

General knowledge

Regions of Ukraine + their phone codes.

Map for phone codes practice - <https://www.geoguessr.com/maps/6368ef57ab3f36e7798ac2ef>.

Alphabet uniq letters:

Є,ґ,ґ,і,ї,ї,

Some examples:

English word: Russian / Ukrainian

Street: улица (abbreviated ул.) / вулиця (abbreviated вул.); Town: город (abbreviated г.) / Місто

(abbreviated м.) Sale: продажа / продаж; Products : продукты / продукти; Rent: аренда / оренда; Furniture:

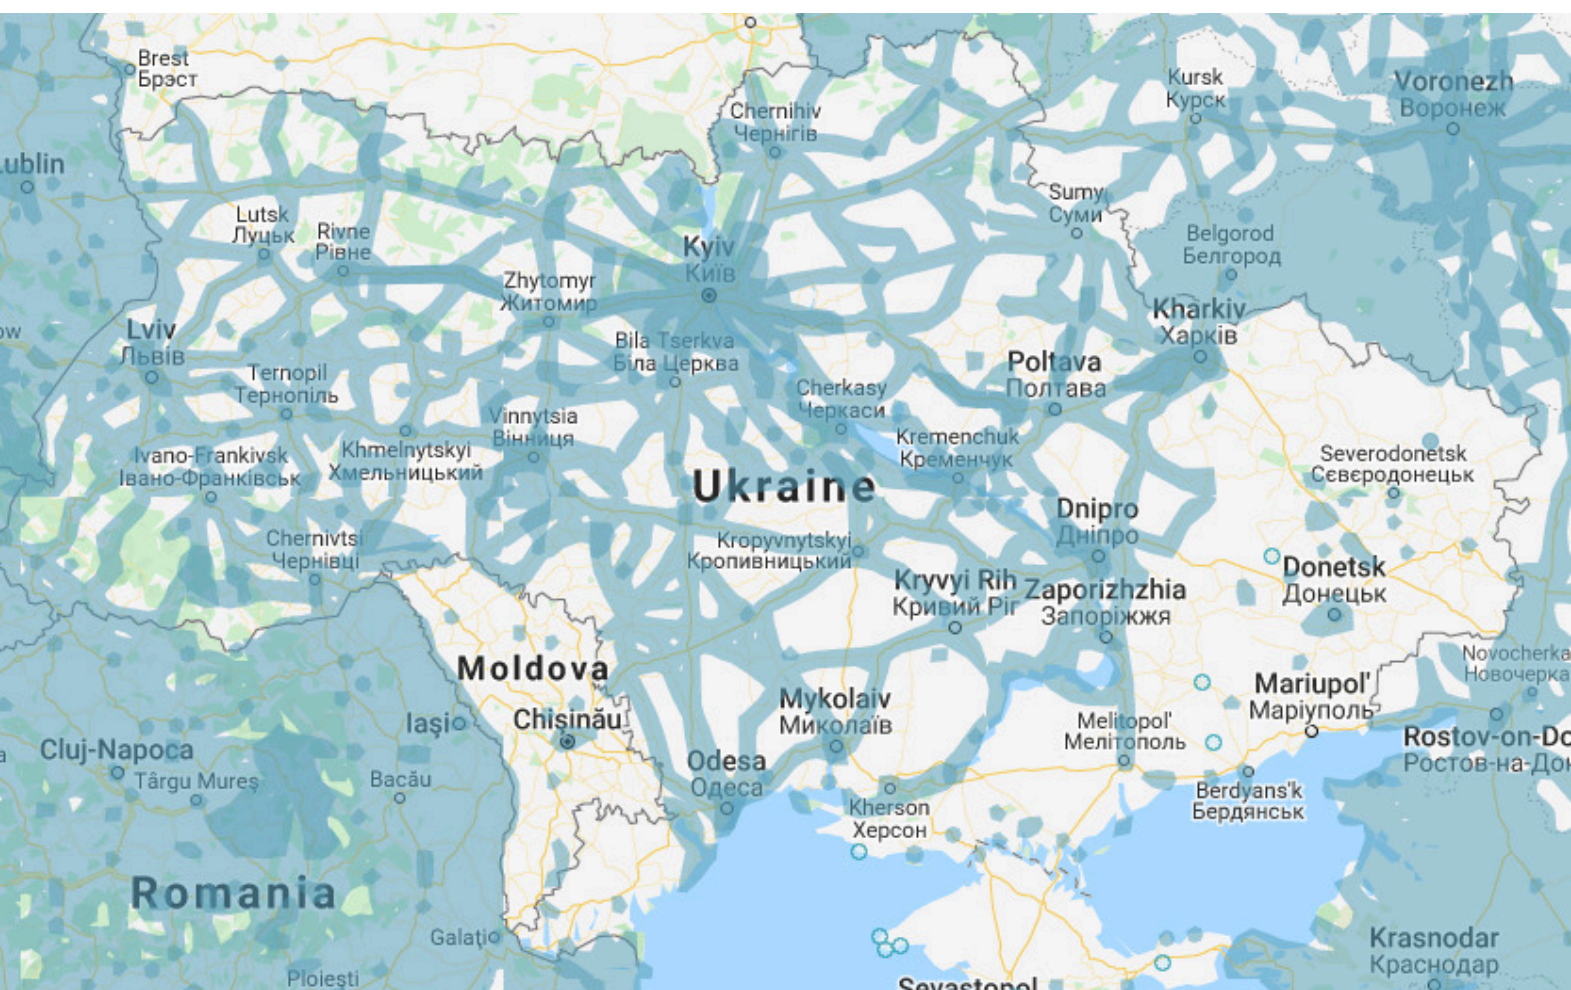

мебель / меблі; Currency: руб. (₽) / грн. (₴); Entrance: вход / вхід; Notary: нотариус / нотаріус; Car wash:

автомойка / автомийка; Car parts: автозапчасти / автозапчастини; Car service: автосервис / автосервіс;

World: мир / світ; Footwear: обувь / взуття; Trade: торговый / торговий; Technique: техника / техніка

Coverage

Outside of city coverage only yellow roads/highways

Russia/Ukraine difference

Bollards

Uniq Ukraine bollards.

Uniq Russian bollards.

Both.

Camera generation

Ukraine has only gen 3 camera generation while Russia has gen 2,3,4.

Ukraine has gen 3 with no antenna on the car while Russia always has short or long antenna..

Plates

In game

Russia

Ukraine

Signs

Russian signs have “black socks” on bottom while Ukraine never has.

usually sign of enter small village in Russia has blue background while Ukraine is white

Nature

Terrain

As u see on the map Ukraine only has mountains in the south west part (Zakarpattia Oblast) and some hills in red rectangle.

Almost all other parts of Ukraine look flat.

