  * Michael will submit session for OpenJS World summit.

nodejs/admin

* Audit Google account access [#389](https://github.com/nodejs/admin/issues/389)
  * Brian was in the meeting for another reason was volunteered discussion will continue in issue.

Strategic Initiatives

* V8 Currency:
  * V8 8.3 PR is ready to land on master. Waiting for stable upstream release. https://github.com/nodejs/node/pull/32831

* Promises:
  * There are some discussion around Thenable and AsyncLocalStorage in nodejs/node#33189.
  * Promise hooks (used by async_hooks) are going to get faster by nodejs/node#32891.

* Build resources:
  * Have gotten info from one potential provider, need to sync with Robin on how to review/next steps.

* QUIC:
  * There is no update this week. Progress on separating bits out that can be separated out.

* Modules
  * Landed unflagging of modules in 12.x, flag being removed does change how code executes. Had discussed with some people at Node+JS interactive, risk was tolerable. Talked about flag to disable as escape hatch. Release left it as move forward with unflagging, recognizing there is risk. If wrong, make sure can add flag to disable.
