

ESTIEM Magazine

The ESTIEM Magazine aims to provide an insight into the world of IEM from an academic and professional point of view and engage ESTIEMers in the network by showcasing the outcomes of ESTIEM's activities.

ESTIEM Magazine is the oldest ESTIEM project, created in 1991. 35 years and 68 issues later, it is still sharing the most relevant and popular news from the field of IEM, innovations in the tech world, and most importantly, being a window to all ESTIEM activities.

Every six months, the ESTIEM Magazine team is working hard on gathering and connecting anyone who is interested to contribute by sharing their knowledge and experience with our audience, and that way making each new issue better and more attractive. If you want to join in creating magic together with the vast ESTIEM Magazine team, here is your chance!

Proofreading Responsible

Tasks of the **proofreading responsible** will include the following:

- Revising the articles written by authors
- Recommending alterations for articles
- Checking the compatibility of the **article, layout and visuals triangle**

Preferred competencies:

- At least one year of experience in central ESTIEM/ **deep ESTIEM knowledge**
- Willingness to read lots of articles over and over again.
- High concentration and punctuality.
- Reading authors' guidelines ([ESTIEM Magazine Authors' Guidelines](#))

What will you learn in this position?

- The ability to read articles and essays quickly.
- The ability to analyze the article, the writer. Feeling the spirit of the text and matching it related visuals.
- Consciousness on citations and ability to use them properly.
- Team work and a new network for your both career and personal life.

Duration of the mandate

69th issue and 70th issue and you will be added to Proofreaders' network if you are agreed.