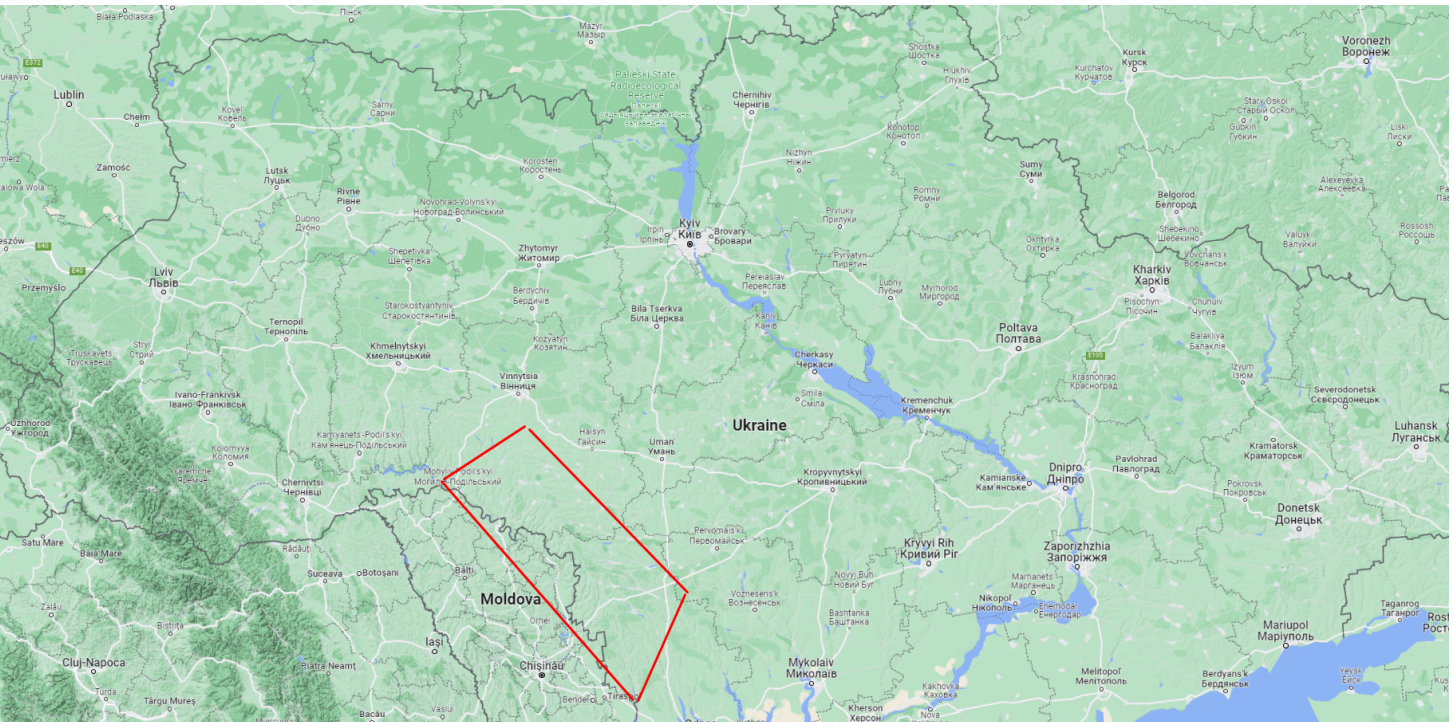

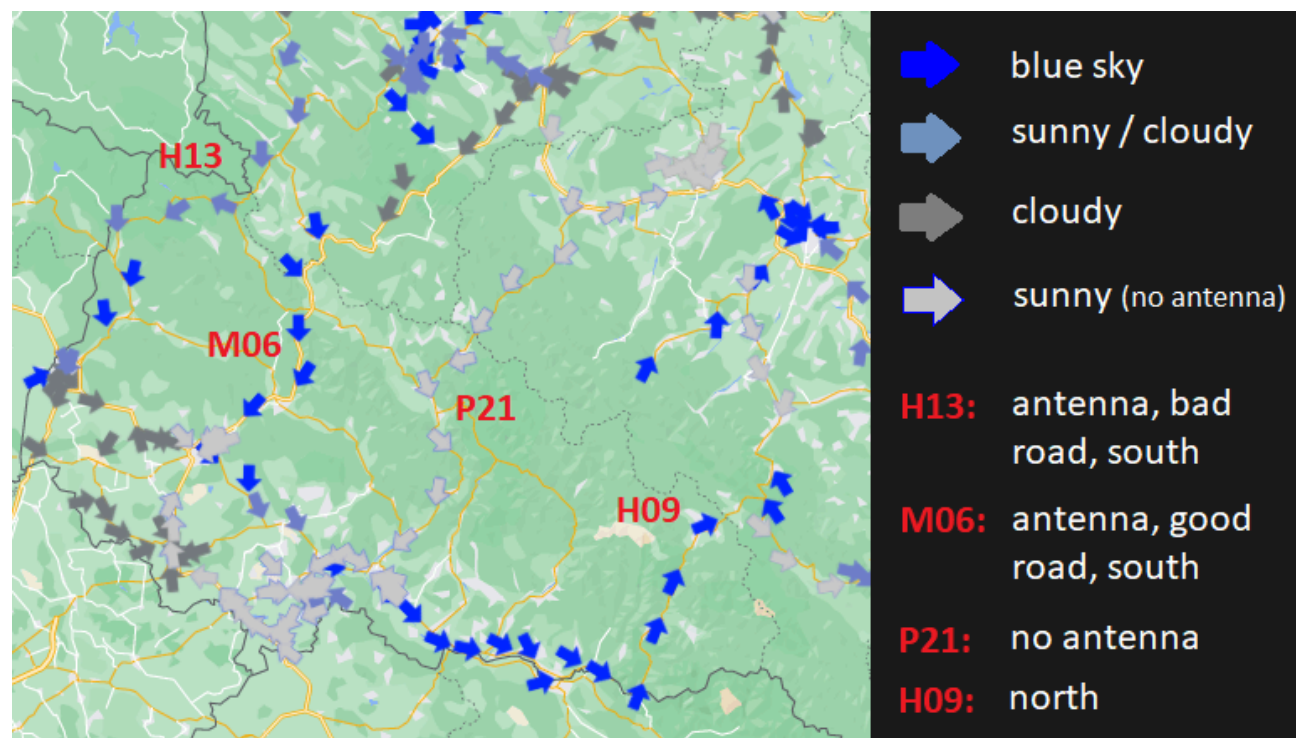

Illustration to understand Zakarpattia oblast better.

Trees + flowers

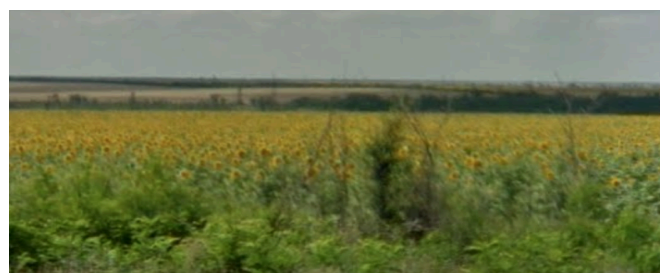

The most common trees u can find only in the north part of Ukraine.

In West of Dnipropetrovsk Oblast you can find these trees. (sometimes they don't have leafs and looks super dead)

In Kherson Oblast on road T0403 and near the area u can find a lot of sunflower plantation.(they are also findbale in other areas but not as many as here).

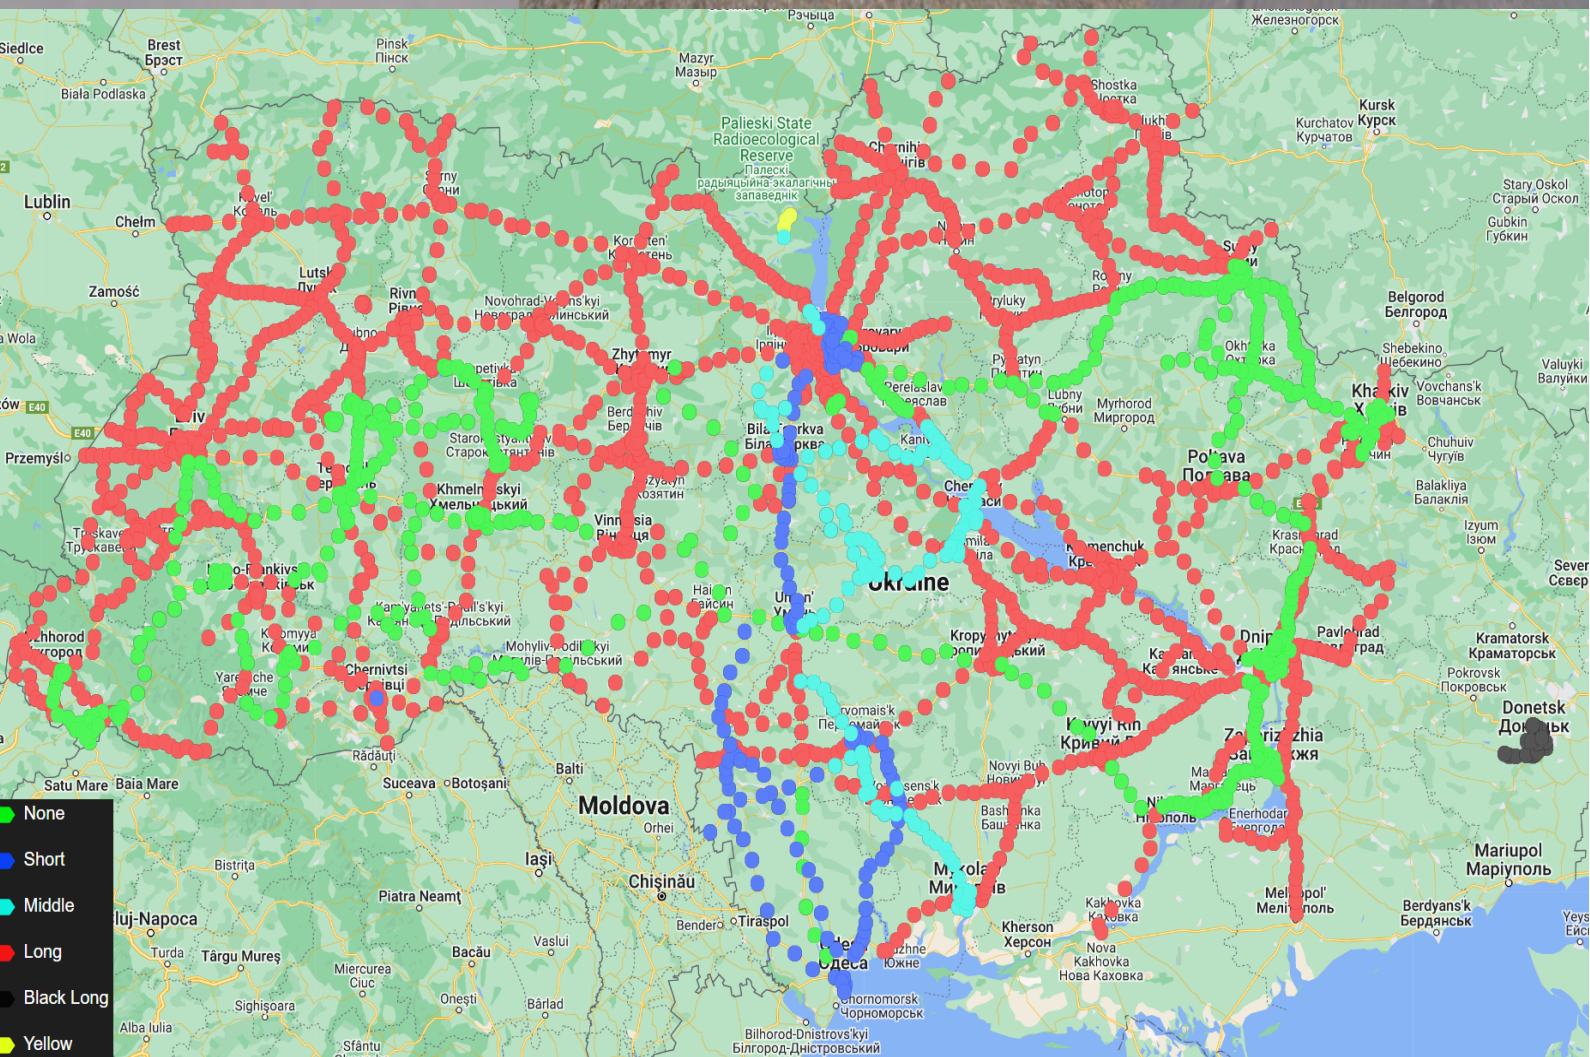

This meta category is not complete yet it's just what I notice at this moment.

Car (antenna)

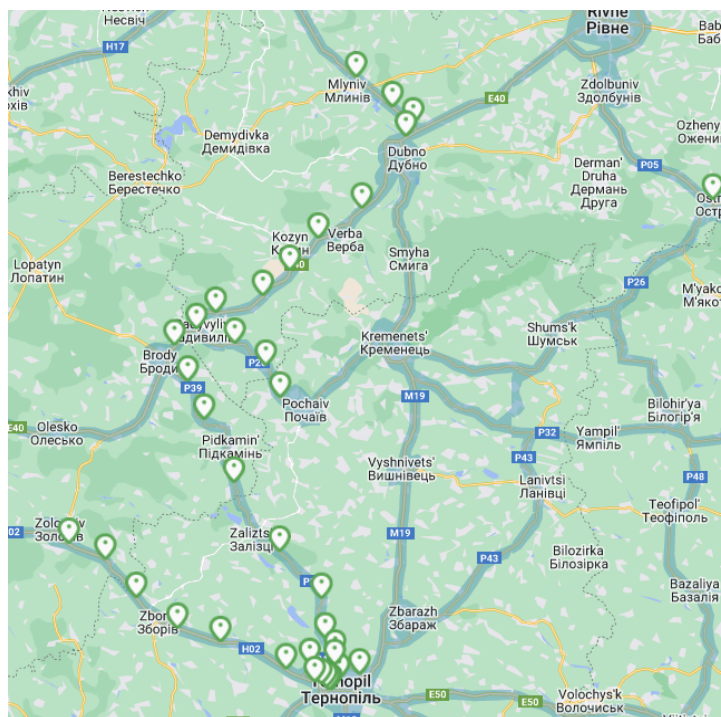

From left to the right.

