

Name:

Period:

<b><i>Small Depth of Field</i></b>	Above Expectations 5 pts	Meets Expectations 4pts	Average 3pts	Below Average 2-1pts	No Image Turned In 0pts
<b><i>Exposure</i></b>	The photo displays complete accuracy with exposure - objects and figures are perfectly lit and the image is not grainy.	The photo mostly displays accuracy with exposure; however, a few parts of the image are over/under exposed or have a slight graininess.	The photo has some over/under exposure and is visibly grainy.	The photo is under/over exposed and has a large amount of graininess.	No image was turned in
<b><i>Composition</i></b>	A clear center of interest is present and the photo displays complete shallow/small depth of field with only a small portion being in focus.	Though a center is present, the amount of the image that is in focus is medium, rather than small.	The center of interest is hard to find, and a larger amount of the image is in focal than should be for "small" depth of field	There is no center of interest present, and all of the image is in focus.
