

A Quiet Place Part 2 Review

After over a year of delays, the sequel to John Krasinsky's 2018 film, A Quiet Place finally released. I wasn't really that excited for this film until about a week ago when I checked out the first film and absolutely loved it. Yesterday me and my dad went to go see it in the theater, so here is my review.

What I Liked

I just want to say, this is the perfect conclusion to the first movie. The first movie was very small scale and it just told the story of a family and their lives during this alien apocalypse where no one can make any sound, and because it was such a small scale story, the story was very effective and tense, but at the end of the first movie, the viewers want to see more of the rest of the world, and this movie does that. We get a great glimpse at society after this all started, and that some people are all alone in this world and some people are in groups and some people have even found their way to safety. This movie also does a nice job of being just as tense as the first movie. In the movie, there are multiple different storylines at once, and while this would usually make a movie feel overstuffed, in this movie it works because John Krasinsky found a way to make the storylines work with each other to make the movie incredibly tense. Also, I really enjoyed that we got to see how this all started and get a small look at the families lives before they had to be quiet.

What I Disliked

While the movie does a great job at being incredibly tense, the plotline about the son feels a bit forced. About halfway through the movie, he does something incredibly unnecessary for no reason that causes a lot of trouble. He didn't have to do this so it kind of feels like this storyline was just added to give the film more tension, which it does, it just feels unnecessary.

Final Thoughts

I only disliked one thing about this movie, and even that looped around to be a positive because it gave the film more tension. This is the perfect sequel to the first film that expands the world and brings the story to new places, so it gets an A. That concludes my review of A Quiet Place Part 2. If you watched it, tell me what you thought about it. Did you like it or was it a film you did not enjoy? Please tell me your thoughts, and have a great day.
