

CaptureMyMeeting: User Documentation

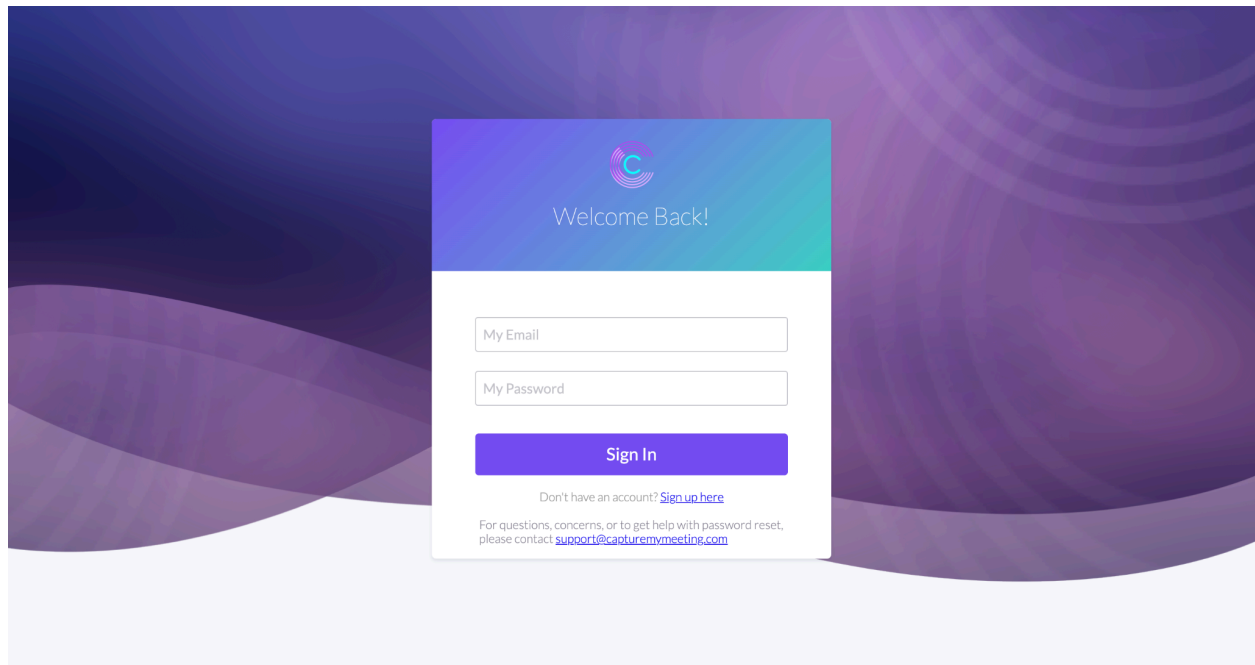

CaptureMyMeeting is an online web application that keeps track of your meeting content for you. The application will index your meeting recordings, enabling you to view, search, and share their spoken and written content. It will also generate automatic meeting notes. Find the relevant content you are looking for at any time. No more need for extensive meeting notes!

Register and Sign In

Sign up for a FREE account at <https://www.capturemymtg.com/auth/signup>. You will need to provide your email address and a password, along with your first and last name.

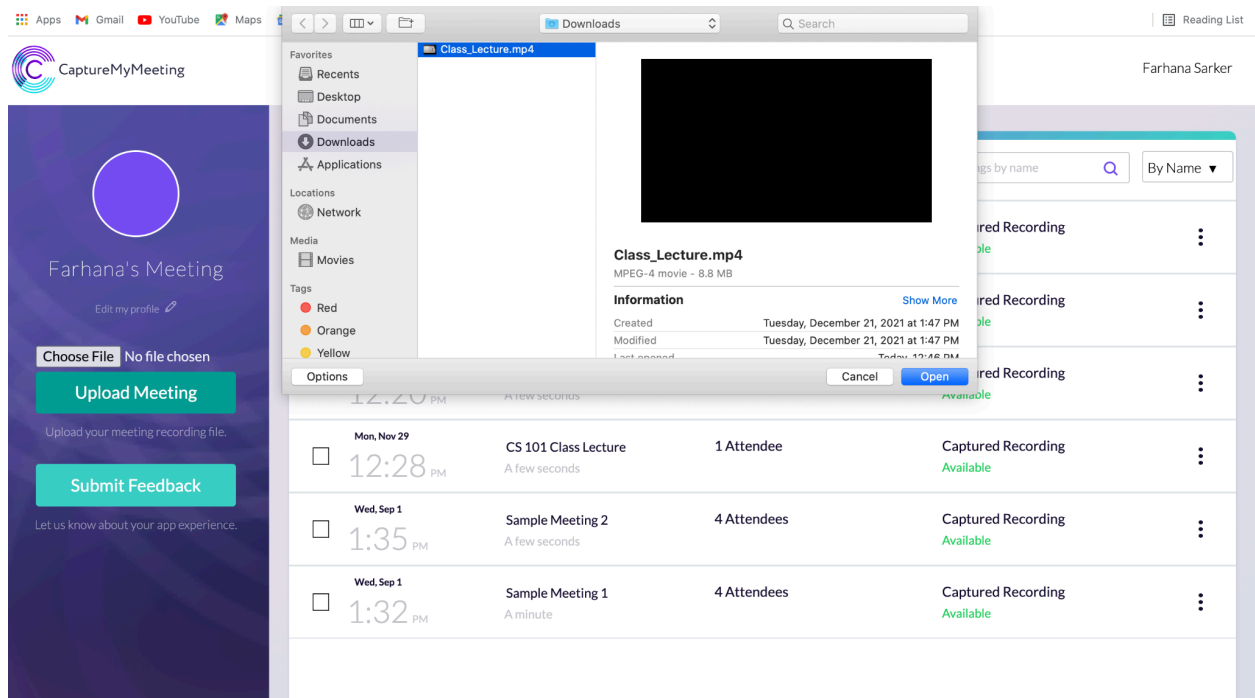

The image shows a web registration form titled "Get Started!" with a logo consisting of a stylized 'C' made of concentric circles. The form is set against a purple and blue abstract background. It includes input fields for "First Name", "Last Name", "My Email", and "My Password". Below these is a checkbox labeled "I have read and agree to the" followed by a link to "Terms of Service". A prominent blue button labeled "Sign me up!" is at the bottom of the form, with a link "Already have an account? Sign in here" below it.

Then log in at any time at <https://www.capturemymtg.com/auth/login>.

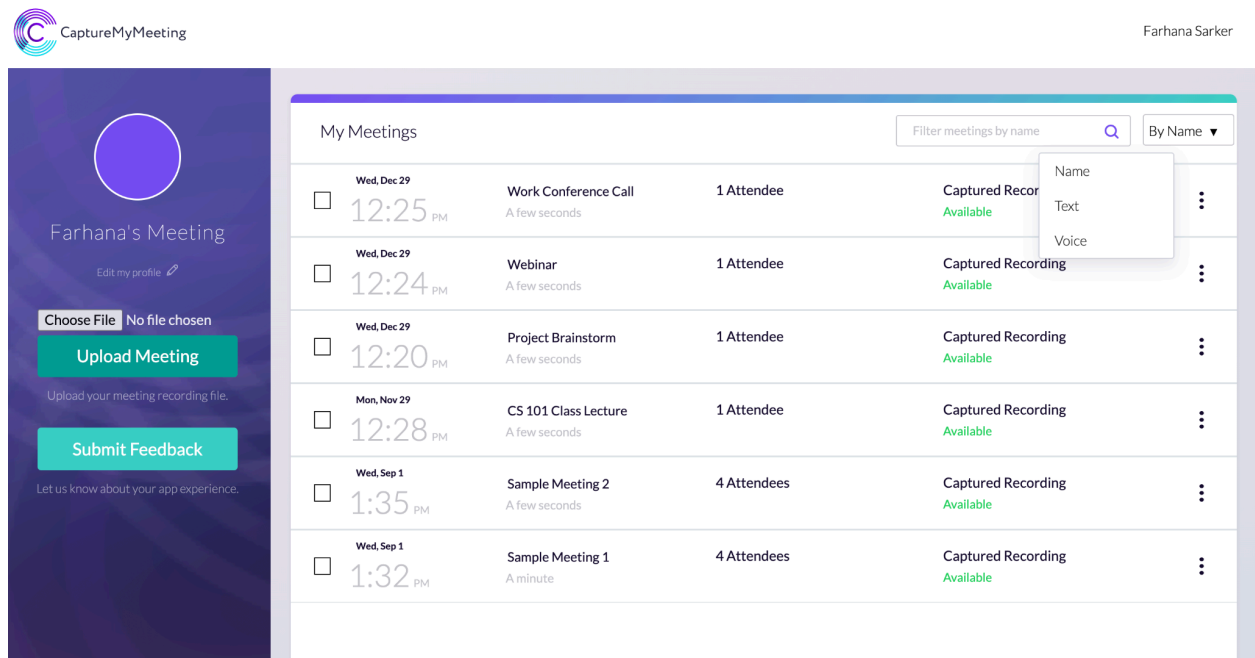

Upload Your Meeting Recordings

Upload your meeting recordings using the "Upload Video" button on the left side panel. Meeting recordings must be in MP4 or M4A format. Once your recording is uploaded, CaptureMyMeeting will automatically index it, making its audio and written content searchable.

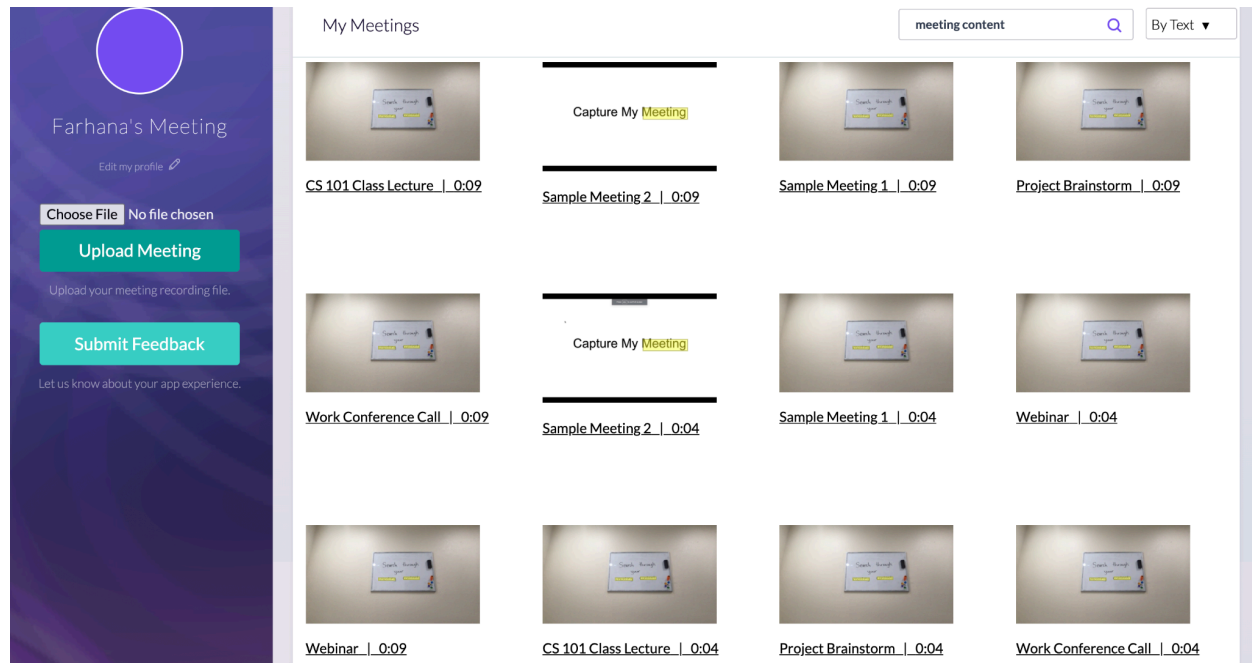

Search Through Your Meeting Content

CaptureMyMeeting offers three methods of searching through your meetings: Search by Name, Search by Text, and Search by Voice.

