

Subject: Urgent: School Playground Renovation

Dear Councillor Johnson

As a year six student from Gallup Public School I have heard severe complaints going towards an urgent need of renovating the school playground. It concerns parents or parental guardians regarding the fact of their children getting bruises or injuries after a long, hard working, day of school. Parents have been dismissive about taking their kids to school fearing the fact that their child will be injured badly or hurt because of the wild play ground. Parents or parental guardians have been meeting with each other, on the edge of their seats, almost concluding to exchange their kid's school with a safer option, like one that has a healthy environment that has no complaints regarding their children's safety. The swings are deteriorated with paint peeling like stickers and the chains are on the urge of falling down to the sharp, grouped dirt. The slides have edges that could be destroyed within a touch, students are in a predicament deciding whether to slide down the slide or not as of the potential injuries. Many people have been whining about the playground being boring or fearing getting hurt just like the others. It's crucial and pertinent to remember the possibilities of severe injuries like getting handicapped or not being able to do what you used to when deciding to use a dangerous playground like ours. Our neglected playground has shown many safety hazards that have been worrying parents or parental guardians for years such as no teacher on duty to keep the children safe and saved swiftly. There have been many meetings regarding this specific topic but unfortunately nobody has taken action to address this severe community concern.

I hope that my words will cause a change of heart. I have deep concerns for your decision but I hope you make the right decision to repair the beloved school playground expediently.

Yours Faithfully
Ammar Memon
