

Levels of compliance: Open by design/open by default

Authors: [FORCE11 Scholarly Commons Working Group 3](#)

Level	Definition
	Fully principles compliant: Open in the sense of the Open definition: Free to use and reuse
	As compliant as possible given regulatory or safety concerns: Only minimal required barriers for access, e.g, access to human subject data for qualified persons.
	Somewhat principles compliant: Digital footprint, but significant barriers for access and reuse, e.g., landing page with descriptive metadata but no access to data or access that requires significant effort or expense; landing page with a link to an email for access.
	Not principles compliant: No digital footprint; e.g., dark data
	There might be dragons! You have reached the edge of the commons and we have no specific guidance available at this time