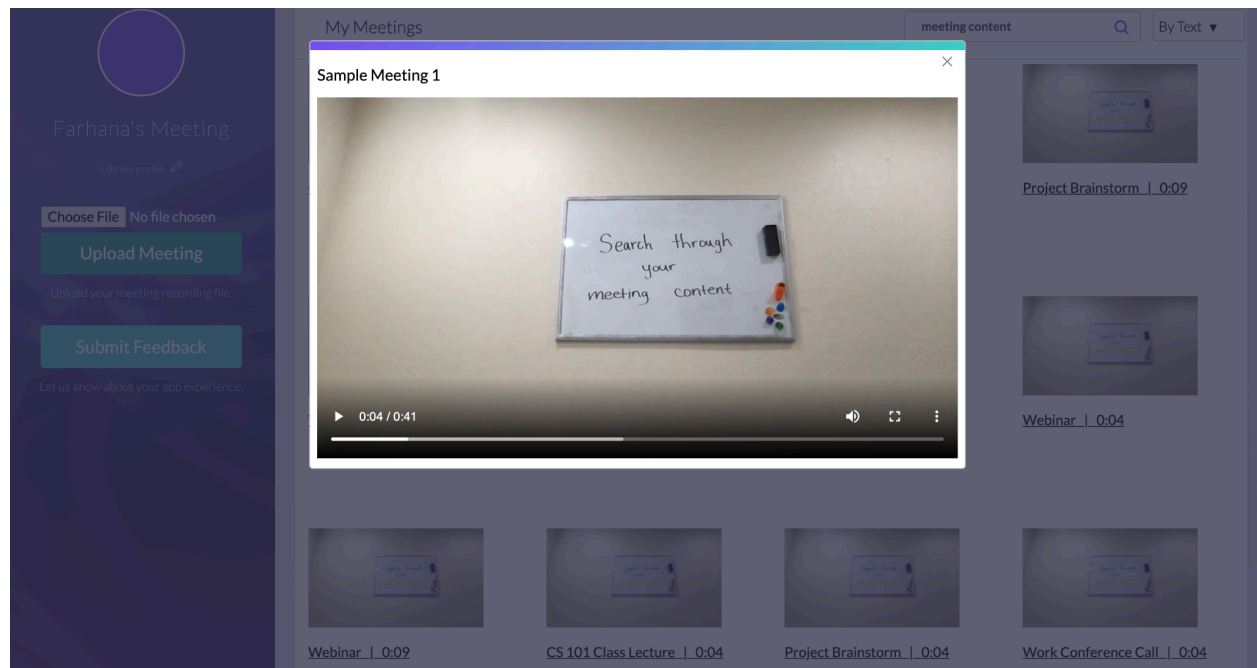

Text Search

CaptureMyMeeting indexes the video content of your meeting recordings, using AI to detect and recognize text within your video frames. Click on the drop-down next to the search bar at the top of the page and select "Text". Then, search through anything that was written and shared during your meeting, e.g. on a whiteboard or powerpoint. Search results will include images from your recording displaying your searched content, highlighted, along with the corresponding timestamps at which they appeared in the recording.

Clicking on a search result timestamp will take you to your video, already seeked to the timestamp.

Voice Search

CaptureMyMeeting also indexes the audio content of your meetings. Click on the drop-down next to the search bar at the top of the page and select "Voice". Then, search through anything that was discussed during your meeting. Search results will include the matched audio content with the search query bolded within, along with the corresponding timestamp at which the content was heard.

Search within a Meeting

The search feature will search across all of your meetings by default. To search within a single meeting, click on the three dots on the right-hand side of the meeting card that you would like to select, then click “Search Meeting” from the options. Then, all search results displayed afterward will pertain only to that meeting. Easily remove the meeting filter by clicking the “Remove Filter” box that appears next to the title of the page.

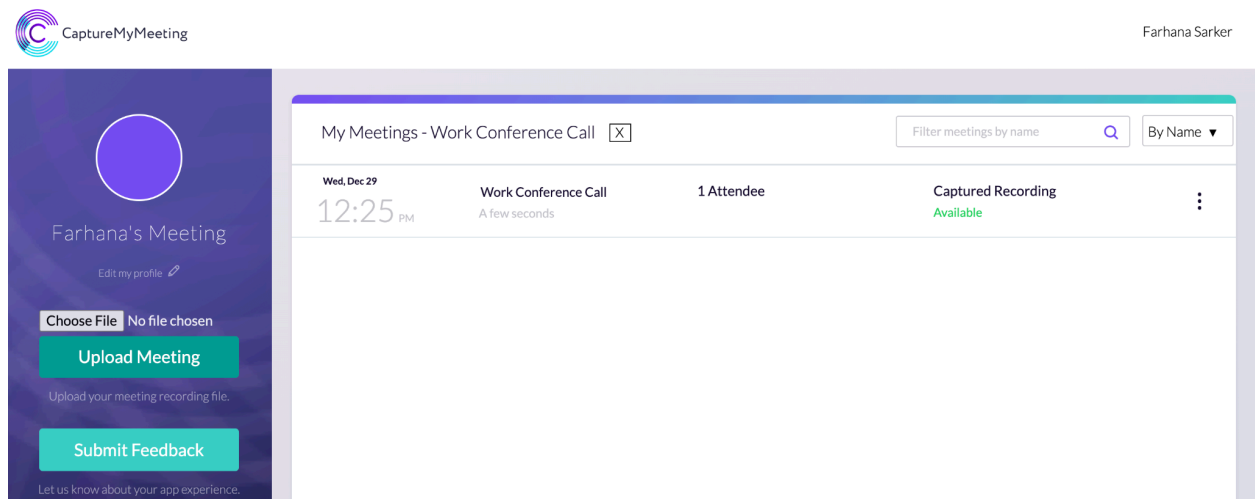

Select a Single Meeting:

The screenshot shows the CaptureMyMeeting web interface. On the left is a sidebar with a purple header, a circular profile picture placeholder, the text 'Farhana's Meeting', an 'Edit my profile' link, a 'Choose File' button with 'No file chosen' text, and an 'Upload Meeting' button. The main content area is titled 'My Meetings' and has a search bar with the placeholder 'Filter meetings by name' and a 'By Name' dropdown. Below the header is a table of meetings:

Date	Meeting Name	Duration	Shared With	Recording Status	Actions
Sun, Jan 1	Webinar	A few seconds	Shared With: 0	Captured Recording Available	⋮
Wed, Oct 26 2022	Graphics Lecture	An hour	Shared With: 0	Captured Recording Available	⋮

A dropdown menu is open for the 'Webinar' meeting, showing the following options: Delete, Search Meeting, and Submit feedback.

The screenshot shows the CaptureMyMeeting web interface after selecting a single meeting. The sidebar is identical to the previous screenshot. The main content area is titled 'My Meetings - Work Conference Call' with a close button (X). The search bar is the same. Below the header is a table with one meeting:

Date	Meeting Name	Attendees	Recording Status	Actions
Wed, Dec 29	Work Conference Call	1 Attendee	Captured Recording Available	⋮

Get AI-Generated Meeting Notes

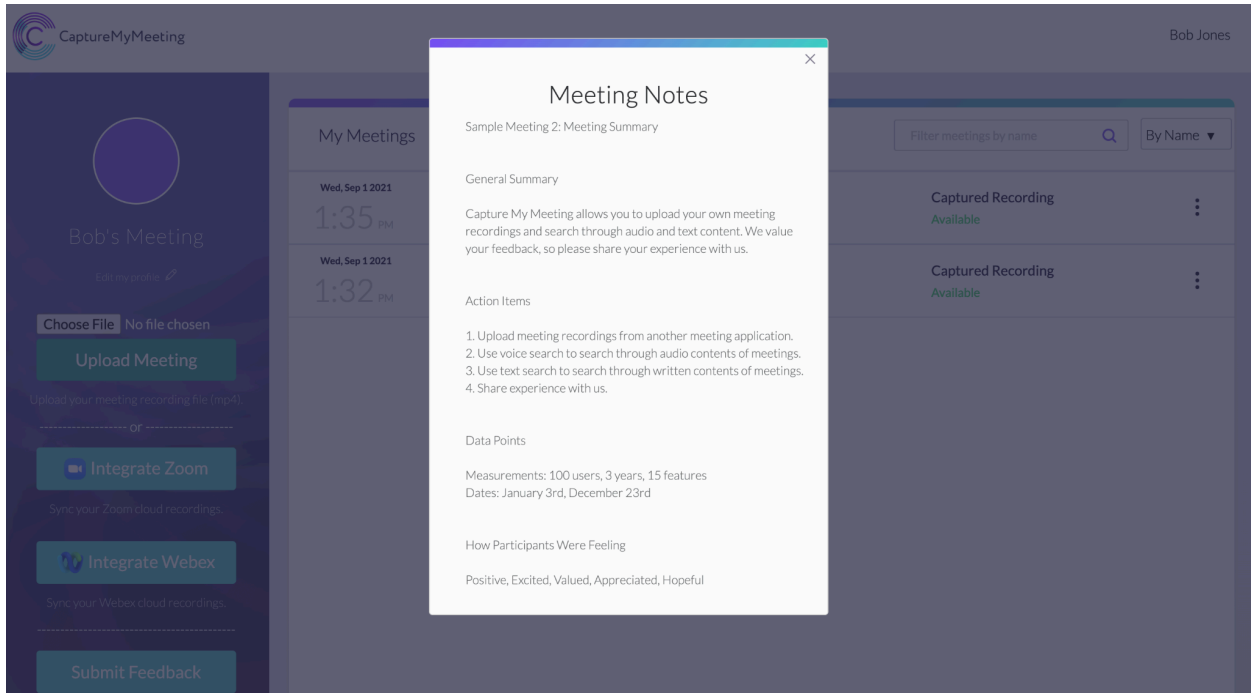

After uploading your meeting recording, or importing your recording with one of our [integrations](#), CaptureMyMeeting will generate meeting notes for you shortly afterward using OpenAI’s GPT-3.

To access the meeting notes, click on the three dots to the right of a meeting card, and choose “Notes” from the options.

My Meetings

A modal should appear containing meeting notes generated using OpenAI's GPT-3 models. View meeting summaries and extracted action items, data points, and sentiments.

Meeting Notes

Sample Meeting 2: Meeting Summary

General Summary

Capture My Meeting allows you to upload your own meeting recordings and search through audio and text content. We value your feedback, so please share your experience with us.

Action Items

1. Upload meeting recordings from another meeting application.
2. Use voice search to search through audio contents of meetings.
3. Use text search to search through written contents of meetings.
4. Share experience with us.