1. No antenna.
2. Long antenna.
3. Yellow antenna.
4. Middle antenna.
5. Short antenna

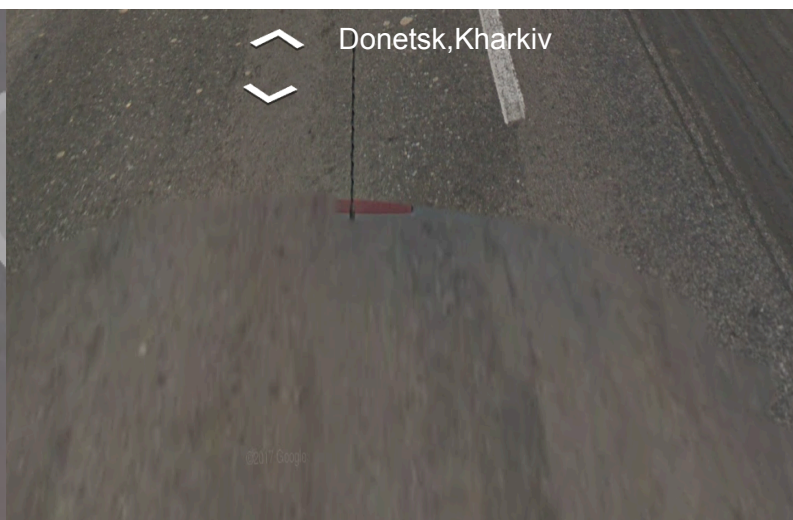

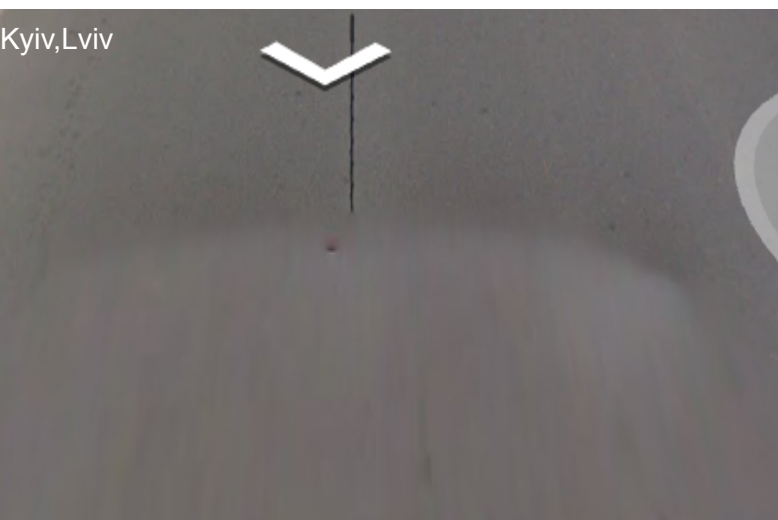

Uniq cars

In this area u can found car with long antenna and with leaf on it

Also u can find russian type of car(black) in Donetsk city and in old coverage in Kyiv, Lviv,Kharkiv. In Lviv and Kyiv more common to see white russian car. In Donetsk,Kharkiv black type.

Season

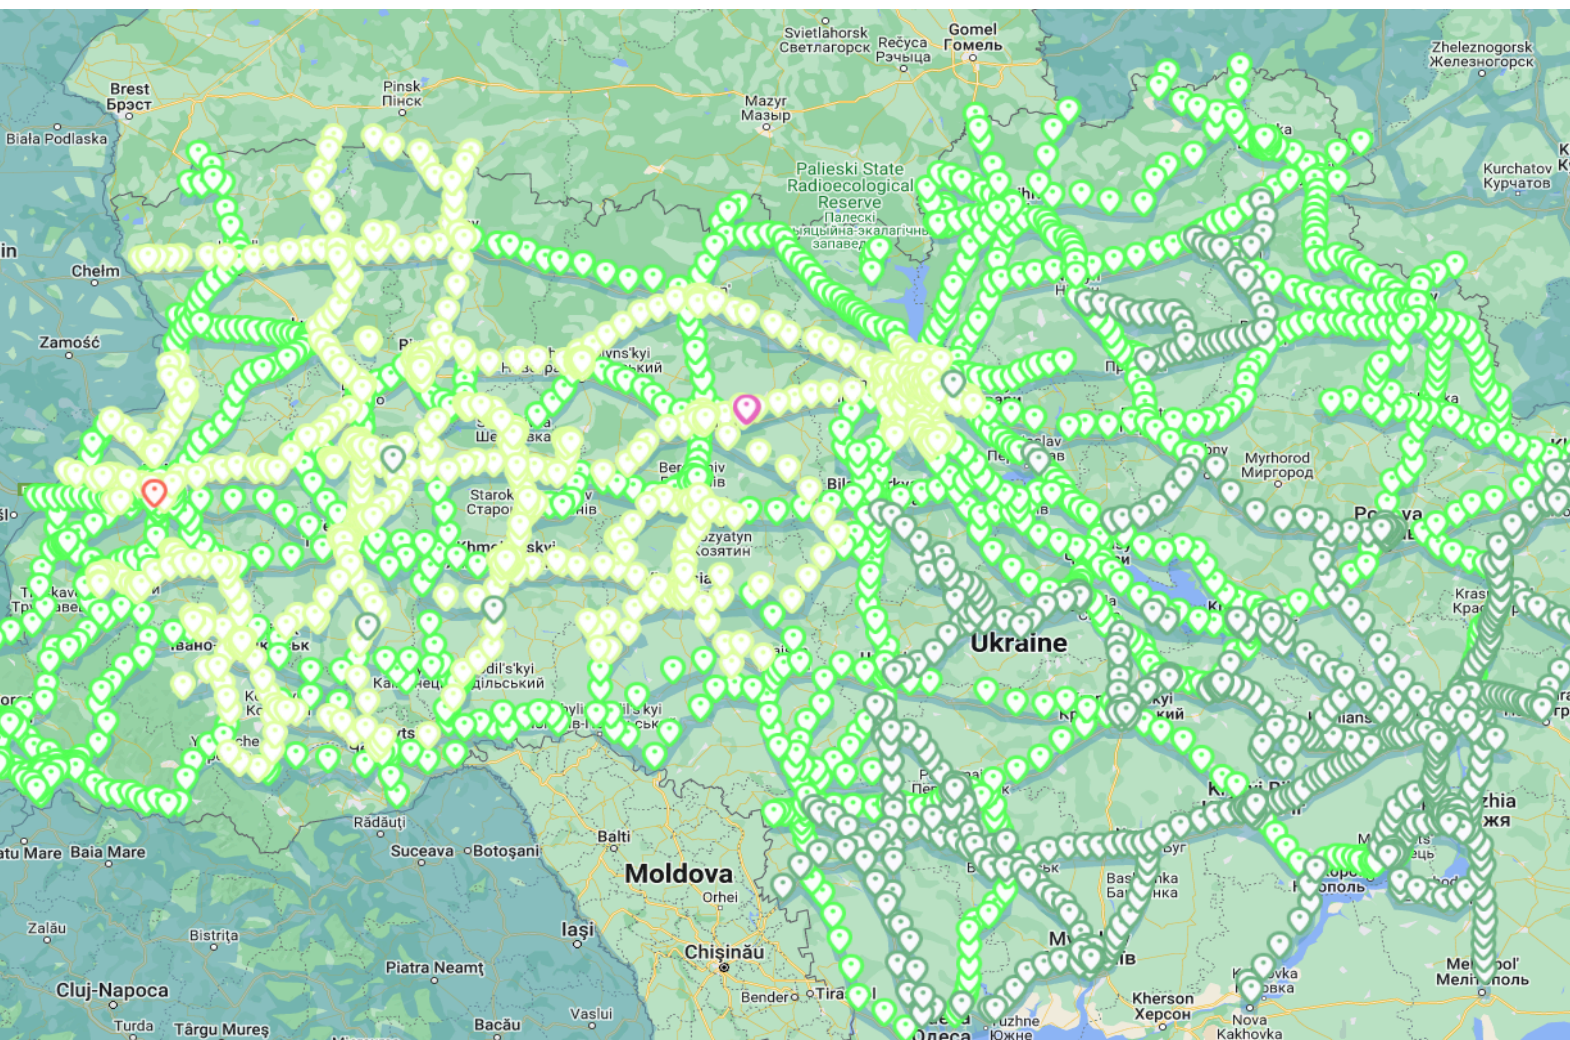

Months

Ukraine has 4 months of coverage (3 big and 1 small). The difference between June and July coverage u most of the time can't see(rarely u can see the difference by some rare trees and flowers etc). May coverage look more spring (trees more naked, grass not looks green at all).Important information that is sometimes difficult to obtain is coverage May or June, and more common to see 100% spring coverage in big cities (Kyiv,Lviv.,Khmelnytskyi,Ternopil) and in area of Khmelnytskyi and Ternopil region.

June + July

May

November coverage

Most common to see November coverage in Donetsk city (always) .

