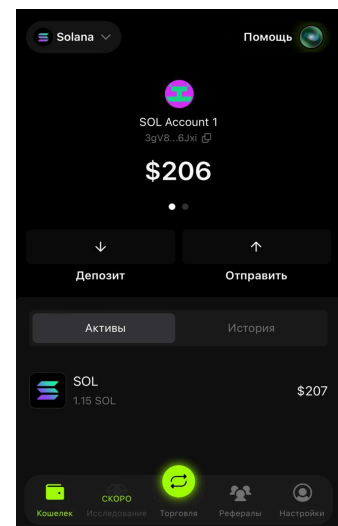

Like an L2 trading infrastructure - we make trading faster, more efficient, and more cost-effective, all while operating above your existing terminals.

1) Telegram Bot - https://t.me/LAB_Trading_bot

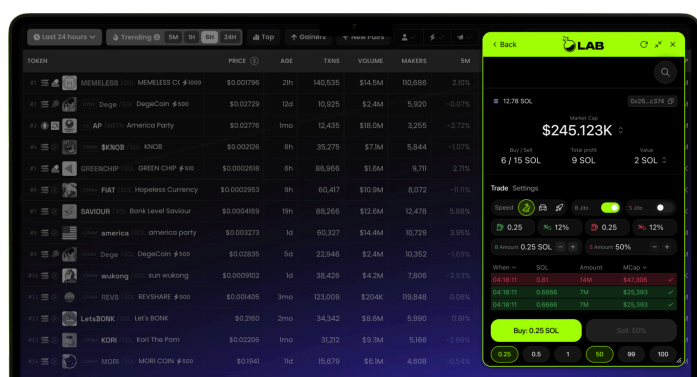

To begin using LAB Telegram bot , first open the official [Telegram bot](#).

You'll find a button labeled “Open App” or “Open” at the bottom of the chat

1. Click the button to launch the LAB Terminal mini-app.
2. Enter the technical code required to access the application: 7X9K2P5R3M8L4Q6
3. Set a 4-digit PIN code and confirm it in the next step.
4. That's it! Your wallet is created! Click “Continue” to proceed to the main dashboard.

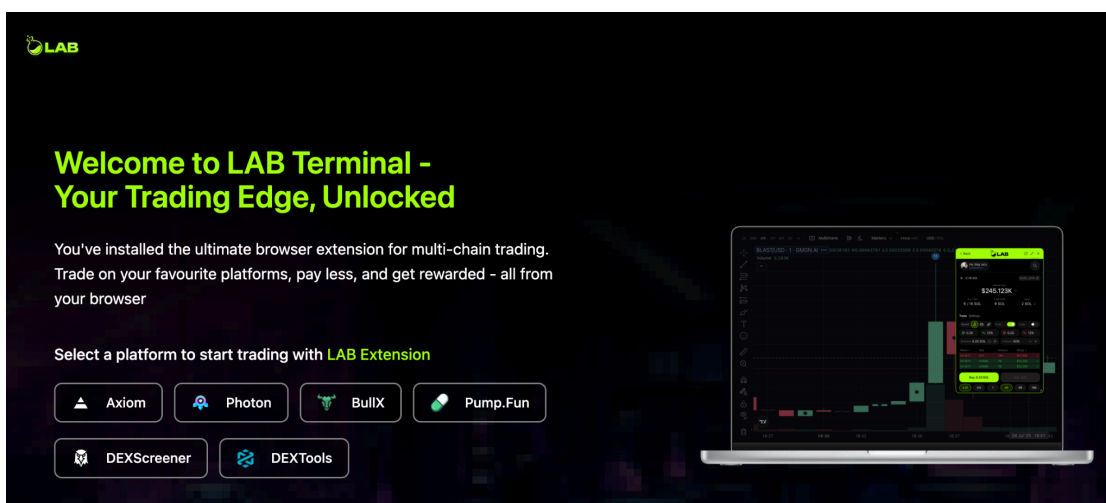

2) Browser Extension (sidebar/widget) - [link](#)

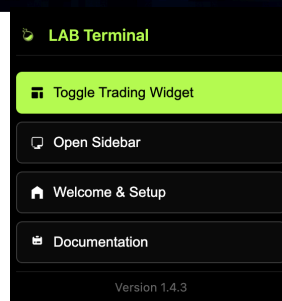

The best way to use LAB on desktop via chrome supported browsers

How To Install Extension

1. Use Google Chrome, open link – <https://chromewebstore.google.com/detail/kfhmememmfibdeceaokeakdejindmddo>
2. Click “Add to Chrome”, the extension will be installed
3. Next, visit gmgn.ai (or any supported platform) - the extension will automatically request registration/login
4. Enter the technical code required to access the application: 7X9K2P5R3M8L4Q6
5. Select either "Login with Telegram" or "Login with Google"
6. You can then set up and begin using the application

Trading Widget or Sidebar -