Data Points

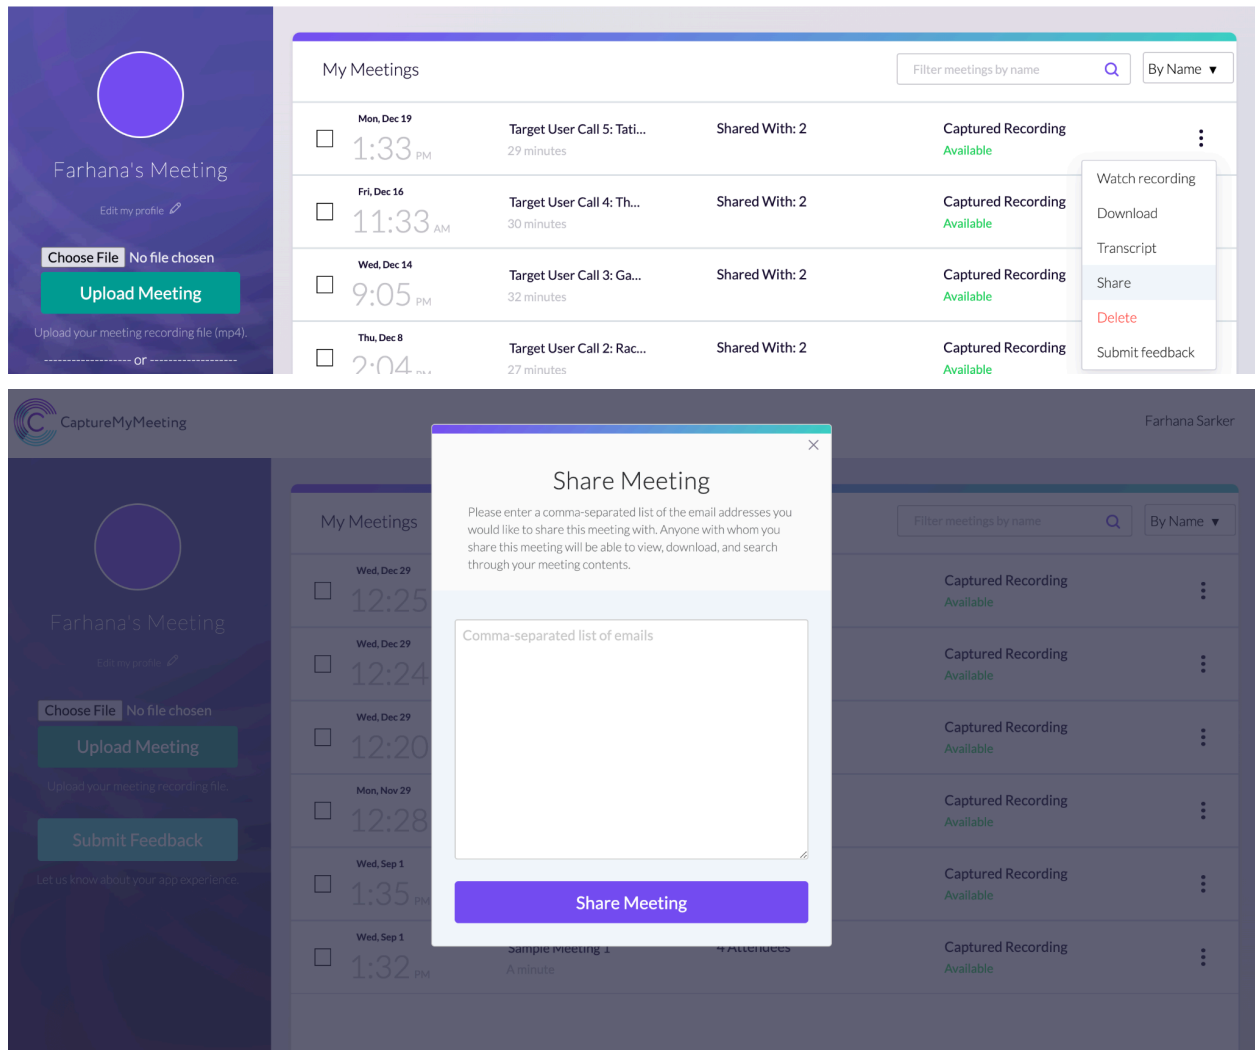

Measurements: 100 users, 3 years, 15 features
Dates: January 3rd, December 23rd

How Participants Were Feeling

Positive, Excited, Valued, Appreciated, Hopeful

Share Your Meeting Content

Use our “Share” feature to share your meeting content with anyone. Simply submit a comma-separated list of emails via the Share Modal. Once the people you have shared your content with have made an account on CaptureMyMeeting (with the same email address that the content was shared with), they will be able to view, download, and search through your meeting recording.

Integrations

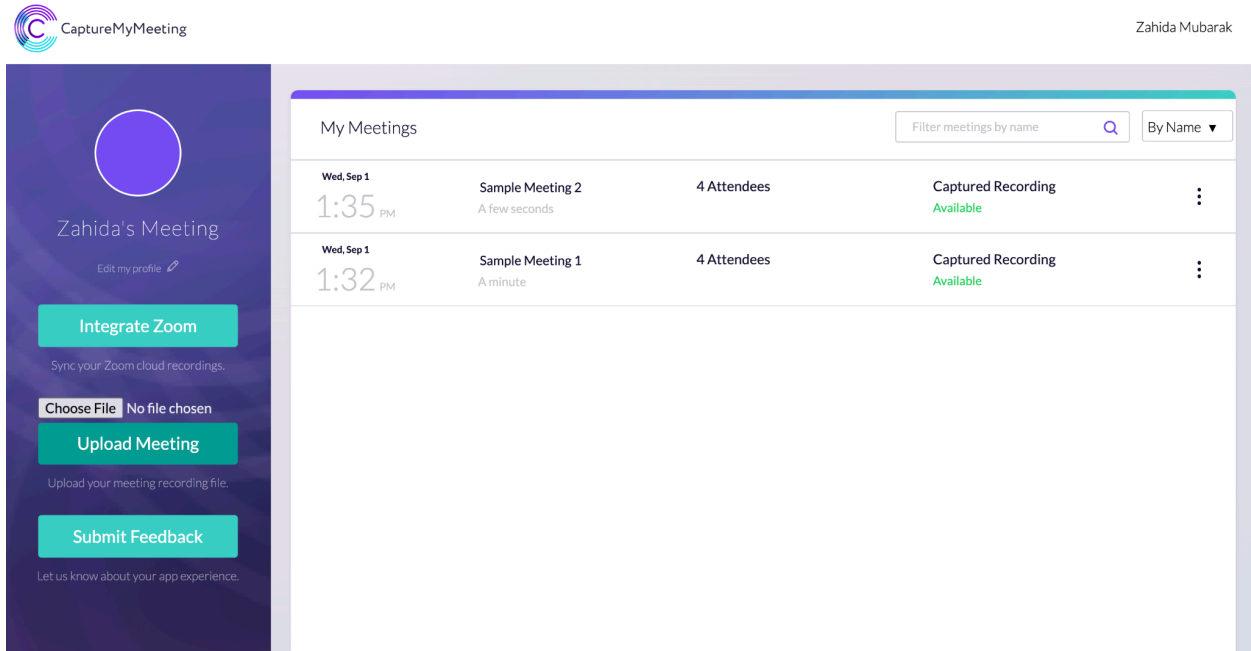

To allow you to more easily import and index your meeting content, CaptureMyMeeting provides integrations with leading meeting applications.

Zoom Integration

Sync your Zoom account with CaptureMyMeeting. Once your future cloud recordings are ready on Zoom Cloud, CaptureMyMeeting will automatically index them and provide you with their viewable and searchable content shortly afterward. Follow the steps below to integrate Zoom into your CaptureMyMeeting account.

Integrate Zoom: Authorize CaptureMyMeeting to Access Your Zoom Data

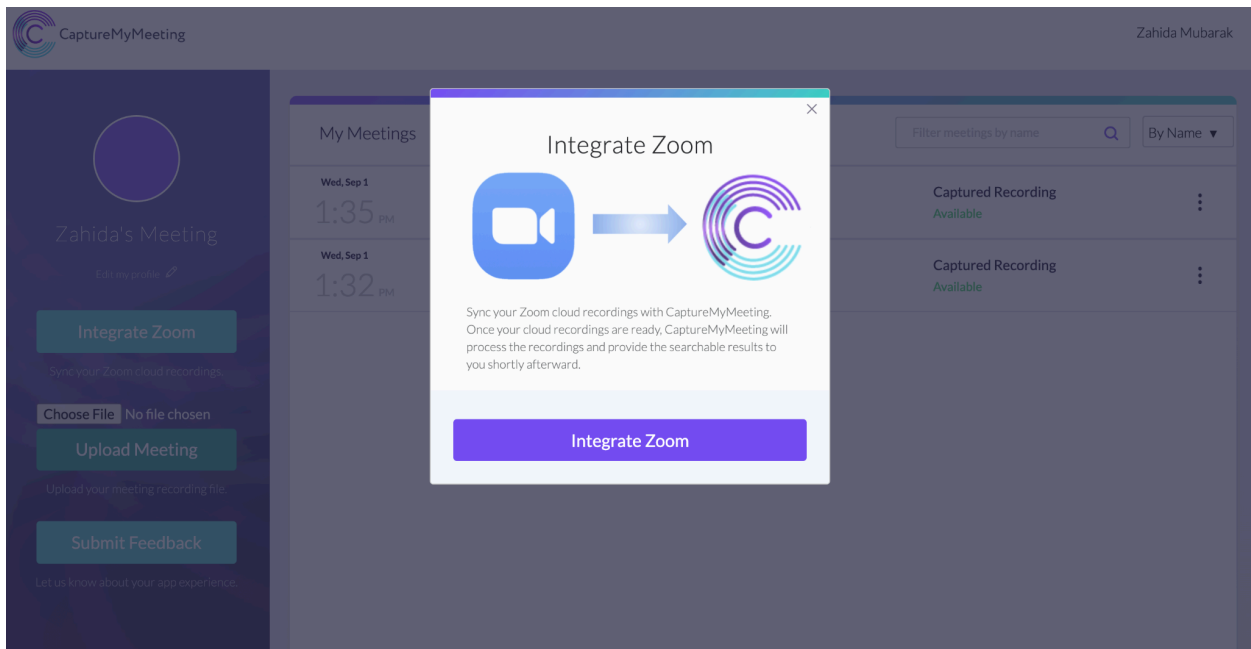

Click on the “Integrate Zoom” button on the left side panel.

The screenshot shows the CaptureMyMeeting dashboard. On the left sidebar, there is a profile section for 'Zahida's Meeting' with a circular profile picture placeholder. Below this, there are several buttons: 'Integrate Zoom' (highlighted in red), 'Choose File' (with 'No file chosen' text), 'Upload Meeting', and 'Submit Feedback'. The main content area is titled 'My Meetings' and contains a table with two rows of meeting data. Each row shows a date and time, a meeting name, the number of attendees, and a status for the captured recording.

My Meetings			
Filter meetings by name <input type="text"/>			
By Name ▼			
Wed, Sep 1 1:35 PM	Sample Meeting 2 A few seconds	4 Attendees	Captured Recording Available
Wed, Sep 1 1:32 PM	Sample Meeting 1 A minute	4 Attendees	Captured Recording Available

A modal will appear asking you to begin the authorization process.

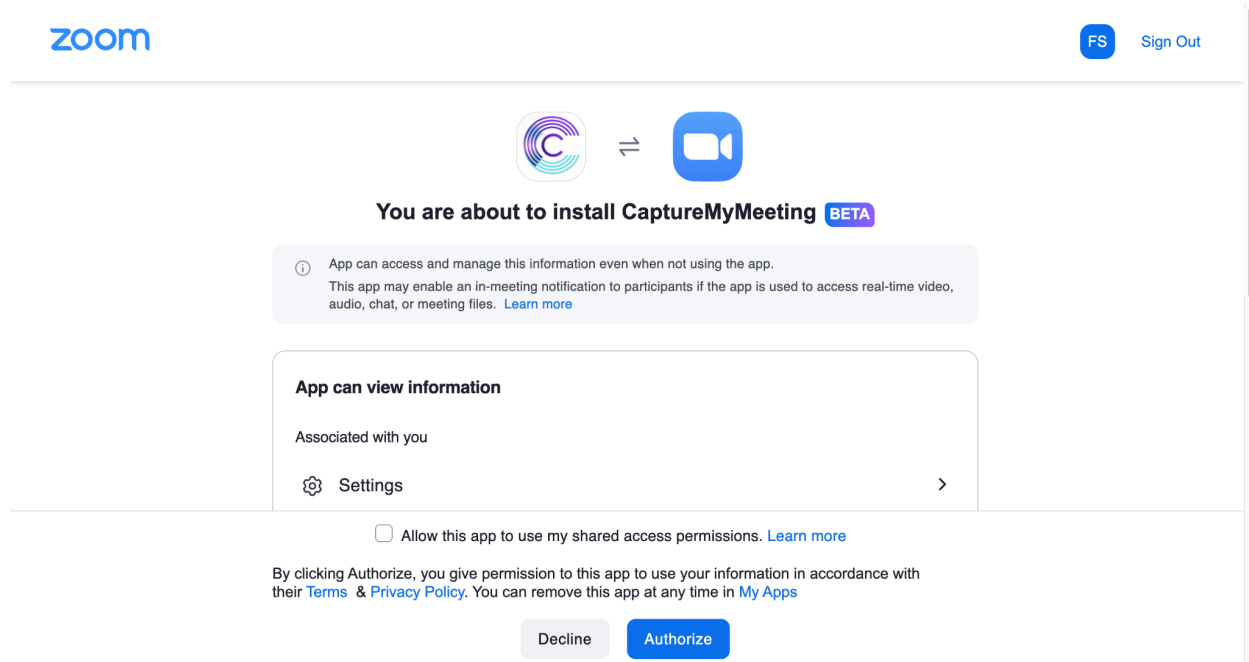

The screenshot shows the same CaptureMyMeeting dashboard as before, but with the 'Integrate Zoom' modal open in the center. The modal has a title 'Integrate Zoom' and a close button (X). It features a graphic of a Zoom camera icon pointing to the CaptureMyMeeting logo. Below the graphic, there is a paragraph of text explaining the integration process. At the bottom of the modal is a large red button labeled 'Integrate Zoom'.