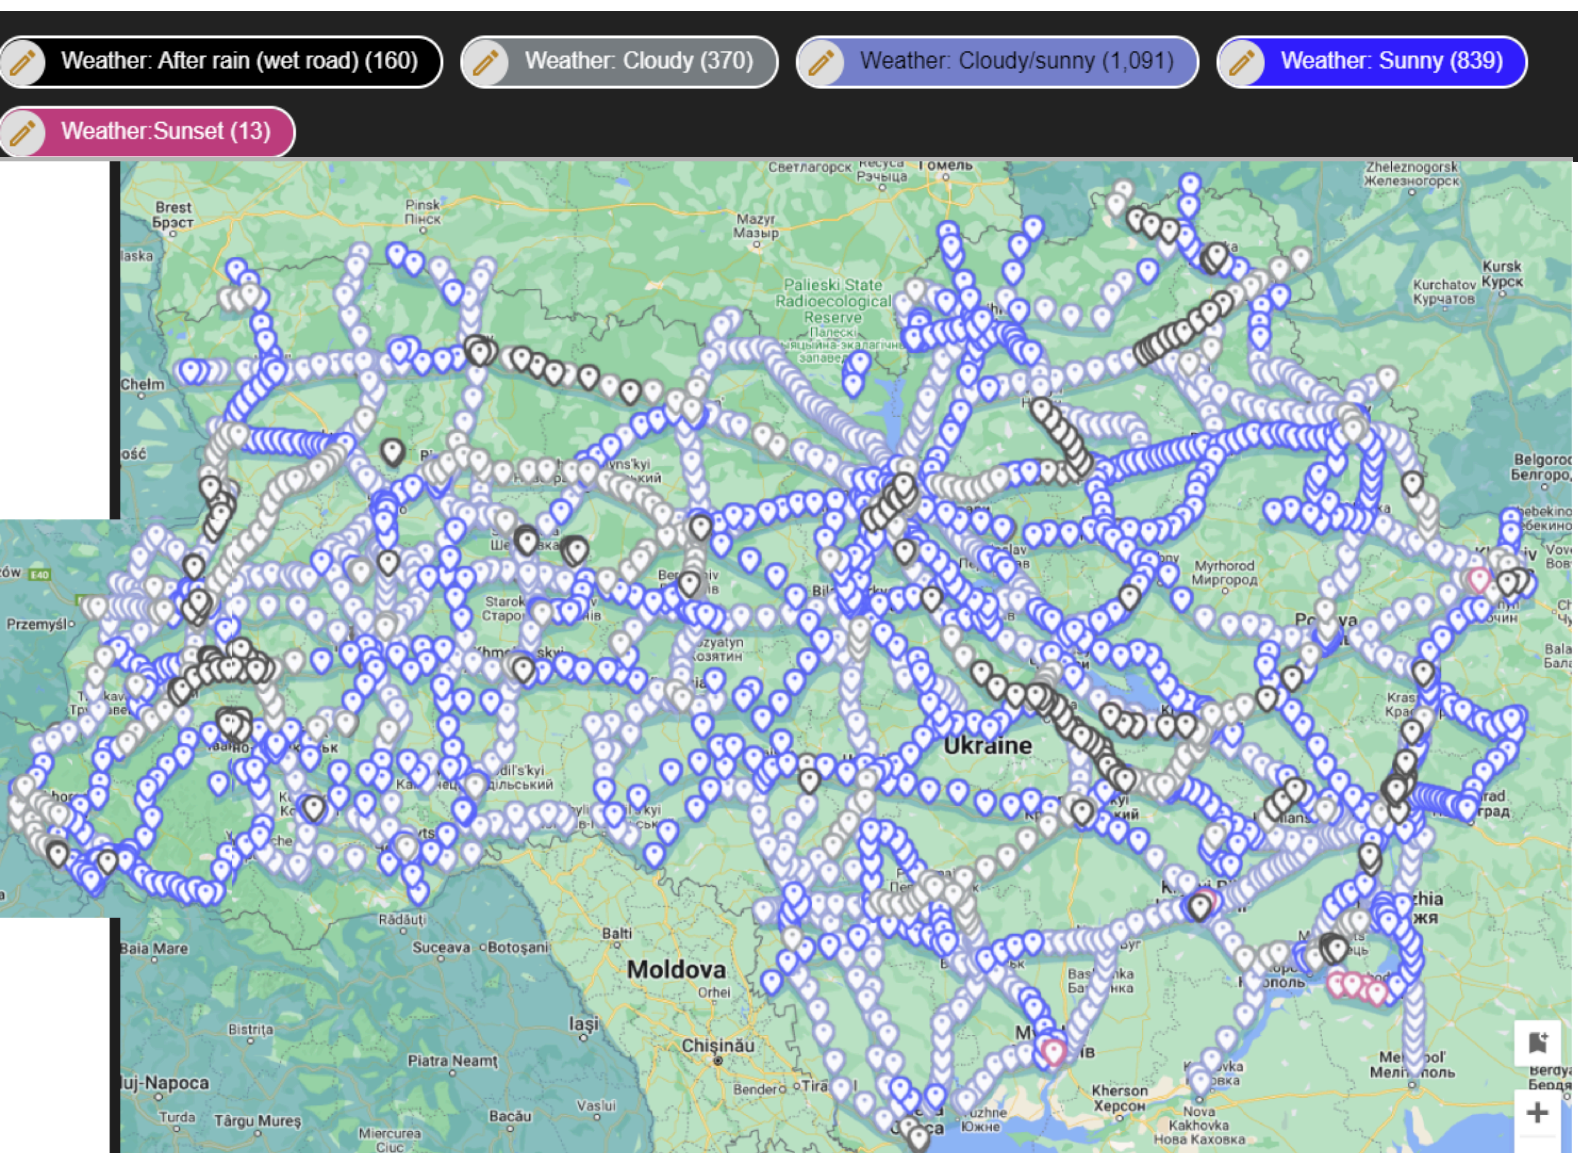

And in Odessa (70/30).

Also you can find November coverage in big cities - Kiev, Lviv, Kharkiv.(old coverage)

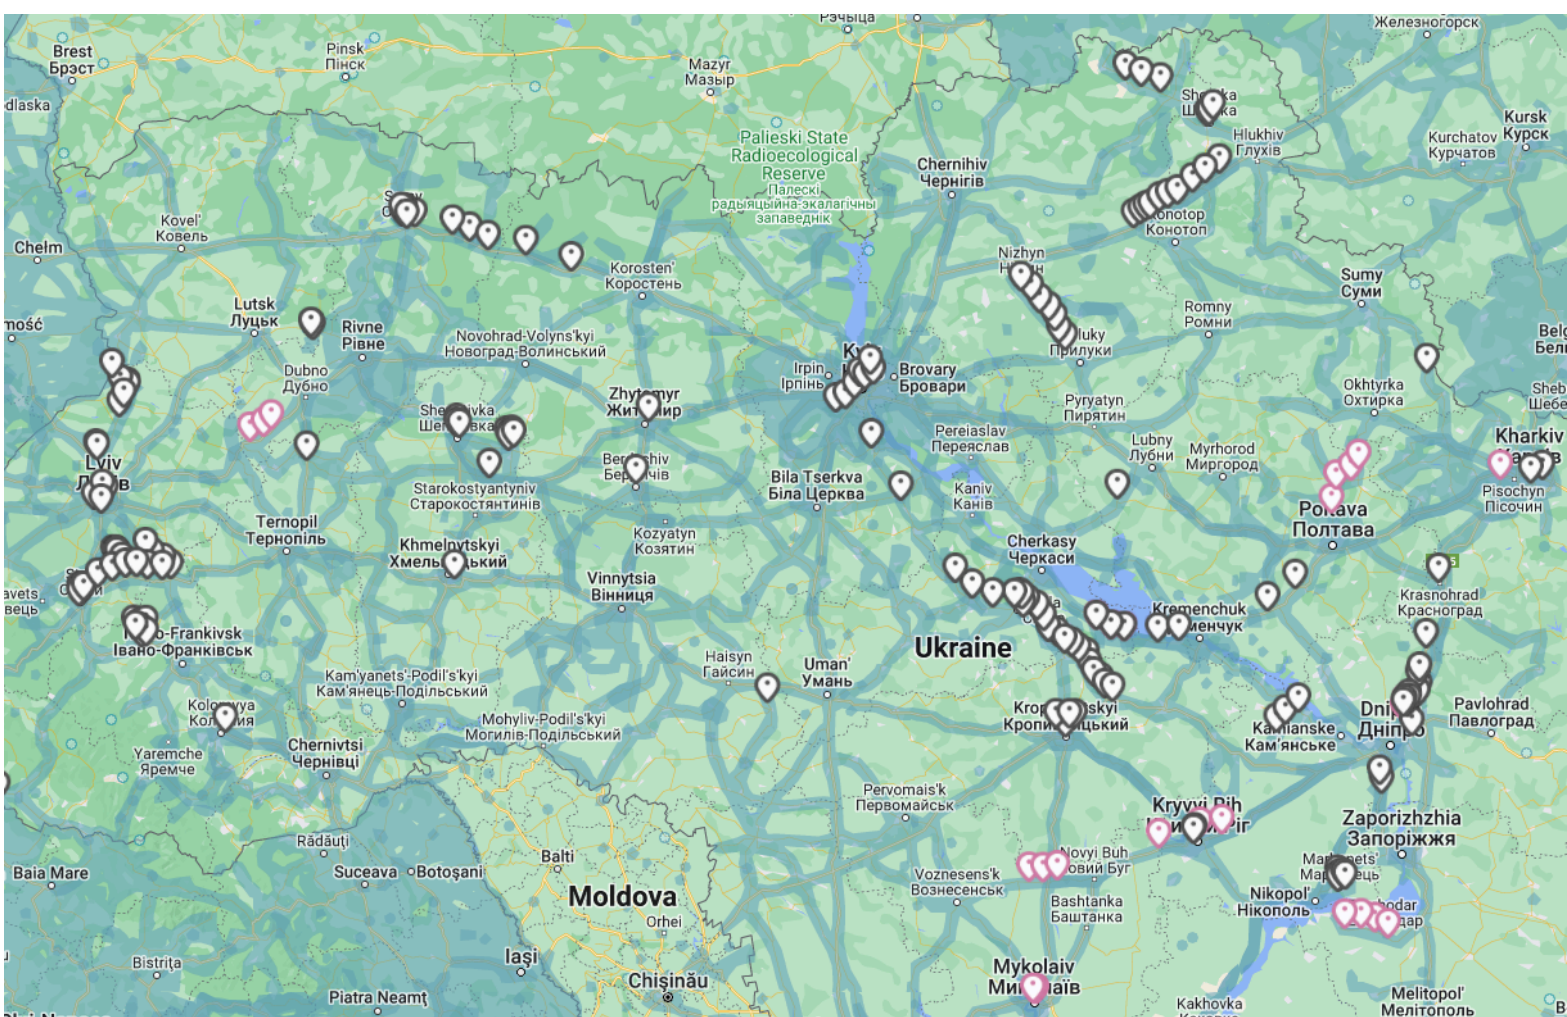

To recognize them use car meta that written above(Odessa November coverage only short antenna).

