Tab 3

write on google docs

1. what is hardware?
2. What is the goal of learning hardware?
3. type menu and function of hardware(minimum 30 items)

HARDWARE?

1 .Hardware refers to the physical, tangible parts of a computer or electronic device that you can see and touch, like the screen, keyboard, mouse, cpu, and memory, forming the foundation that software instructions run on to make the system function.

2. to understand the physical components that constitute a computer system, enabling you to build, troubleshoot, maintain, and optimize technology efficiently.

3. Computer hardware consists of the physical, tangible components of a computer system, categorized by their function in processing, storing, inputting, or outputting data. The following is a list of over 30 hardware items, divided into into internal (core) and external (peripheral) component

[12.32, 4/2/2026] Tali: - Cpu (Central processing unit)

- Motherboard
- RAM
- Hard disk
- Solid State Drive (SSD)
- Power Supply
- GPU (graphics processing unit)
- Sound card
- Network Chard
- Monitor
- Keyboard
- Mouse
- Printer
- Scanner
- Webcam
- Speaker
- headphone
- Micophrone
- CD/DVD Drive
- USB Flash Drive
- Card Reader
- Modem
- Router