Integrate Zoom

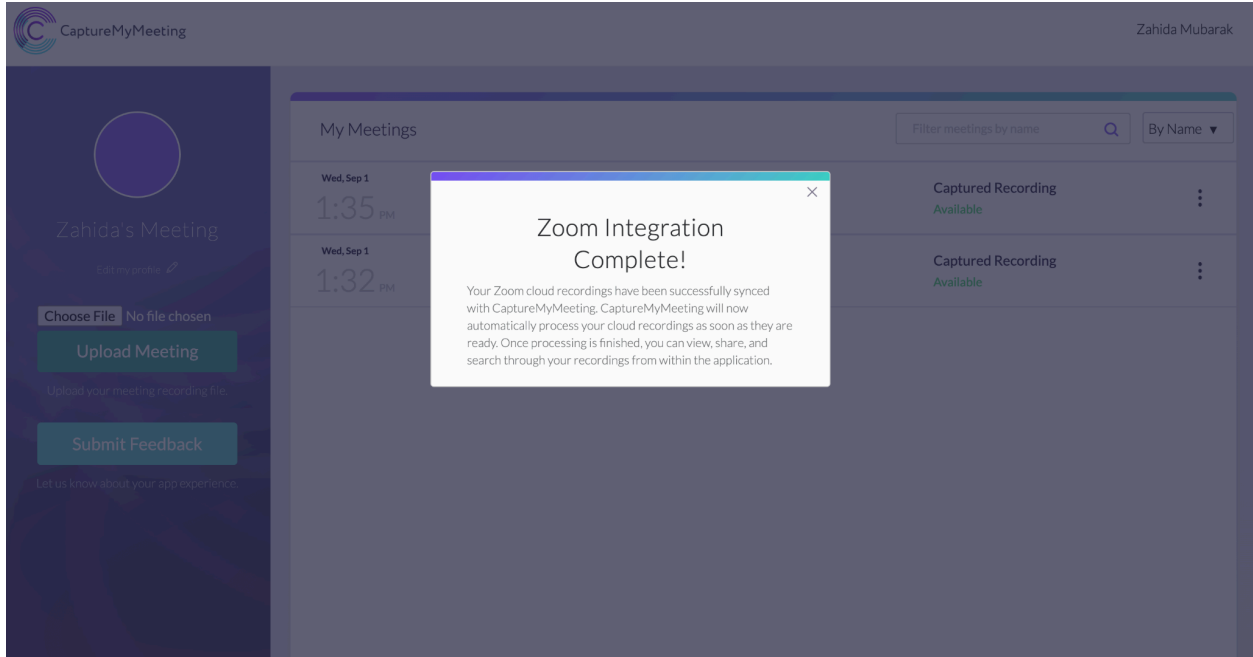

Sync your Zoom cloud recordings with CaptureMyMeeting. Once your cloud recordings are ready, CaptureMyMeeting will process the recordings and provide the searchable results to you shortly afterward.

Integrate Zoom

After you click “Integrate Zoom” on the modal, you will be redirected to Zoom’s authorization page, where you can either authorize us to access your Zoom data, or decline.

Once you have authorized us successfully, any Zoom cloud recording you create going forward will be automatically indexed by CaptureMyMeeting as soon as it is ready on Zoom Cloud. Once indexing is finished, you can view your searchable content through the CaptureMyMeeting application.

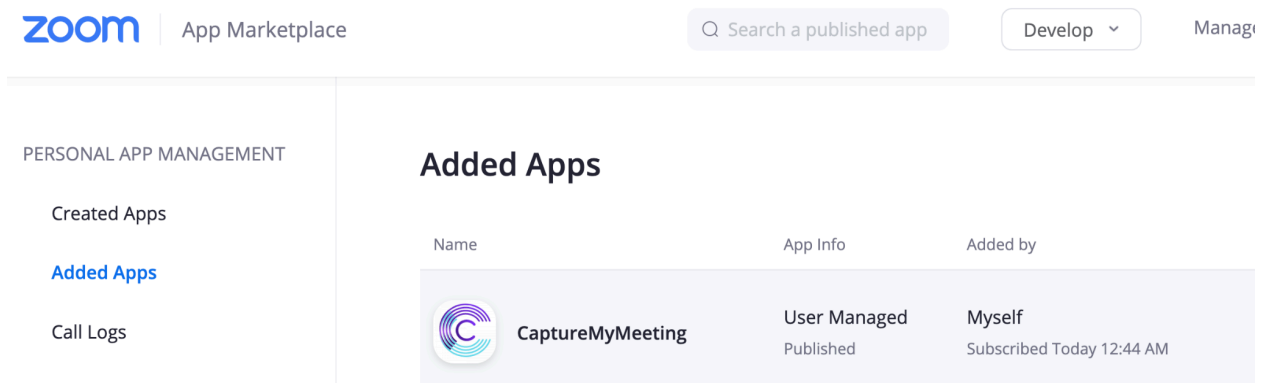

Note: If the above success modal does not appear, contact support@capturemymeeting.com for assistance.

Remove Zoom Integration: Deauthorize CaptureMyMeeting from Accessing Your Zoom Data

To deauthorize CaptureMyMeeting from accessing your Zoom data, perform the following steps:

1. Navigate to [Zoom App Marketplace](#) and log into your Zoom account.
2. Click “Manage” at the top right of the page.
3. Click “Added Apps” on the left side panel. CaptureMyMeeting should appear within the list of your added apps.

- Click the “Remove” button next to the CaptureMyMeeting application, then complete the steps that follow. Once you have done so, CaptureMyMeeting will no longer have access to your future Zoom cloud recordings or any of your other Zoom data.

Added Apps

Q Search

Name	App Info	Added by	Shared Access Permissions	
 CaptureMyMeeting	User Managed Published	Myself Subscribed Today 12:44 AM	Not Authorized update	Remove

The next time you visit the CaptureMyMeeting application, you will see the “Integrate Zoom” button reappear on the left side panel. If you ever want to integrate Zoom again, simply click this button and complete the authorization process.

Webex by Cisco Integration

CaptureMyMeeting is an AI-driven meeting productivity tool that keeps track of your meeting content for you so that you can more easily find, review, and act on the collected knowledge from your meetings. Get meeting notes and transcripts. The application will also make the spoken and written content of your meeting recordings searchable. To make this process smooth and seamless for your Webex recordings, CaptureMyMeeting provides a Webex integration.

Sync your Webex account with CaptureMyMeeting. Then, any Webex cloud recording you create going forward will be automatically imported and processed by CaptureMyMeeting. Once CaptureMyMeeting processes your Webex recording, you can then:

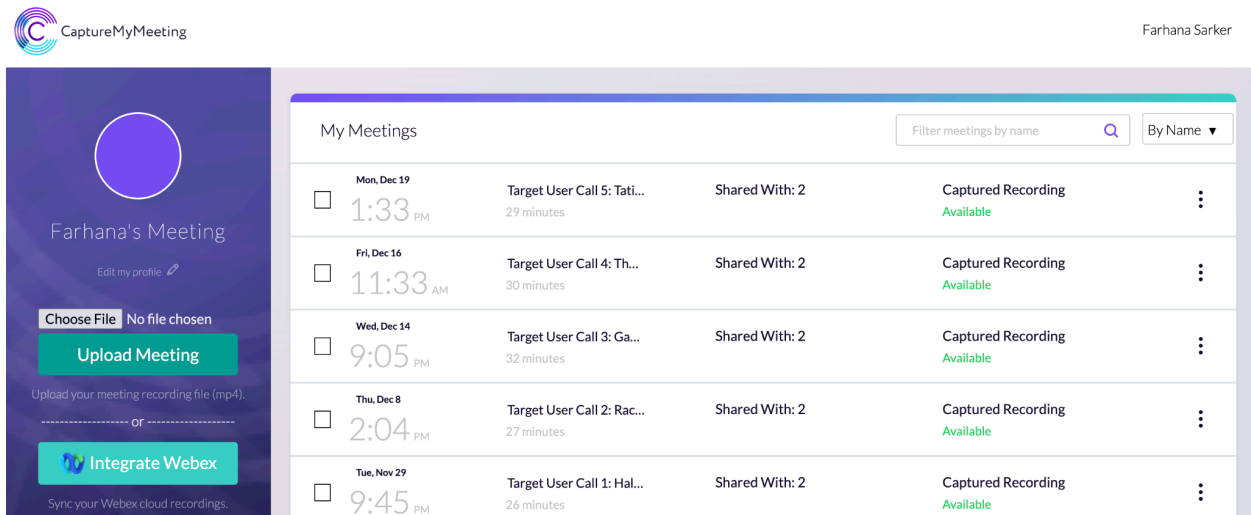

- Search through anything that was spoken or written (e.g. on a whiteboard, powerpoint, etc.) during your meeting.
- View your highlighted queries within matched video frames or portions of the transcript.
- Automatically playback your meeting recording from the matched timestamps.
- Get automatic AI-generated meeting notes.
- Download your meeting recording.
- Download a full speaker-labeled transcript.
- Automatically share your processed meeting content (notes, transcripts, searchable content, etc.) with meeting participants.
- Share your processed meeting content with others who could not join the meeting.

Follow the steps below to integrate Webex into your CaptureMyMeeting account.

Integrate Webex

In order to integrate Webex, you must authorize CaptureMyMeeting to access some of your Webex data. Follow the steps below to do that.

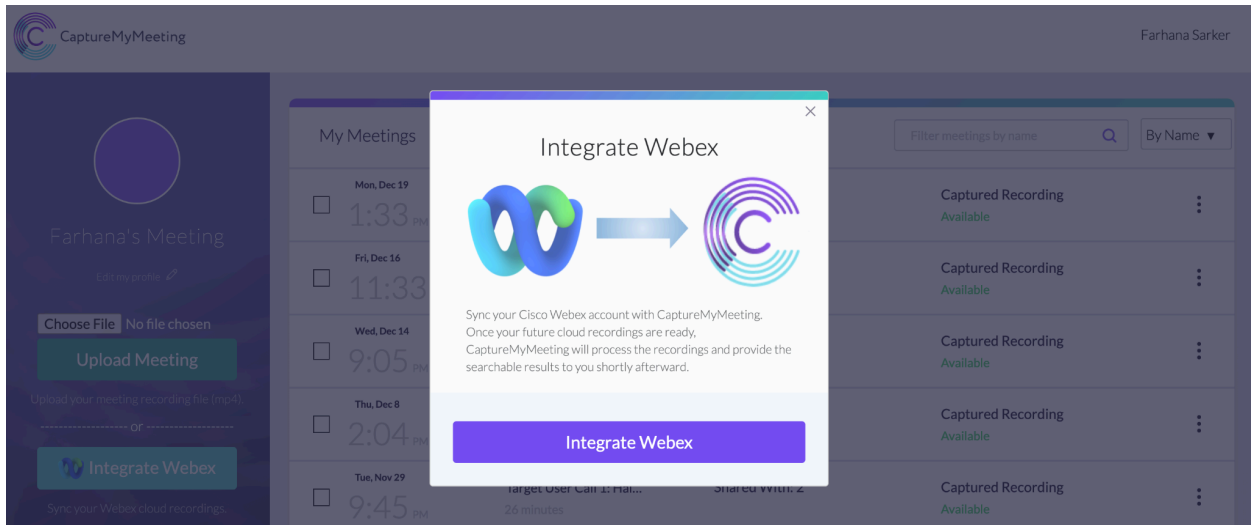

1. Navigate to the homepage. Click on the “Integrate Webex” button on the left side panel. A modal will appear asking you to begin the authorization process.

The screenshot shows the CaptureMyMeeting homepage. On the left sidebar, there is a profile section for 'Farhana's Meeting' with an 'Integrate Webex' button. The main area displays a table of meetings.

My Meetings				
<input type="checkbox"/>	Mon, Dec 19 1:33 PM 29 minutes	Target User Call 5: Tati...	Shared With: 2	Captured Recording Available
<input type="checkbox"/>	Fri, Dec 16 11:33 AM 30 minutes	Target User Call 4: Th...	Shared With: 2	Captured Recording Available
<input type="checkbox"/>	Wed, Dec 14 9:05 PM 32 minutes	Target User Call 3: Ga...	Shared With: 2	Captured Recording Available
<input type="checkbox"/>	Thu, Dec 8 2:04 PM 27 minutes	Target User Call 2: Rac...	Shared With: 2	Captured Recording Available
<input type="checkbox"/>	Tue, Nov 29 9:45 PM 26 minutes	Target User Call 1: Hal...	Shared With: 2	Captured Recording Available

2. Click the “Integrate Webex” button on the modal. Then, you will be redirected to Webex’s authorization page, where you can either authorize us to access your Webex data, or decline.

