

MINDORO BOAT MINISTRY

DESCRIPTION:

The Mindoro District envisions a ministry that shares the Gospel while also providing sustainable livelihood support for small fisherfolk and families on the edge of the community. As a newly established Phase One district, Mindoro is just beginning to form its ministry identity and reach across the island. A church-led fishing ministry is seen as a practical and relational way to serve communities both spiritually and economically. The first and most essential step is the purchase of a fishing boat to launch this ministry.

The fishing ministry will serve as a platform for outreach and discipleship within local fishing villages. Through regular interaction with families, pastors and leaders will provide pastoral care, Bible studies, fellowship gatherings, and community development activities centered around the fishing operation. This approach allows the church to meet real needs while building trust and sharing the hope of Christ.

The desired impact is a united effort among pastors and district leaders to strengthen the church's presence across Mindoro. By combining evangelism with sustainable livelihood support, the district hopes to see spiritual growth, stronger communities, and an expanding witness that reaches the entire island with the love of Christ.