Weather

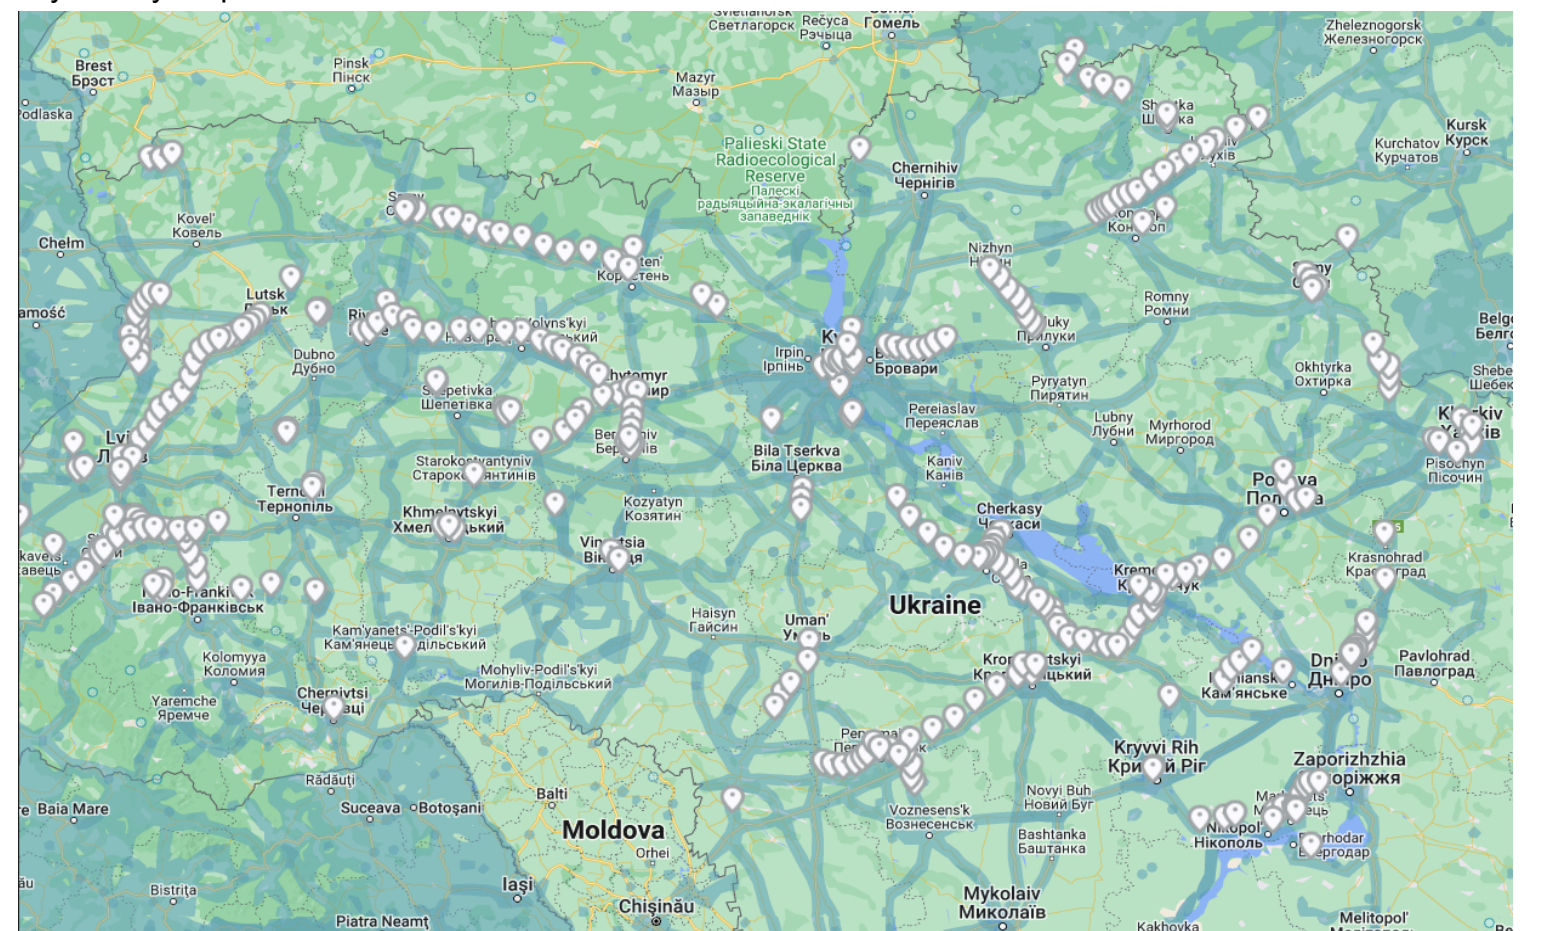

Sunny and sunny/cloud meta is hard and sometimes useless. So my tips better learn cloud and rain meta and compare it with others meta to get region right.

Only sunset and after rain map.

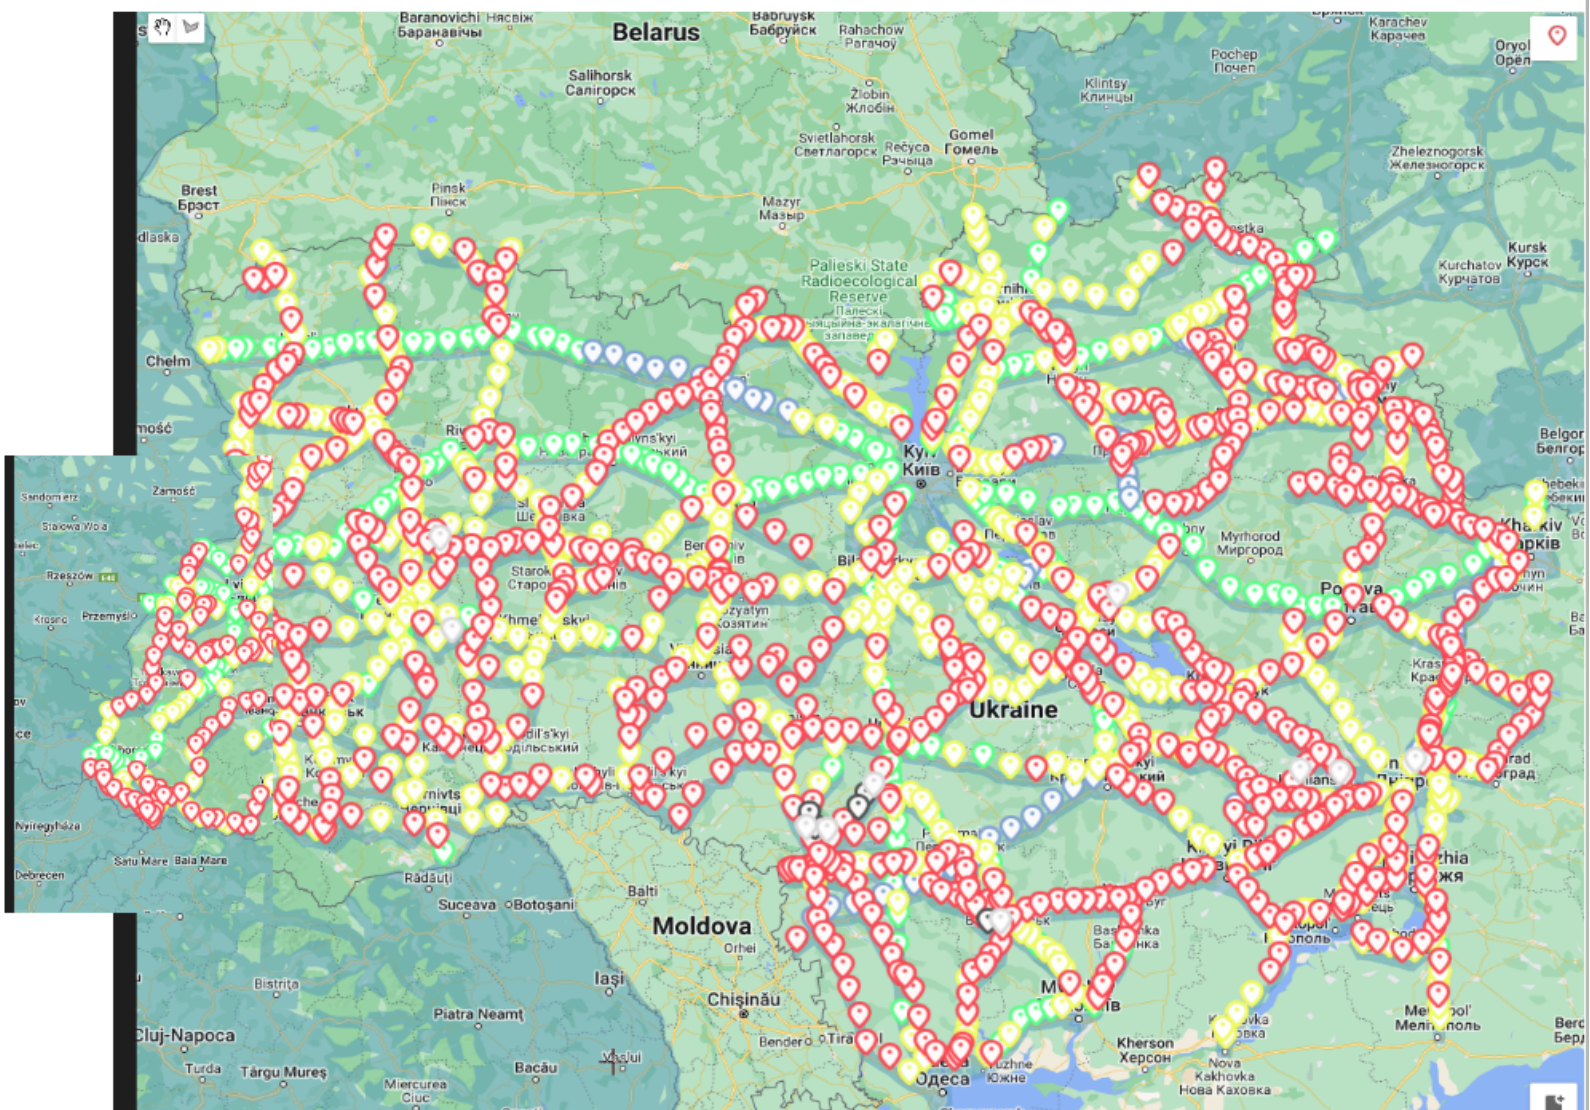

Only cloudy map.

