

# CURATED CLIMATE LIST

By Maya Lilly [@gunghoeco](#)

Constantly Updating, Latest 1/13/2025

[BUY ME A BOOK IF YOU LIKE THIS LIST](#)

## **\*Daily\* Climate News sources**

[ClimateNexus Hot News](#)- Vvv good curated list of all the top climate headlines.

[David Wallace-Wells](#) for New York Magazine

[Bill McKibben](#) for The New Yorker

[Heated](#) by Emily Atkin. She kills it with her framing.

[The New Yorker](#) Climate page

[NY Times Climate and Environment](#)

[Harper's Index](#)- Old school but very cool list.

[Inside the Movement](#)- A very beautiful compilation of articles and actions climate activists care about

## **Greenhouse Gas Emissions**

[World Resources Institute Greenhouse Gas Chart](#)

The gold standard. WRI does incredible research. You can click on the chart and see detailed info in an easy-to-understand way.

[8 Things You Need to Know about the IPCC 1.5 degree Report](#)

The cheat sheet for...

[The IPCC Report](#)

This is the UN report that basically created Greta Thunberg and has all the youth in a tizzy. If kids can read it, so can you. It's also where the 1.5 degrees of warming comes from.

[Losing Earth](#)

The incredible article about the fight to save earth that inspired the NY Times bestselling book.

[Racism is Killing the Planet](#)

One of the clearest explanations I've found about why race = climate.

[MegaDrought in the West](#) (including California)

Why it's not just a normal drought, but a permanent drying out.

[How Exxon Misled the Public about Climate for 40+ Years](#)

Harvard researchers released one of the most important pieces of climate change research to date. It showed that for nearly 4 decades, oil giant Exxon misled the public about climate change. Also explains why dozens of states are suing oil companies right now.

[Resources for Adults Who Think Climate Change is Controversial](#)

Cuz it's just not. It's science. And humans are causing it.

[Sabin Center's Climate Attribution Database](#)

The database collects the best available *evidence* that climate change is real, here and that predicted future changes should be taken seriously.

## **Eating Meat, and Agriculture in General**

[Your Qs about Food and Climate Change Answered](#)

Masterful interactive charts from the NY Times that compare different foods and their emissions.

[The NY Times Climate + Food Research](#)

Just read all the things. NY Times dedicated itself to reporting on climate all the time, they are masters.

## **Glaciers and Currents**

[Thwaites Glacier](#)

Great visual study of why this iceberg is important.

[Physics-based early warning signal shows that AMOC is on tipping course](#)

[Warning of a Forthcoming collapse of the AMOC](#)

## **Environmental and Climate Security (aka Where the Hell to Live)**

<https://projects.propublica.org/climate-migration/>

This is basically the list I've been compiling for a decade all in one. Doesn't have natural disasters or access to freshwater, but great searchable county categories regardless.

[NOAA Sea Level Rise Viewer](#)

Will your home be underwater in 10 years? In Miami, your chances are high.

[Climate Central Risk Zone Map](#)

## **Daily Individual Fixes**

Please keep in mind that it was an effort of the FOSSIL FUEL INDUSTRY to make individuals believe that this was their responsibility. We need to be using the largest levers of power possible, which includes voting/politics, boycotts of money, and legal means to hold fossil fuels and utilities accountable.

[Volunteer with Environmental Voter Project-](#) Get those enviros to the POLLS!

[Global Warming's Six Americas-](#) Yale's incredible work around who really cares. Turns out, many do.

[How the US Presidency can use Emergency Declarations Legally](#)

This unbelievably smart lawyer from CBD compiled this great list, like the Defense Production Act, to show how the Presidency can go further than it is on climate.

[How to Fight Climate Change at Home](#)

This list actually includes growing your own food, which I love.

[5 Critical Climate Actions You Can Take Right Now](#)

Rainforest Alliance are the heavy hitters that compile how much money the banks spend on fossil fuels.

[10 Simple Ways to Reduce your Carbon Footprint](#)

From the rad folks w. Extinction Rebellion.

[How big oil creates systemic problems and then blames consumers for it](#)

From Harvard

## **Fossil Fuels, Banks, and how they Intersect**

[Stop the Money Pipeline](#)

Partnership with 350.org and great stats on why banks are funding fossil fuels.

