**Scranton School District  
Curriculum Guide**

**Geometry**

**Prerequisite :** Successful completion of Keystone Algebra I

**Intended Audience:** This course is designed for the student who has successfully completed Keystone Algebra I by the end of the 9<sup>th</sup> or 10<sup>th</sup> grade.

Geometry is the course 10<sup>th</sup> grade students take after Algebra I. This course is designed to emphasize the study of the properties and applications of common two and three dimensional geometric figures. The course will formalize what students have learned about geometry in the middle grades, with a concentration on mathematical reasoning, including exposure to formal proofs. Topics covered focus on the Pennsylvania Common Core Standards and include, but are not limited to: coordinate geometry, perimeter, area, surface area and volume, congruent and similar triangles, right triangles, quadrilaterals, and circles. After successfully completing Geometry, students will be allowed to enroll in Algebra 2 or Algebra 2/Trigonometry.