Roads

Quality of road

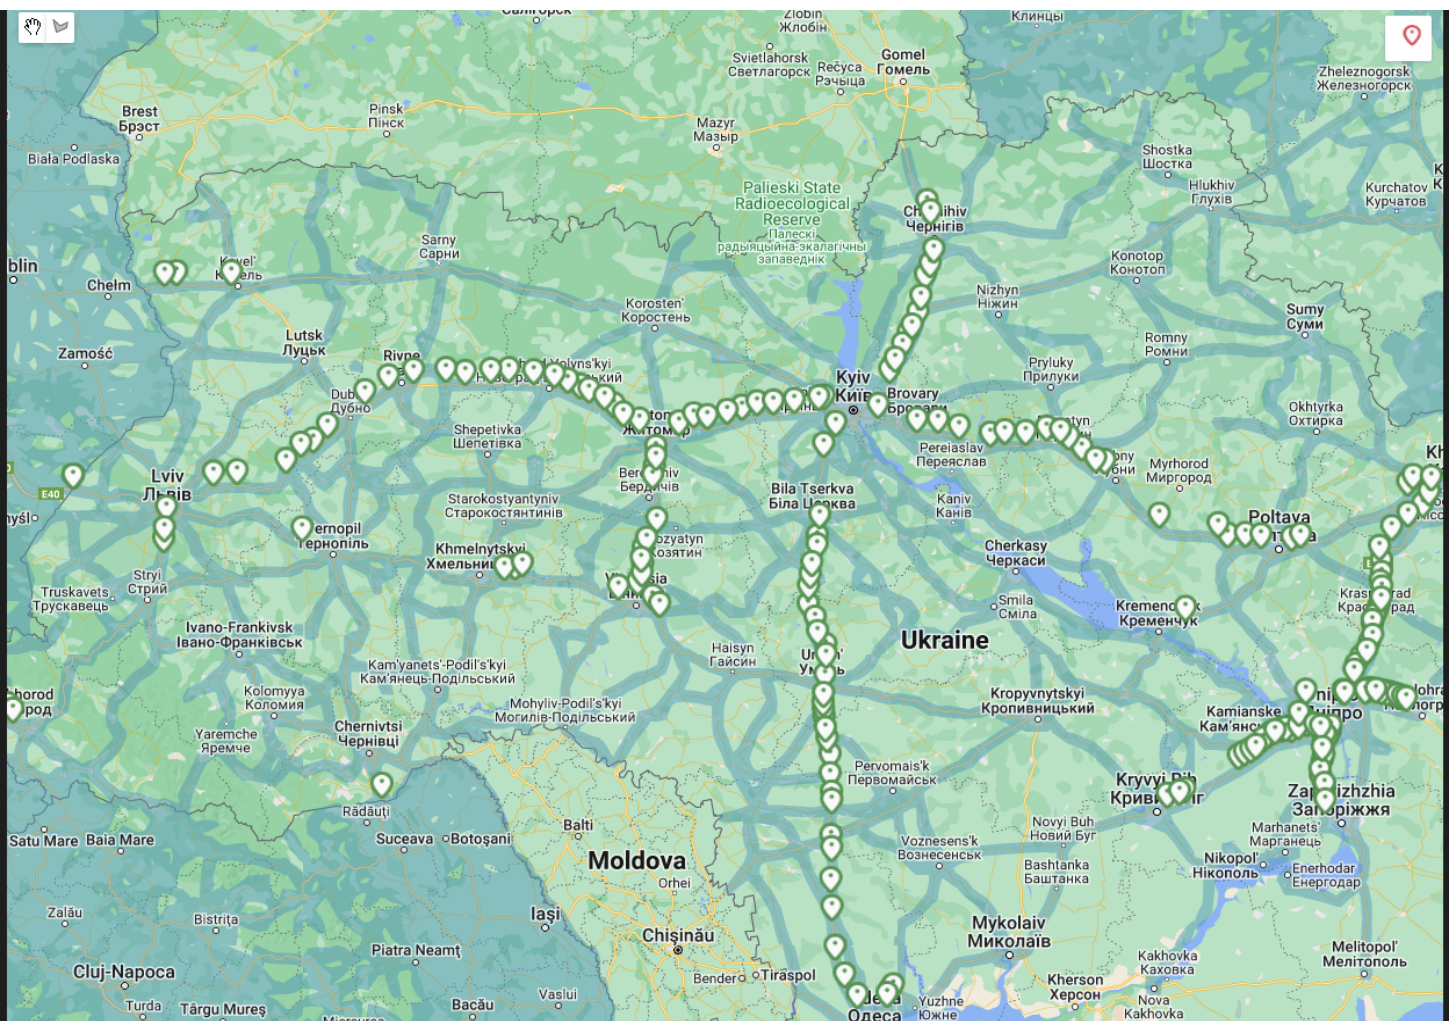

Ukraine coverage does not contain every single road so it's easy to recognize them.

Divided roads

It's also more important to know where you can find divided roads.

divided road example

Map for practice divided roads <https://www.geoguessr.com/maps/636a0cd7851e1d9bacdb5e48>

Divided roads Full guide

Odesa-Kyiv highway

General info:

Route numbers: E95,M05.

Have A,B,C roads type.

Have short antenna ,mid antenna and no antenna on google car.

Road has sunny,semi-cloudy,sunset weather.

Biggest clue to get road:

Most common to see short and medium antenna.

North-South direction almost all the time.

There are a lot of sunflowers near the road.

Sunset in the south part of the road.

No antenna in the south part.

Road angle example.

Example of the south part.

Odesa-Kiyv highway.

Dnipro-Kharkiv highway

General info:

Route numbers: E105,M29.

Have A,B, and concrete roads type.

Have only a long antenna on google car.

Road has sunny and semi-cloudy weather.

Biggest clue to get road:

Most common to see short and medium antenna.

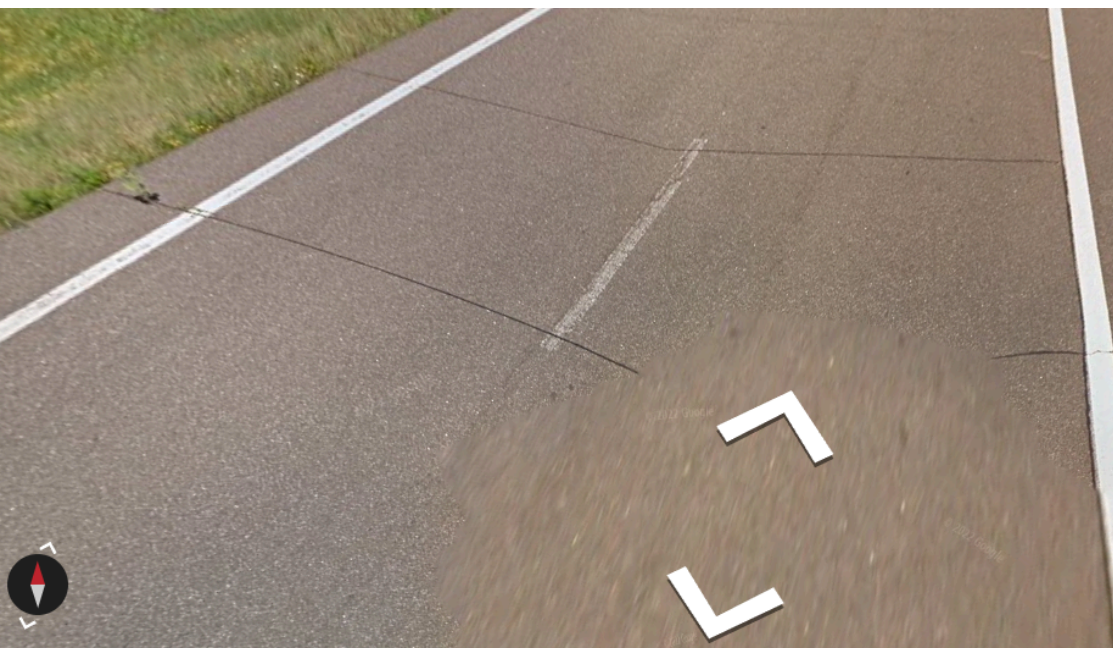

Most common to see concrete road.

North-west-South-east direction.

Do not have road guardrail, a bit overgrown grass between roads.

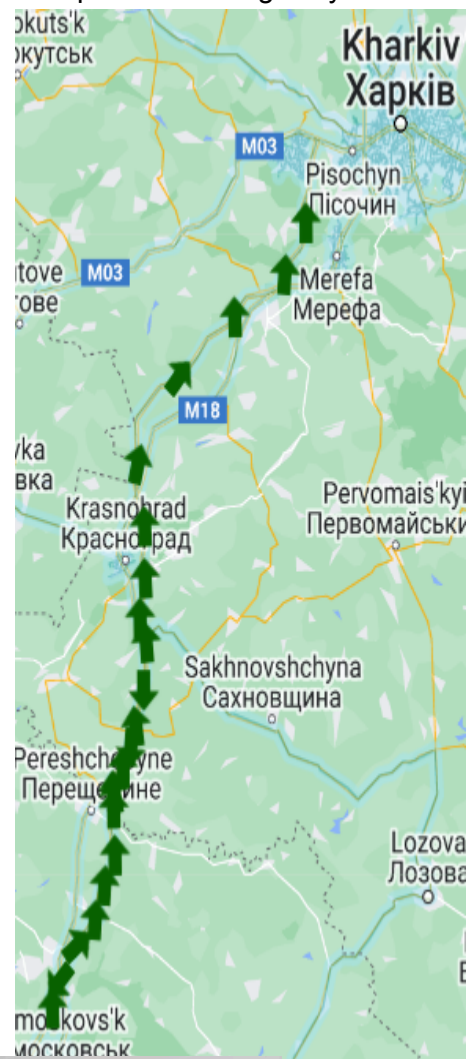

Has "dots" on screen.

Road angle and concrete road example.

Example of "dot" and overgrown.

Dnipro-Kharkiv highway.

Poltava-Kyiv highway

General info:

Route numbers: E40,M03,T1715,P11.

Have only A roads type.

Have a long antenna and no antenna on google car.

Road has sunny and completely cloudy weather.

West-East and North-East direction.

Biggest clue to get road:

From Poltava to the village of Lubny you can see a lot of sand and how the dividing road began to be built.

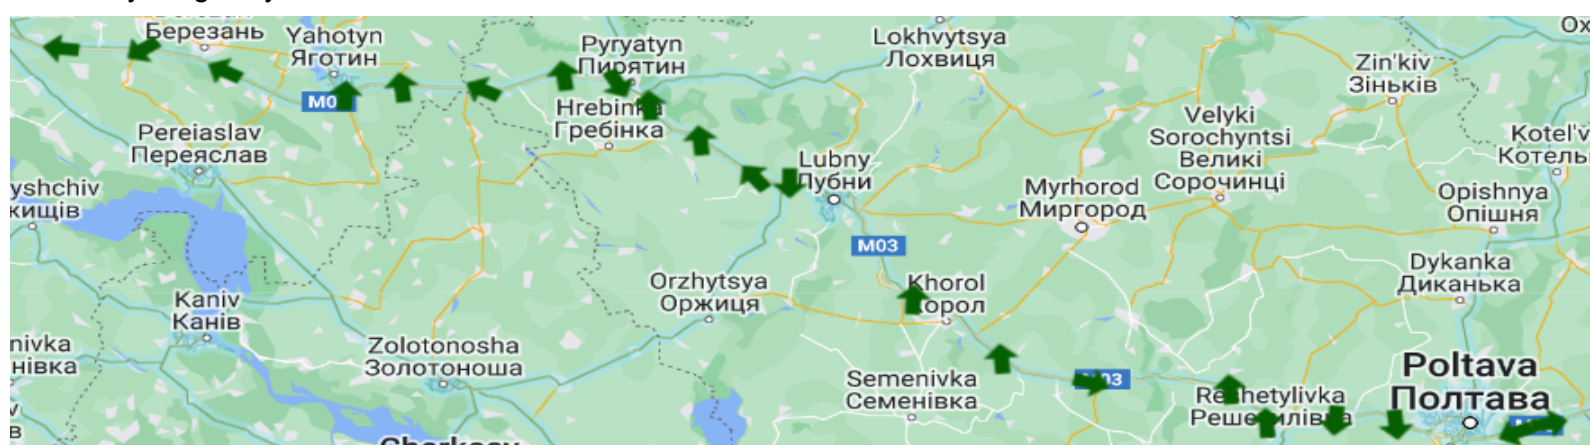

All highways have extremely good quality of road (A type).

