Music Education Interview

In addition to instrumental or vocal auditions, students are highly recommended to schedule an interview with Music Education faculty while they are on campus. This is an informal time for students to ask questions about the Music Education program and for faculty to learn more about your previous experience and future plans.

If you have not also signed up for an audition in your performing area (vocal or instrumental), please do so in order to ensure that the audition in your performing area is on the same day as your Music Education Interview.