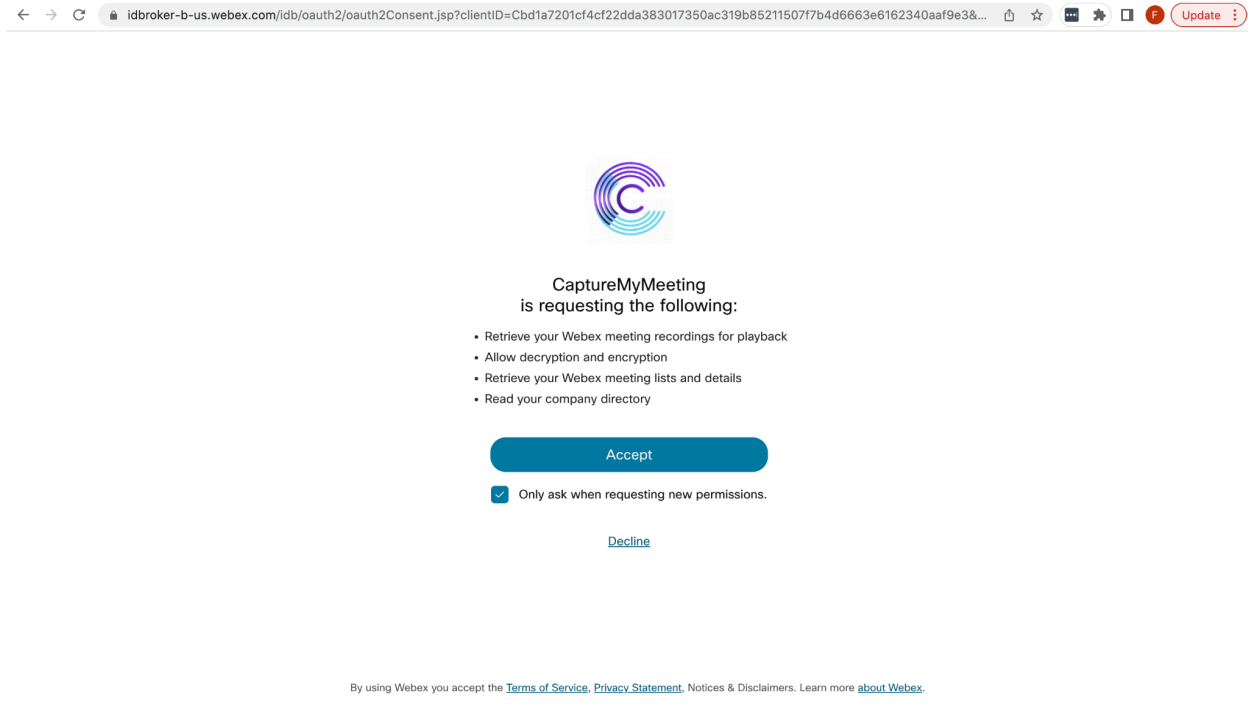

The screenshot shows the same CaptureMyMeeting homepage, but with the 'Integrate Webex' modal open. The modal contains the following text:

Integrate Webex

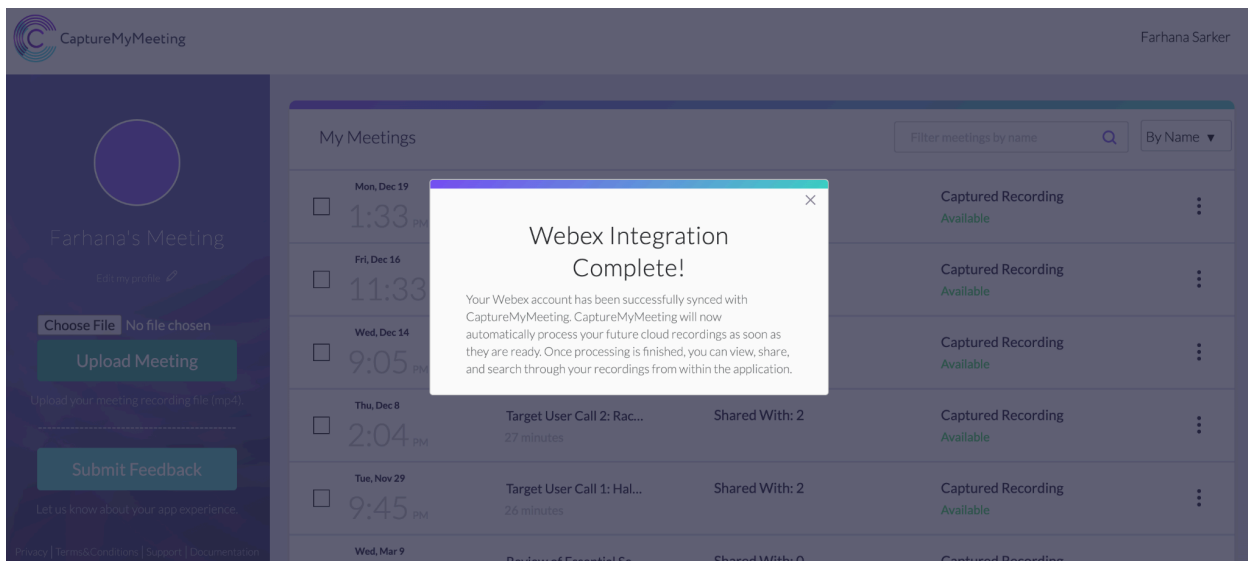

Sync your Cisco Webex account with CaptureMyMeeting. Once your future cloud recordings are ready, CaptureMyMeeting will process the recordings and provide the searchable results to you shortly afterward.

Integrate Webex

3. Click “Accept”. You will then be redirected to CaptureMyMeeting’s homepage.

4. If the authorization was successful, you should see a “Webex Integration Complete!” success modal appear. Now, any Webex cloud recording you create going forward will be automatically imported and indexed by CaptureMyMeeting as soon as it is ready to download. Once indexing is finished, you can view your searchable content through the CaptureMyMeeting application

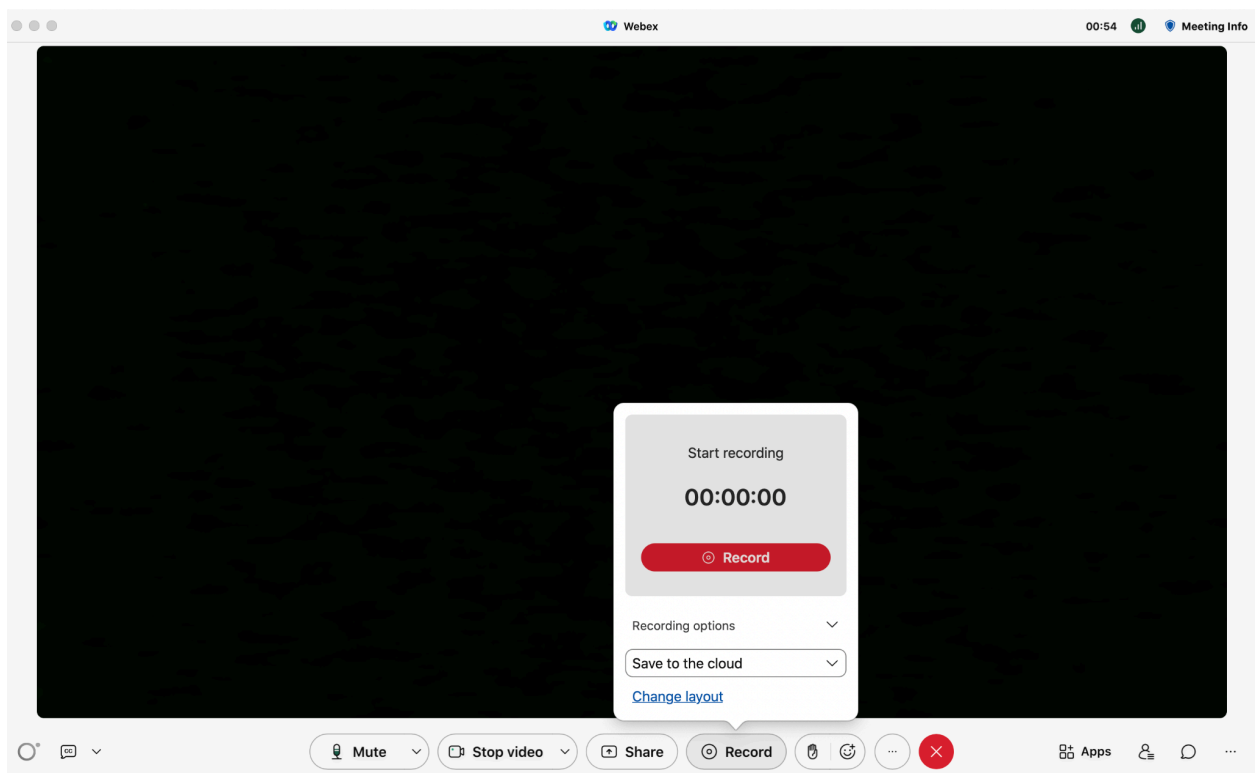

If the success modal does not appear, contact support@capturemymeeting.com for assistance.

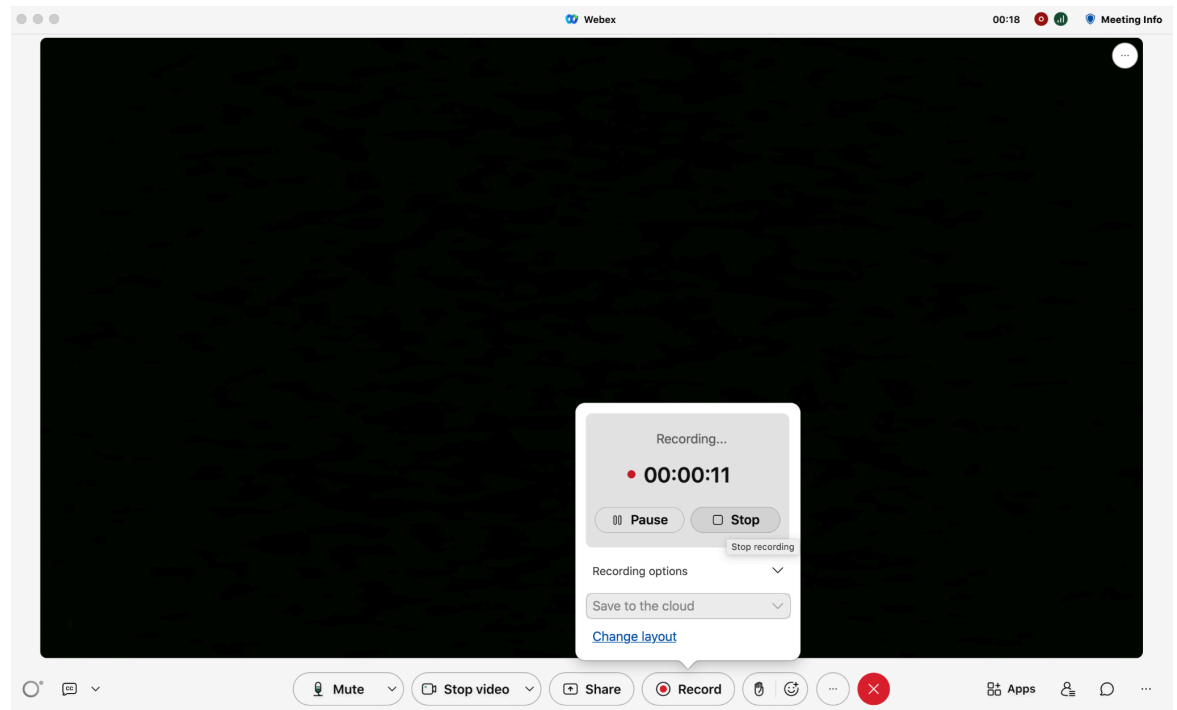

Index and Summarize a Webex Recording with CaptureMyMeeting

After integrating Webex, in order for CaptureMyMeeting to process your Webex cloud recordings, you must record each of the Webex meetings (or portions of the Webex meetings) that you want CaptureMyMeeting to process. Follow the instructions below to do that. Once CaptureMyMeeting has indexed your recording, you can use all of CaptureMyMeeting's features on your recording (search meeting content, get transcript, share meeting content, etc.)

1. Start a Webex meeting.
2. Record the meeting. In order to do so, click the "Record" button on the bottom panel of the meeting application, as shown in the screenshot below. A small modal should appear.

3. In the modal that appears, choose the "Save to the cloud" option in the "Recording options" dropdown menu.
 - a. Note: To be able to save recordings to Webex cloud, your Webex account must be subscribed to at least a [Webex Meet Plan](#).
4. Click the red "Record" button in the modal. Your meeting should begin recording.
 - a. Note: If at any point you want to stop the recording, click the "Record" button again on the bottom panel. In the popup modal that appears, click "Stop". If you want to continue recording, begin recording again as explained above. Each time you record, a separate recording file will be created on your Webex account. CaptureMyMeeting will process all of those recording files.

5. After the meeting is finished, any recording that you created during your meeting will be imported into CaptureMyMeeting and processed shortly after the recording becomes available to view within your Webex account. Once processing is done, you should be able to use all of CaptureMyMeeting's features with your meeting recording (search, get transcript, etc.)

