WAR IN THE NEW WORLD!

ODDE DÆT LOND

Captain Mercy has made her way into the new world earlier this year. We have long pondered what such a high ranking official moving into the new world could mean, and this week we discovered the plans of the King Antithus. Soldiers of the newly professional army have been ordered to march into the desert lands south of the failed Hartnett, know Albian colony of the Lower continent. Yolnu as the natives refer to it, is alleged to have attacked Ranchers who sat near the border lands. With Mercian honor compromised the preparations for war made a few years in advance were finally put into action.

The New World soldier

However to many this was not simply an act of war but a chance too regain the pride lost in the stagnation of the last century, something the Mercian rebels had promised to remedy nearly 70 years ago.

transcribed the changes here In the new nation of Mercia, the old city of Hartnett has become Afen. too her east the nation of widercorra houses Farrow, Seknd, and Wasser who have taken the names dæl, ðu, and ædre. Further east the nation of cēle is born with White Horse becoming albehorse. In the old Iddish territories ægflota is created made of Kranz and Cranz. Now known as ylcan and canyl. In Undgar, the new nation is Undgar, the city now known as Undar. Hláfordsearu further west made of Herzio and Romperstation. Now ceawanhlew and Vláfordsearu. Aldfriþ made of Kripke which is now aldfriþ. Alrica is poicare taking the name alrica. Ánwintrecyning consisting of megaton is taking the nation name for the city becoming ánwintrecyning. And finally Ælfréd the former Havers has become hlæw. These changes mean a significant loss for monarchical power, as in exeption of Mercia the authority lies with the local lords. They are however feudally tied to the King.
