How to Share Your agebuzz Referral Link (Step-by-Step Guide)

Your unique agebuzz link is an address that takes someone directly to our newsletter sign up page. If you'd like to send the link you have been sent to a friend or family member, follow these simple steps.

📱 If You're Using a Phone or Tablet:

1. **Press and hold your finger on the link you've been given.**
   (Just press gently and hold until an option window pops up.)

2. **Tap "Copy" when the option appears.**
   This saves the link so you can share it.

3. **Open your text messages or email.**

4. **Tap and hold in the message area**, then **tap "Paste."**
   This puts the link into your message.

5. **Send it!**
   Tap "Send" or "Email" like you normally would.

💻 If You're Using a Computer:

1. **Move your mouse over the link you've been given.**

2. **Right-click on the link** (that means click with the right button on your mouse).

3. **Click "Copy Link" or "Copy."**

4. **Open your email or messages.**

5. **Right-click in the message box** and choose **"Paste."**

6. **Send it like you usually do to who you'd like.**

💡**Helpful Hints:**

●   If you accidentally click the link instead of copying it, don't worry — just go back and try again.

●   If nothing happens when you right-click, try left-clicking once to highlight the link, then try again.

●   Ask a family member or friend to practice with you if it's your first time.