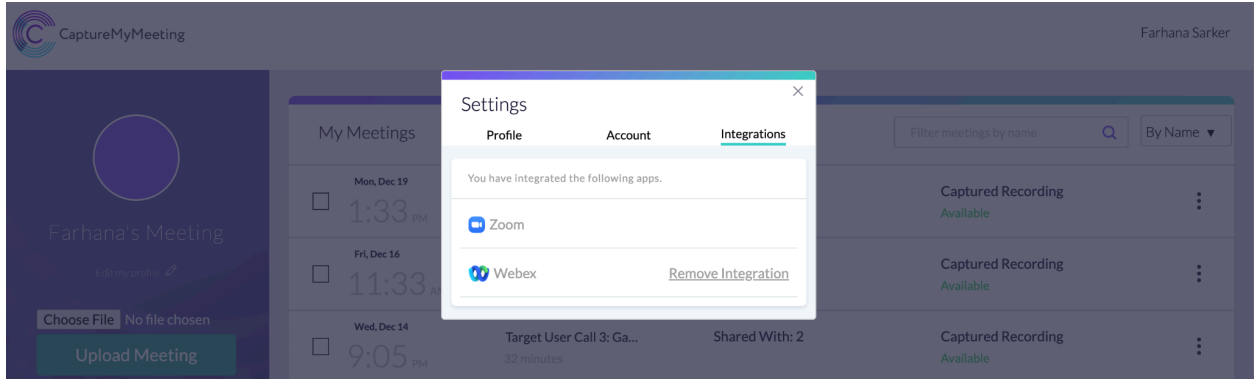

Remove Webex Integration

Remove Integration via the CaptureMyMeeting Portal:

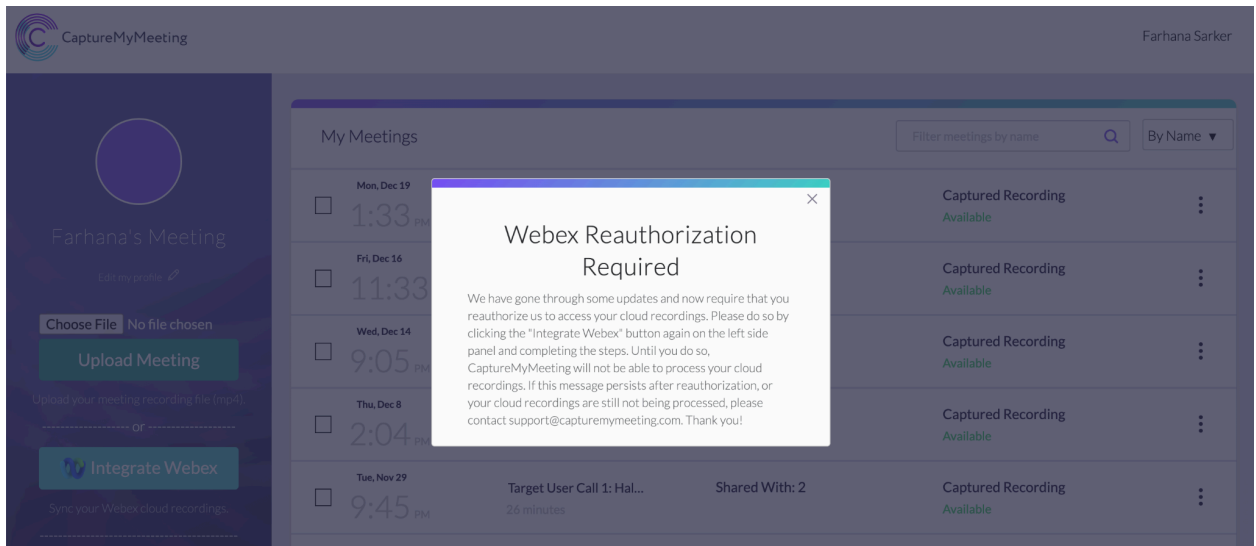

1. Navigate to the CaptureMyMeeting homepage, then hover your cursor over your name at the top right of the page. Click "Settings" from the overflow menu.

2. In the modal that appears, click the "Integrations" panel. Webex should appear within your list of integrations.

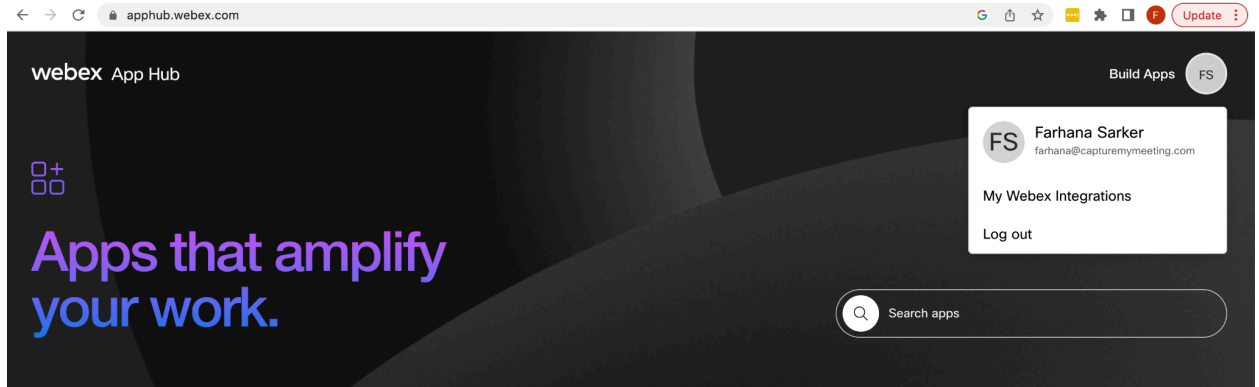

3. Click “Remove Integration” next to Webex.
4. You should now be redirected to the homepage. A modal should appear containing a message telling you that in order for CaptureMyMeeting to process your Webex cloud recordings going forward, you need to complete the authorization process again. You can do so by clicking the “Integrate Webex” button, which should now be reappearing on the left side panel.

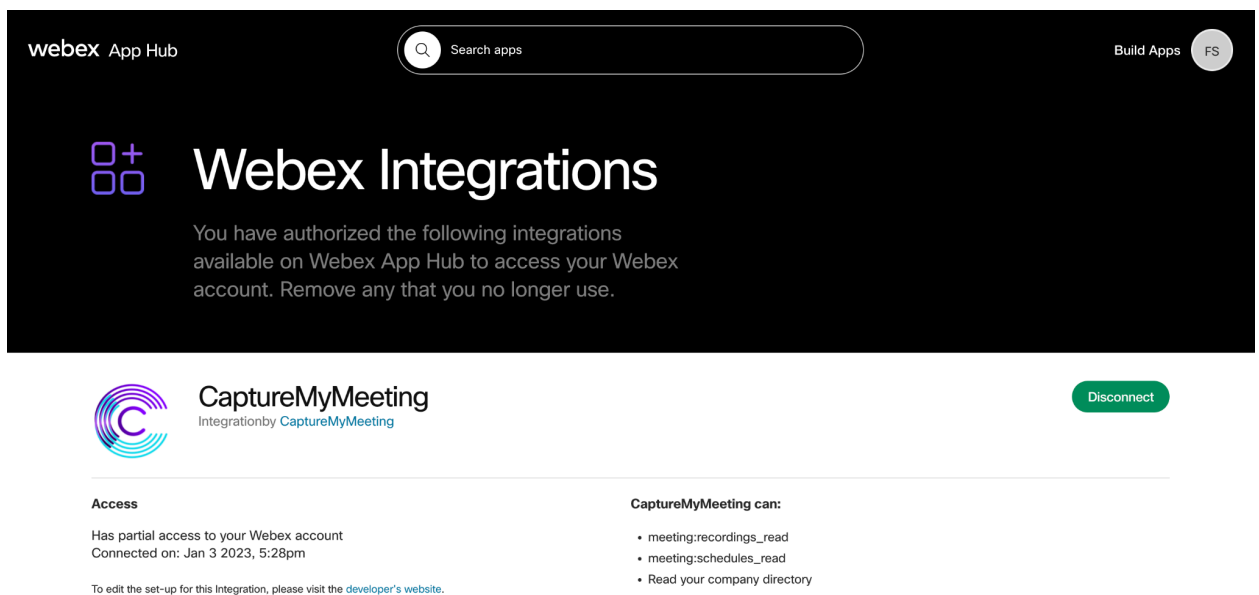

After successfully removing the integration, CaptureMyMeeting will no longer have access to your Webex data.

Remove Integration via Webex App Hub:

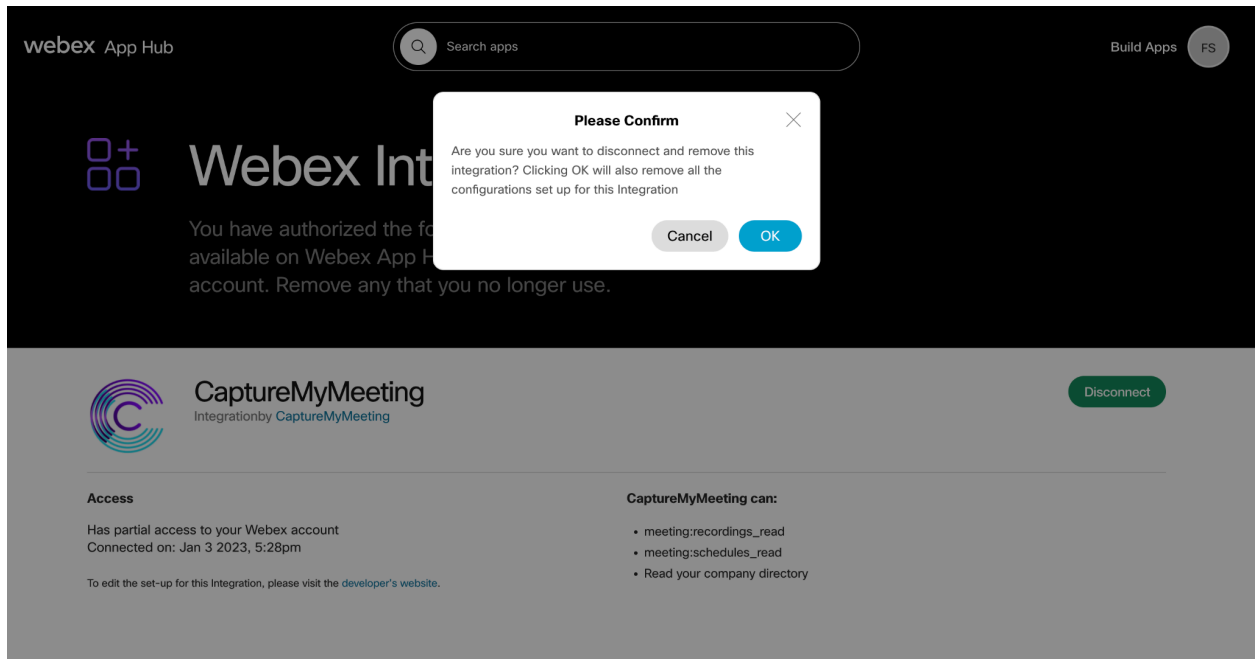

1. Navigate to apphub.webex.com and log into your Webex App Hub account.
2. At the top right of the page, click on your user icon.
3. From the dropdown menu, click on “My Webex Integrations”.

- The CaptureMyMeeting app should show up in your list of integrations. Click the “Disconnect” button to the right of the app.

- A modal should appear telling you that removing the integration will remove all configurations associated with the integration. Click “Ok” on the modal.

6. Your Webex account should now be disconnected from your CaptureMyMeeting account. CaptureMyMeeting will no longer have access to your Webex data. Follow the steps in the [previous section](#) to sync the integration removal with CaptureMyMeeting and to learn how to reintegrate Webex in the future if you would like.

Todoist Integration

CaptureMyMeeting is an AI-driven meeting productivity platform that keeps track of your meeting content for you so that you can more easily find, review, share, and act on the collected knowledge from your meetings. Get meeting notes, including summaries, action items, and sentiment analysis. View full speaker-labeled transcripts. Search through anything that was spoken or written (e.g. on a whiteboard, powerpoint, etc.) during your meeting.

Integrate your Todoist account with CaptureMyMeeting. CaptureMyMeeting will then automatically store all action items that it detects from each of your imported meeting recordings into your personal Todoist inbox going forward. For recordings automatically imported through our Zoom and Webex integrations, action items will only be stored in the meeting host's personal Todoist inbox.

