

INTRODUCTION

Drug war and political killings is very common in our society today. The purpose of this concept is to determine how did drug war and political killings really affect to individuals. In this case, our group aims to create online sources that will help promote the awareness of people involved about this certain problem. Moreover, War on Drugs, the effort in the United States since the 1970s to combat illegal drug use by greatly increasing penalties, enforcement, and incarceration for drug offenders. Concerns over the effectiveness of the War on Drugs and increased awareness of the racial disparity of the punishments meted out by it led to decreased public support of the most draconian aspects of the drug war during the early 21st century.

DESCRIPTION

War on Drugs. Drug addiction is a problem faced by many people of the world today. The War on drugs trade and fight against drug dealers. The campaign was conducted with the help of participating countries facing many intended to reduce the level of not only drug consumption but drug addicts. Drugs will always be a part of our culture so we are obligated to help the ones who seek help and guide others to do the right thing. Drugs can be classified in many ways by the way they are dispensed, by the way they are administered. They can also be classified by their names. All drugs have three drugs which include their three chemical name, a generic name and a brand name. Once a drug enters your body it is absorbed into the bloodstream, from the bloodstream it is distributed to various tissues and organs. As the drug is broken down and used by the body it then goes through chemical changes that produce metabolites which have no effect on the body, finally they are eliminated. So now that we know how drugs are classified we are going to look at the illegal types of drugs that we are fighting today. The different types of drugs include anabolic steroids.

Furthermore, our group aims to create Change.org petition, a Facebook group and a blog to help achieve our goal. We will be creating infographics and other related information connected to the problem we are mentioning which is the drug war and political killings.

SUPPORT

We must put a stop to these unrelenting attacks now. And this worsening situation would not end as long as those who perpetrate them run free and unscathed. These perpetrators must be brought to justice before any court, tribunal or body that will act independently, with impartiality, and effectively, having allegiance to human rights and justice instead of powers that be.

War on drugs in the Philippines has gone so far. When Rodrigo Duterte was inaugurated as our newly president, he immediately said that his objective as a president is to eliminate drug pusher and drug user in our country. Extra judicial killing happened. Wherein, a lot of people are being killed, some are said to be innocent, some are those who denies and tried to fight back with our militants.

As a citizen of our country, it is good to know and be aware of the status of war on drug in our country. It has been an effective way to eliminate and eradicate drug user and make our own drug-free country. This might take years since, many Filipinos are not really disciplined and are easily lured with drugs. But, it is not too late to hope for our country's betterment. There is a still hope of change.

In addition, we will be requiring a week to develop this project and we will start our promotion right after we have uploaded the website. We will also be using our own resources so the funding for this project will be close to none. Our expenses may only include the printing of campaign materials, the internet, and computer shop rentals in case we need more time outside school hours.

For some inquiries about our project feel free to contact us at legaspiacemhar@gmail.com
