Annie Baby Monitor App

[Annie baby monitor](#) connects any combination of iPhone, iPad, Mac or Apple watch as same as all the Android devices to create a baby monitor. This baby monitor transfers **high-quality video and audio** from the child's room to you. This app work on Wi-Fi, Edge, 3G, 4G, 5G or LTE. With smart **notifications**, you will always have an overview of what is happening.

Image: [download here](#)

If you need to respond to a few emails on your phone or just scroll through a TikTok, then you will use the **picture in picture feature**. This feature allows monitoring your sleeping baby while using the phone for normal use.

Annie Baby Monitor detects movement. Therefore, this app informs you immediately after any **motion is detected**. The automatic video recording function allows you to look back at, e.g. at what woke up your baby. This function starts **recording as soon as motion is detected**.

The **night vision feature** is a game-changer. You can see what your baby is up to at night by turning on the light on the baby's device and see for yourself. Nothing will pass unnoticed. If you need to watch your baby up close, you can use the **feature zoom in**.

Hearing your voice and seeing your face will immediately calm your baby down. Thanks to **two-way video** feature you are able to soothe your baby by talking.

This baby monitor app also allows **multi-parent and multi-child** usage and supports the **Home Kit Camera**. Annie Baby Monitor also offers **seasonal skins**, e. g. Christmas and Halloween skins.