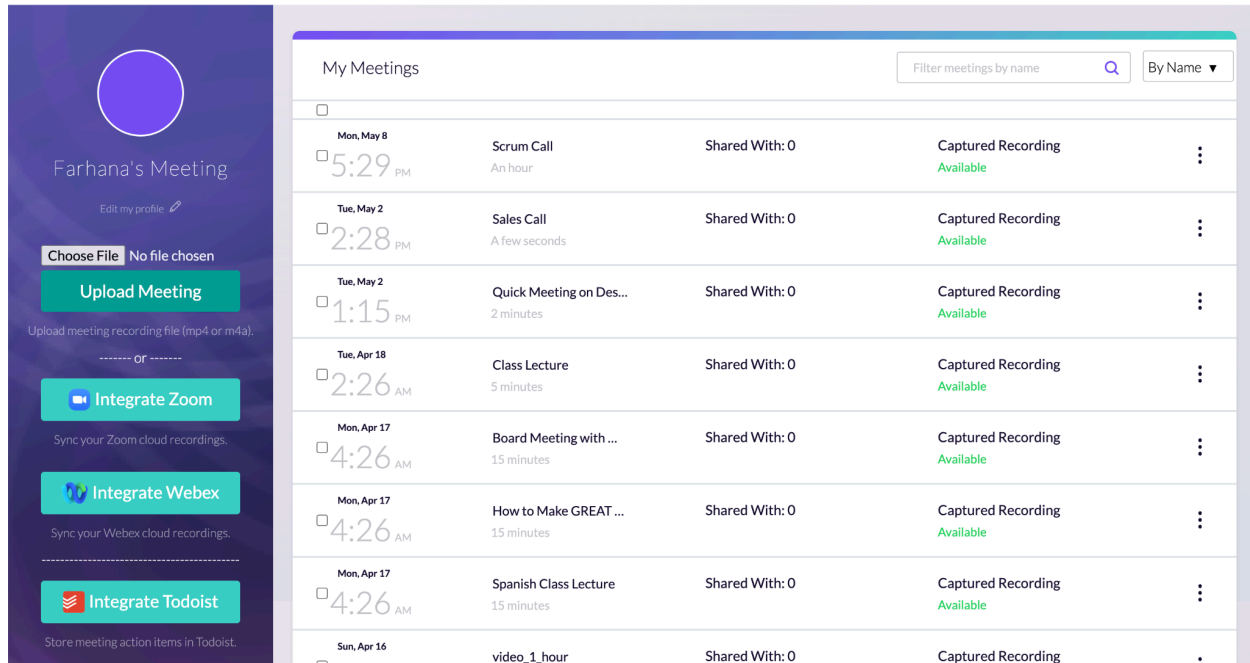

Follow the steps below to integrate Todoist into your CaptureMyMeeting account.

DISCLAIMER: This application is not created by, affiliated with, or supported by Doist.

Integrate Todoist

In order to integrate Todoist, you must authorize CaptureMyMeeting to access some of your Todoist data. Follow the steps below to do that.

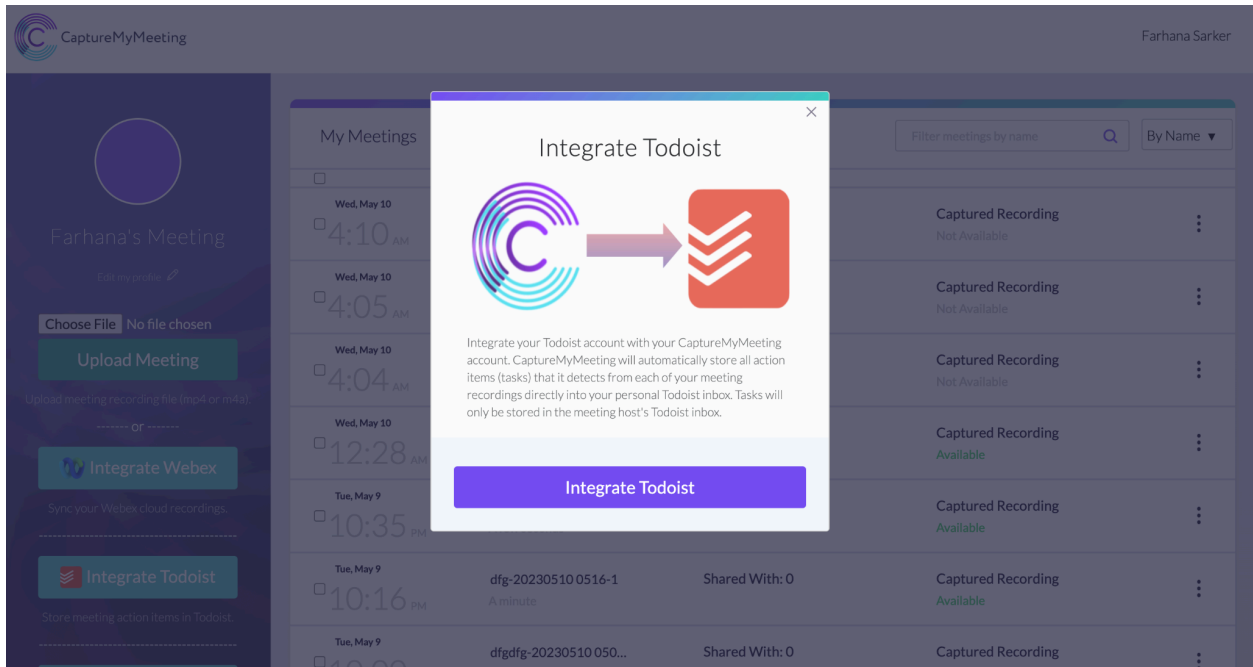

1. Sign into [CaptureMyMeeting](#). Click on the “Integrate Todoist” button on the left side panel of the home page. A modal will appear asking you to begin the authorization process.

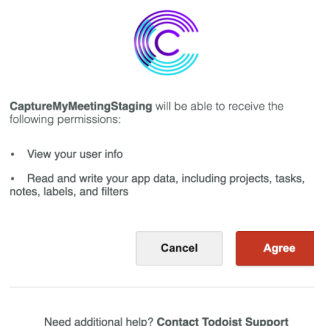

The screenshot displays the CaptureMyMeeting user interface. On the left is a dark purple sidebar for 'Farhana's Meeting', which includes options to 'Upload Meeting', 'Integrate Zoom', 'Integrate Webex', and 'Integrate Todoist'. The main area is titled 'My Meetings' and contains a table of recorded meetings. The table has columns for date, meeting name, duration, share count, recording status, and a menu icon.

My Meetings					
Filter meetings by name				By Name

Sun, Apr 16	video_1_hour		Shared With: 0	Captured Recording	

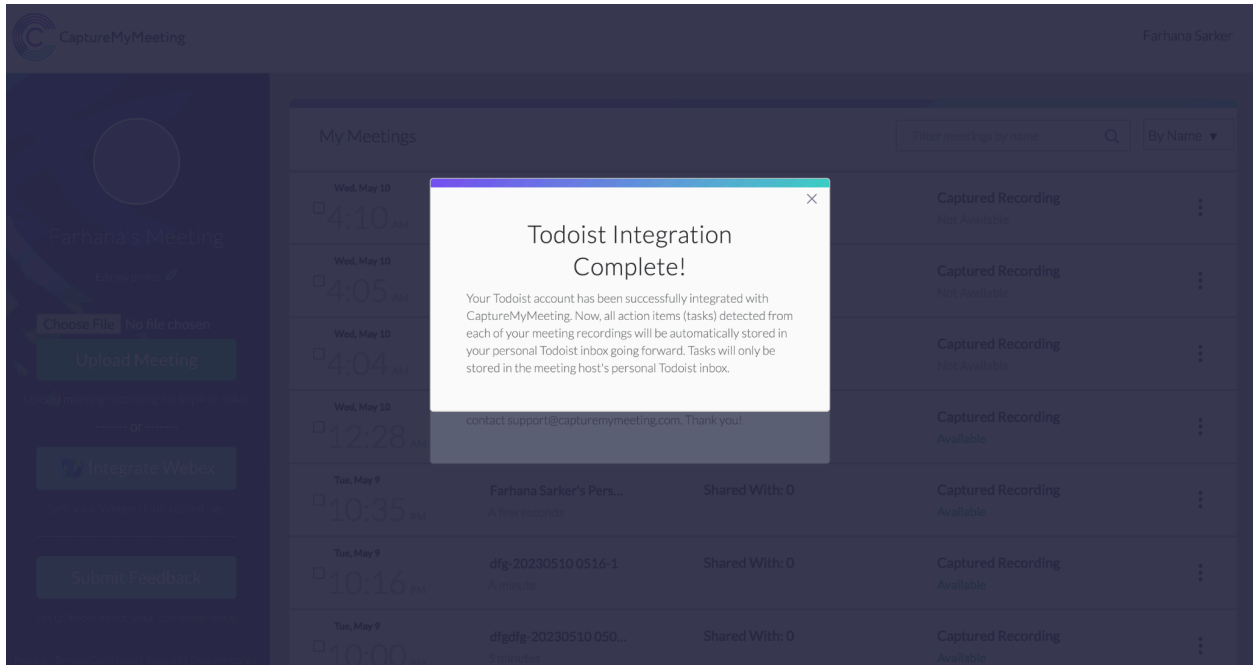

2. Click the “Integrate Todoist” button on the modal. Then, you will be redirected to Todoist’s authorization page, where you can either authorize us to access your Todoist data, or decline.

3. Click “Accept”. You will then be redirected to CaptureMyMeeting’s homepage.

4. If the authorization was successful, you should see a “Todoist Integration Complete!” success modal appear. Now, CaptureMyMeeting will store all action items that it detects from your meeting recordings into your personal Todoist inbox going forward.

If the success modal does not appear, please contact support@capturemymeeting.com for assistance.

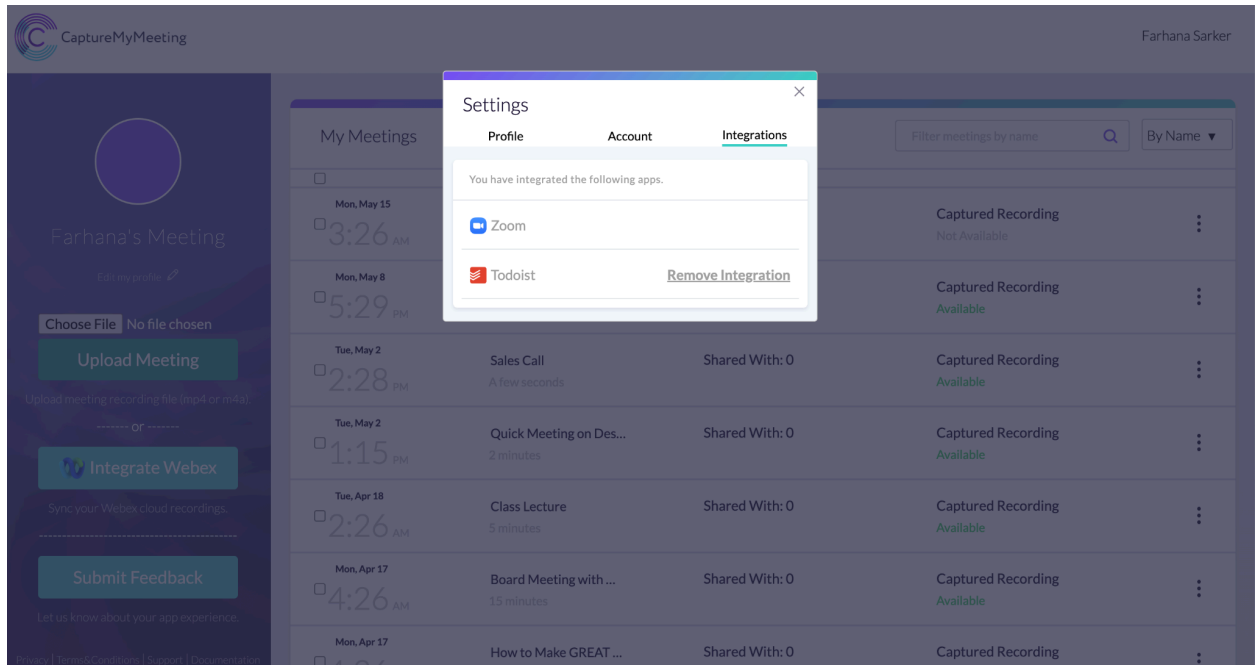

Remove Todoist Integration

Remove Todoist Integration via the CaptureMyMeeting Portal:

5. Navigate to the CaptureMyMeeting homepage, then hover your cursor over your name at the top right of the page. Click “Settings” from the overflow menu.