The western part of the road from Poltava is completely cloudy.

From Lubny to Kyiv google car do not have antenna.

From Poltava to Lubny, google car have long antenna.

Poltava-Kyiv highway.

Example of a good quality road.

West of Poltava example (completely cloudy).

Example of east part road (sand + road just started to be built).

Rivne-Zhytomyr-Kyiv highway

General info:

Route numbers: E40,M06.

Have only A roads type.

Have only a long antenna on google car.

Road has sunny and completely cloudy weather.

West-East and North-East direction.

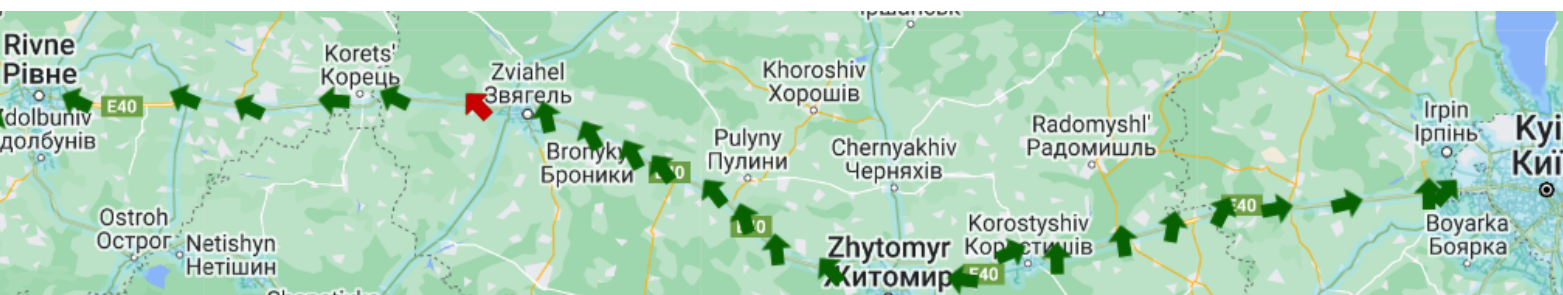

Biggest clue to get road:

From Rivne to the village of Zviahel the weather is extremely cloudy.

All highways have extremely good quality of road (A type).

From Zhytomyr to Kyiv you can see a lot of northern trees(pines).

Rivne-Zhytomyr-Kyiv highway.

East part example.

North pines example.

Dnipro-Zaporizhzhia highway and nearest road

General info:

Route numbers: H08,M04.

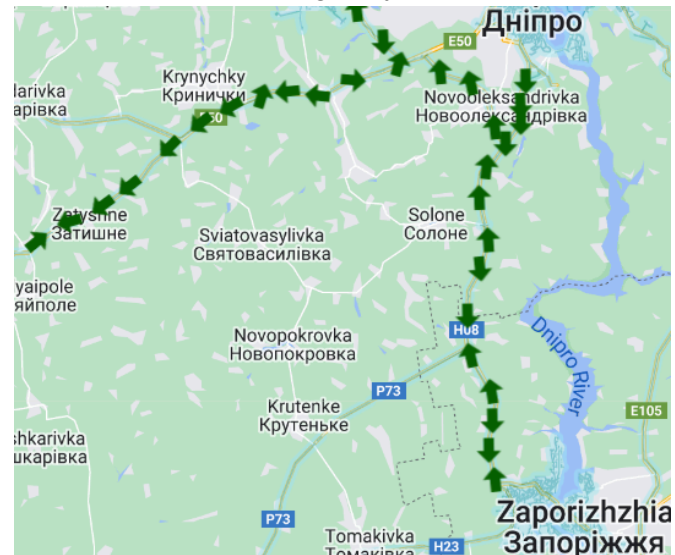

Have A and B roads type.

Have a long antenna and no antenna on google car.

Road has sunny and semi-cloudy weather.

West-East and North-South direction.

Dnipro-Zaporizhzhia highway and nearest road.

Biggest clue to get road:

Both roads are of rather poor quality.

Direction.

Plants through the road.

South-North highway do not have antenna on google car.

East-West road have long antenna on google car.

Some parts of highways feel like they are after rain.

Example of bad road and after rain coverage.

Plants near the road example.

Vinnytsia-Zhytomyr highway

General info:

Route numbers: E583,M21.

Have A and B and C roads type.

Have only a long antenna on google car.

Road has sunny and completely cloudy weather.

North-South direction.

Biggest clue to get road:

North-South Direction.

B quality road.

From Zhytomyr to the village of Berdychiv the weather is extremely cloudy.

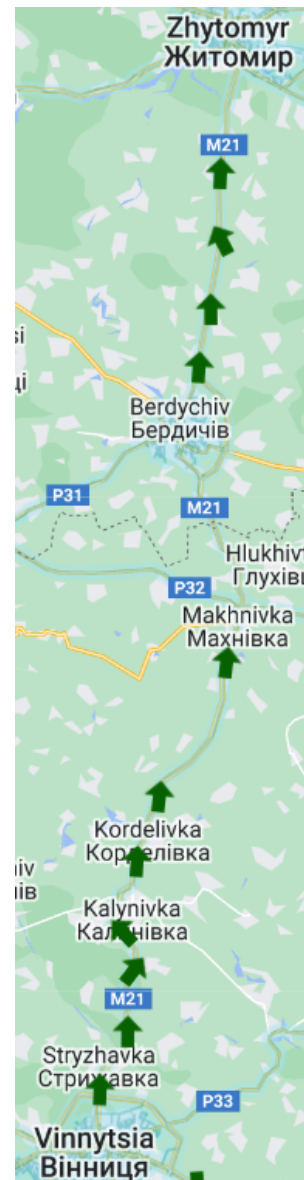

Road have a lot of trees around.

South part of road coverage in May.

North part example (completely cloudy weather).

Vinnytsia-Zhytomyr highway.

Example of “trees everywhere”.

Kyiv-Chernihiv highway

General info:

Route numbers: E595,M01.

Have a B type of road.

Have only a long antenna on google car.

Road has sunny and semi-cloudy weather.

North-South direction.

Biggest clue to get road:

Road angle.

B quality road.

Pines tree.

Road angle.

North pines example.

Kyiv-Chernihiv highway.

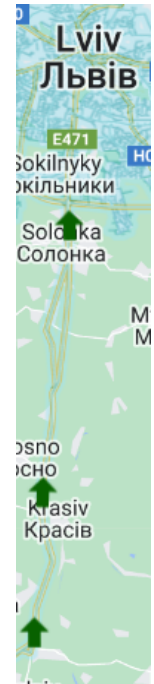

Others

You can also find divided highways near borders and big cities, if I try to describe them all this part of the document will be too big.

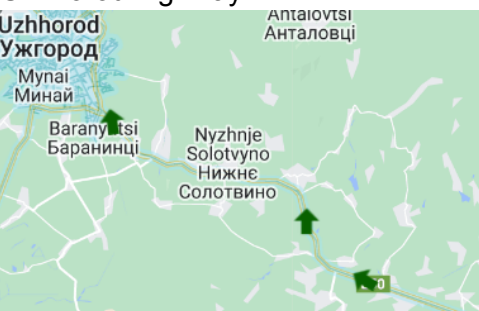

Some example of them.

South highway of Lviv.

Have some hills in the west and no antenna on google car.

Uzhhorod highway.

