Release of Vocera Vina 10.2.1.94 for iOS

Vocera is pleased to announce the release of Vina 10.2.1.94 for iOS, available in the Apple App Store on March 18, 2022. This is a maintenance release that introduces fixes to known issues, no new features are introduced at this time.

For additional information on features and fixes, please reference the Vina 10.2.1.94 release notes for [iOS](#). See Knowledge Article 9609 in the [Vocera Support Portal](#).

What's Fixed?

- When a user receives a call while the app is in the foreground, the ringtone volume now does not fluctuate.
- There is no longer an intermittent delay in alert delivery resulting from the Vina app being suspended before disconnecting from the XMPP adapter.
- A user that logs into a second smartphone is now completely logged out of the first smartphone.

What do I need to do?

- Download or update Vina 10.2.1.94 from the Apple App Store on March 18, 2022.

How will this affect other Vocera systems and users?

- Other Vocera products are not affected.

Note: Vocera will provide an alert to our customers when we have validated any new iOS GA release. Please do not update your devices to any iOS version, beta or GA, until we have sent you an alert stating it has been verified compatible with your Vocera products.

Questions Concerns or Feedback?