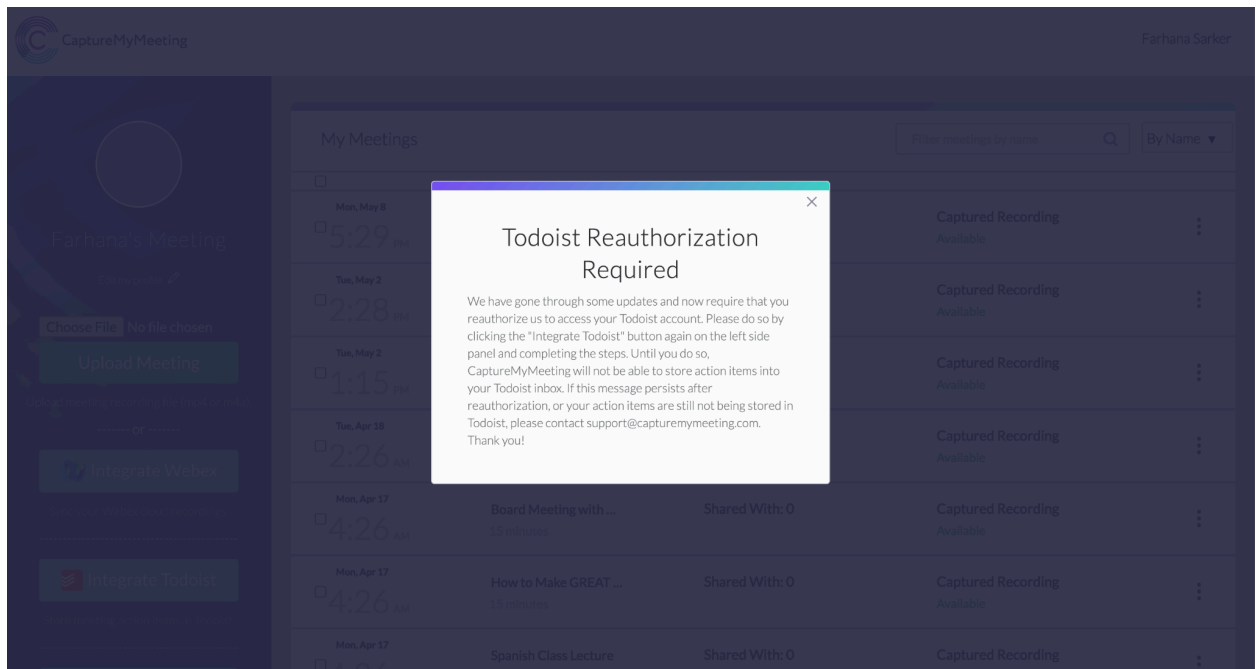

6. In the modal that appears, click the “Integrations” panel. Todoist should appear within your list of integrations.

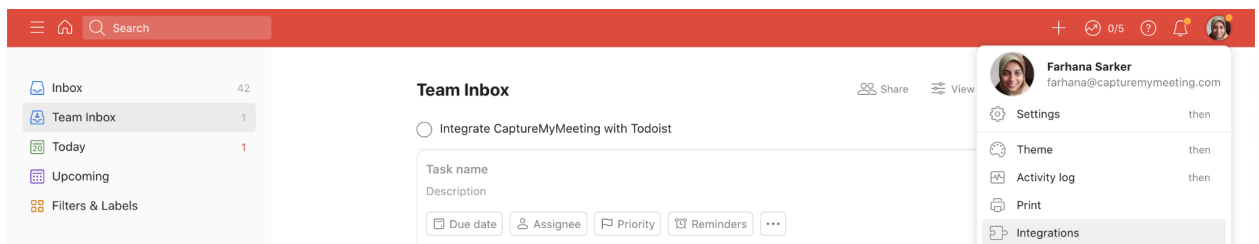

7. Click “Remove Integration” next to Todoist.
8. You should now be redirected to the homepage. A modal should appear containing a message telling you that in order for CaptureMyMeeting to store action items in your Todoist inbox going forward, you need to complete the authorization process again. You can do so by clicking the “Integrate Todoist” button, which should now be reappearing on the left side panel.

After successfully removing the integration, CaptureMyMeeting will no longer have access to your Todoist data.

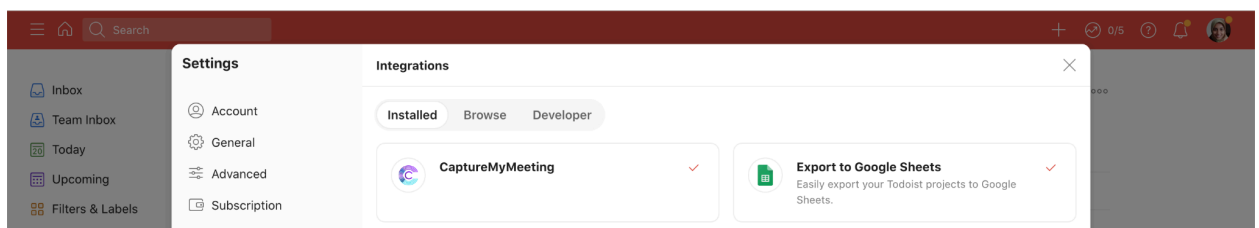

Remove Todoist Integration via the Todoist App:

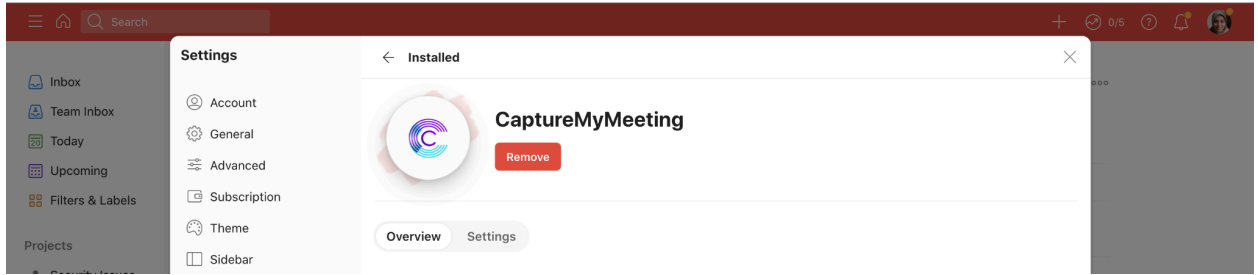

7. Navigate to <https://todoist.com/> and log into your Todoist account.
8. At the top right of the page, click on your user icon.
9. From the dropdown menu, click on "Integrations".

10. The CaptureMyMeeting app should show up in your list of integrations. Click on the CaptureMyMeeting app within the list.

11. Click the "Remove" button under the CaptureMyMeeting name.

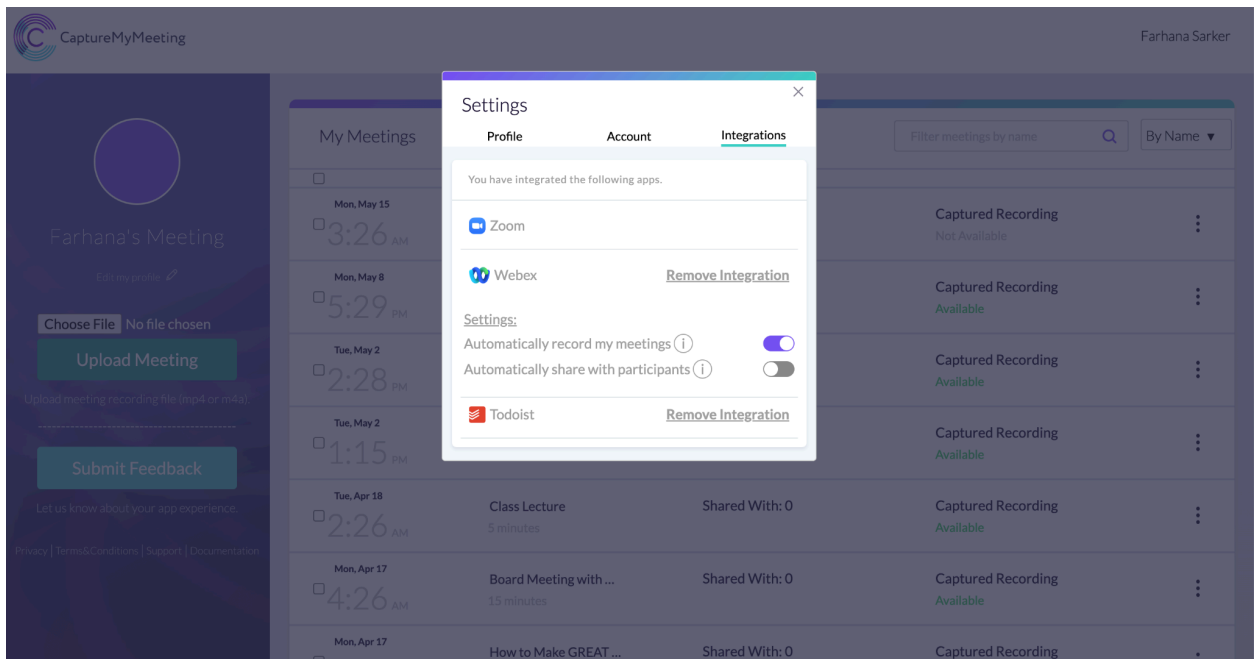

12. Your Todoist account should now be disconnected from your CaptureMyMeeting account. CaptureMyMeeting will no longer have access to your Todoist data.

View Your Current Integrations

1. Navigate to the CaptureMyMeeting homepage, then hover your cursor over your name at the top right of the page. Click “Settings” from the overflow menu.

2. In the modal that appears, click the “Integrations” panel. A list of your integrations should appear within the panel.

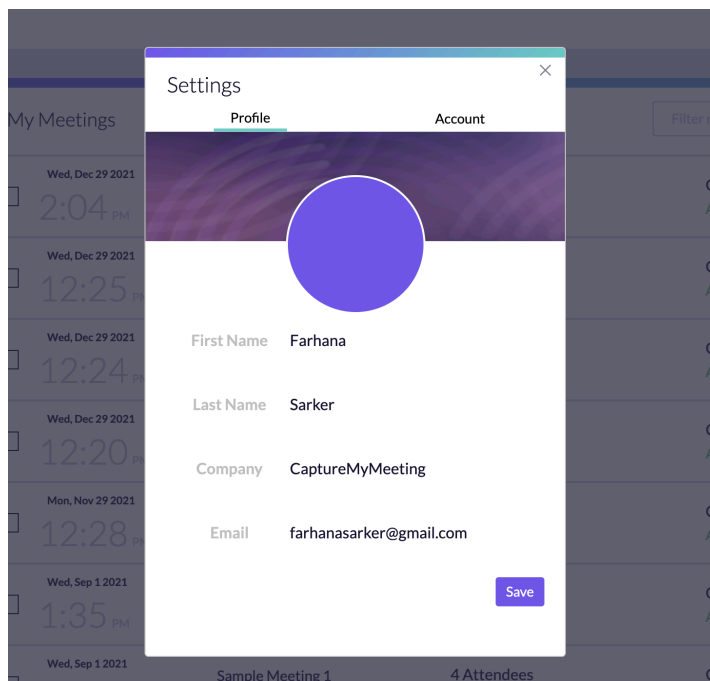

Update your Settings

Settings are located on the left side panel. To edit your settings, click “Edit my profile” on the left side panel.

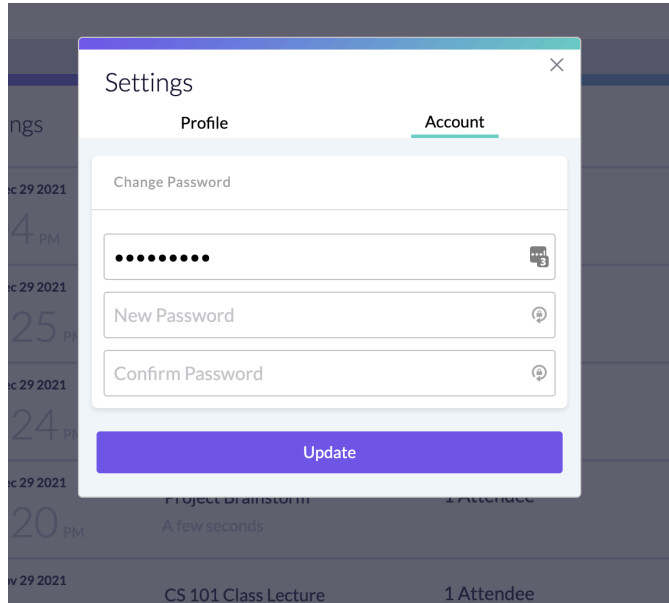

Profile Settings

Update your personal information through your Profile Settings via the “Profile” tab.

Account Settings

Update your account settings through the “Account” Tab. Use this tab to update your password if you wish.

Submit Feedback Through the App

Submit feedback through the application any time, and CaptureMyMeeting support will get back to you within 3 days. You can use the “Submit Feedback” button on the left side panel to send general feedback regarding your application experience, or use the “Submit Feedback” option within each meeting card dropdown to submit feedback regarding a specific meeting. You can also send a message to support using the "Support" url at the bottom of the left side panel.
