

Warning: This file conditions you to feel sexual pleasure and arousal every time the metronome dings. Now while this is intended to only have effect within this file and only to metronomes, there is a distinct possibility that for some time after listening ANY ding will arouse you or cause you to feel a distracting amount of pleasure.

This could become a problem... but it's not my problem, and if it does cause these unintended side effects in you I will be terribly sorry but also unhelpful and amused.