[Bank for Good](#)

A great resource to search for banks based on racial justice, fossil fuel free, etc.

[Banking on Climate Chaos](#)

Rainforest Action Network's essential research on the banks funding climate crisis. Hint: It starts with Chase.

## **Fossil Free Banks**

[Amalgamated](#)

[Aspiration](#)—I used to use this one, but even though still open, now being investigated by FDIC.

[Beneficial State Bank](#)

[Bank for Good](#) - Great search site to find a bank based on your preferences, including fossil fuel funding, but also BIPOC and female leadership. Let's take these men out of power!

## Videos

[Years of Living Dangerously](#)- Entire Season 1 episodes FREE on YouTube, first/only show on climate

[Frontline Climate Documentaries](#)- I've been working on hard on these for 3 years.

[GunghoEco YouTube Channel](#)- Maya's videos on everything from greywater systems to wanderlust

[Wildfires Explained](#) - or how to talk to your dumb family that thinks it's fire management

[The Climate Crisis](#) with journalist David Wallace Wells

[Exxon Knew](#)- Oil companies created misinformation for 40 years. Here's how.

[Black Carbon](#) - One of the reasons the ice is melting faster in a feedback loop

[Greta Thunberg Does the Carbon Math](#) and [Greta Shouldn't Be Up Here](#)

[The Green New Deal](#) explained by the architect behind it, Rhianna Gunn-Wright

[Why the U.S. Military Thinks Climate is Critical](#)- ...and are preparing for it.

[20 Companies Contributing to Climate Change](#). So you know who to take down.

[How Dirty Energy Manipulates Communities of Color](#)

[A Big Reason UN Climate Talks Aren't Working](#)

[Refugees are Fleeing Climate Change](#) w. Top climate scientist Michael Oppenheimer.

[A Solution to Climate Change is All Around Us](#)- Beautiful little piece about natural solutions.

## TV and Film

More Coming soon...sadly, Hollywood has snoozed on climate in general, until only recently

[Years of Living Dangerously](#) (see above)

[Don't Look Up](#)

[Apple's Climate Change TV Show Extrapolations](#)- Or how NOT to write a tv show on climate.

[Five Days at Memorial](#)- What happened during Hurricane Katrina at one hospital

[Hollywood Climate Summit](#)- Changemakers encouraging the changemakers to change. They are focused on writing climate casually into scripts (product placing) rather than making the whole show about that.

[The Day After Tomorrow](#)- Even though it's from 2004, the premise of the film is what happen if the AMOC circulation in the Atlantic shuts down. As of 2025, scientists are extremely concerned that [will actually happen](#).

## Podcasts

[The ten best climate podcasts](#)

[Drilled](#)

[Maya featured on All Heart podcast](#)

## NonFiction Books

[All We Can Save](#) edited by Ayana Elizabeth Johnson. The top women climate thinkers speak up.

[What if We Get It Right](#)- edited by Ayana Elizabeth Johnson

[An Indigenous People's History of the United States](#) by Roxanne Dunbar-Ortiz. Cuz natives had it right..

[Braiding Sweetgrass](#) by Robin Wall Kimmerer. How native people knew the science before science did.

[Ecofeminism](#) by Maria Mies and Vandana Shiva

[Environmental Philosophy](#) by Zimmerman

[Gaia's Garden](#) By Toby Hemminway. Permaculture as one way forward for agriculture systems.

[Losing Earth](#) by Nathaniel Rich

[Merchants of Doubt](#) by Naomi Oreskes

[The Uninhabitable Earth](#) by David Wallace-Wells. Game-changer.

[The Sixth Extinction: An UnNatural History](#) by Elizabeth Kolbert

[The Spell of the Sensuous](#) by David Abram

[This Changes Everything](#) by Naomi Klein.

[Women and Nature: The Roaring Inside Her](#) by Susan Griffin. Ecofeminist classic.

[The Hidden Life of Trees](#) by Peter Wohlleben

[Overheated](#) by Kate Aronoff

More coming soon...

## Fiction Books

[Ishmael](#) by Daniel Quinn

[Parable of the Sower](#) and series by Octavia Butler

[The Fifth Sacred Thing](#) by Starhawk

More coming soon...