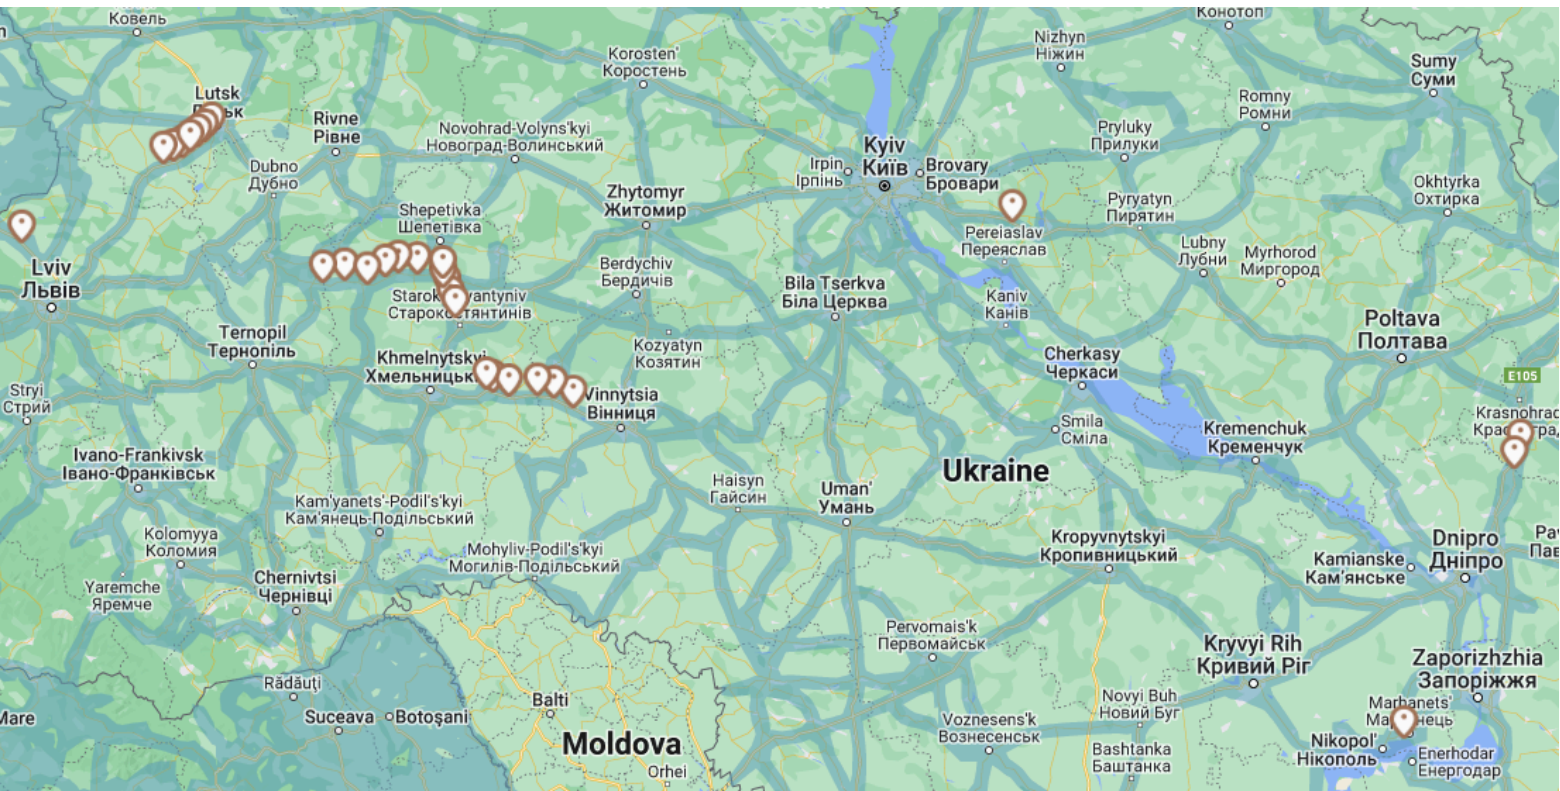

Huge mountains in the north and north-west.
“polish” bollards on the road.

Uniq stuff

Dots on screen

On those roads you can find some “dots” on the screen.

The “dots” that you can find always look different depending on what road u are and it's an easy way to get on what road u.

description of dots + road name.

Bollards + Pole

In Zakarpattia oblast u can find unique “polish” bollard.

U also can find bollards everywhere in Ukraine. An important tip is that in Ukraine, there is no bollard spam, unlike Russia.

Pole that you can find only in Kryvyi Rih.

Chernobyl + Pripyat

Most recognizable cities in Ukraine.

Dead city (everything is overgrown,no cars ppl etc on street).

Also you can find a lot of this pipe in the middle of the road.

Camera Bug

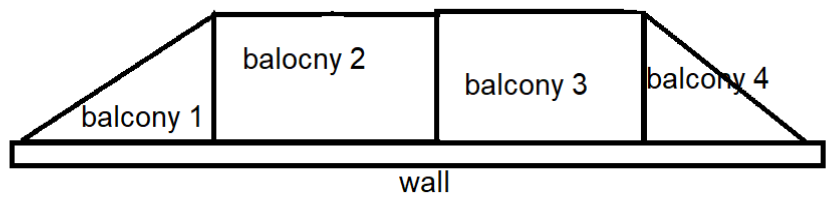

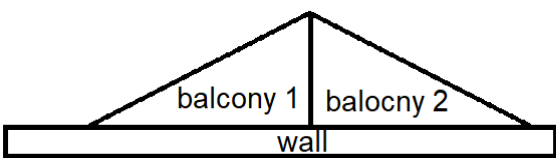

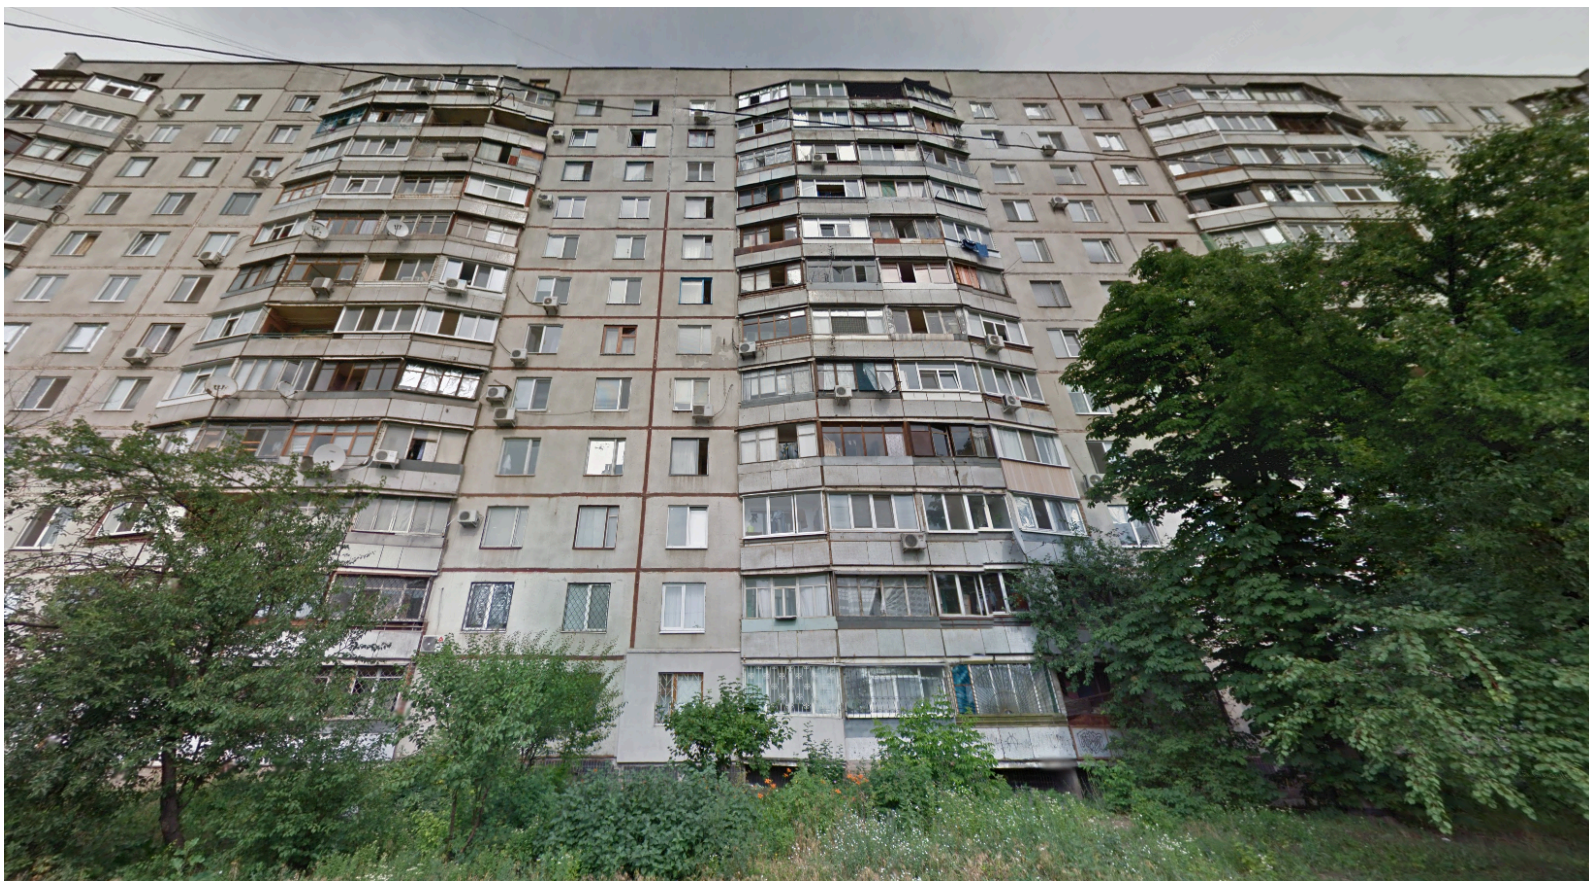

if u often see that camera bug u probably in Ivano-Frankivsk city

Architecture

Kharkiv

Kharkiv architecture: white/gray soviet buildings with triangular/trapezoid balconies. Usually red ties between blocks.

Western-Southern

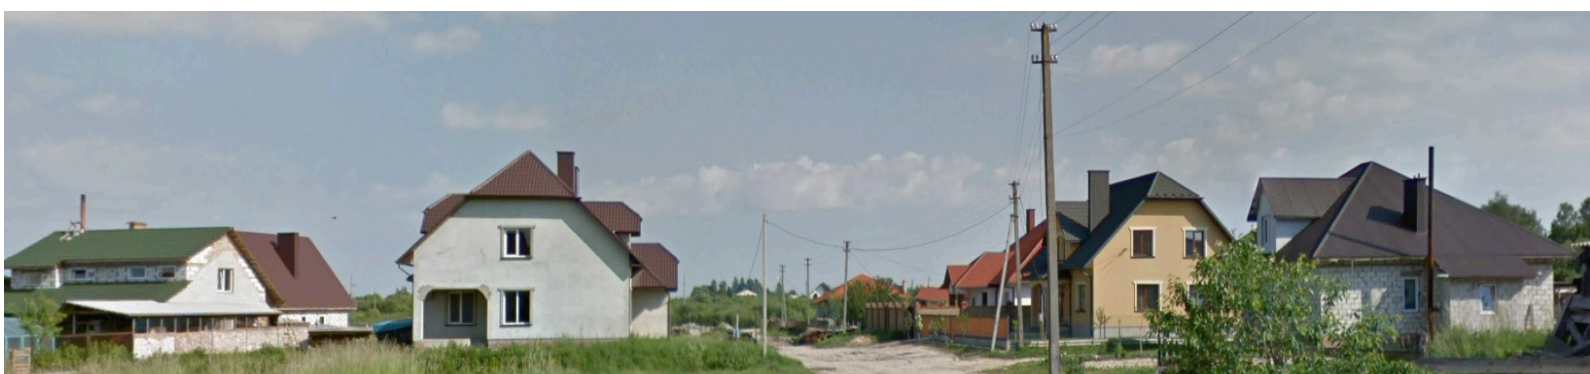

You can find “Hungarian buildings” all the way near the Hungarian border.

Pink buildings with tiled roofs.

It is pretty common to see western architecture in western region of Ukraine (Volyn, Lviv oblast).

Example of west architecture

This category is not complete yet.

Afterword

Almost every popular meta that I discover I write here.

If you find any popular meta and u wanna me add it in a document or if u have any questions/reports feel free to dm me on discord viuglk358
