

Subject: Reimbursement Request – Cursor Workshop (April 24)

Hi [Manager's Name],

I'd like to request reimbursement for a workshop that will enhance my skills as a designer and help elevate our team's processes.

This hands-on workshop, *Build a Design System in Cursor for Design and Prototyping*, will cover:

- Building a lightweight, purpose-built “sandbox” design system in Cursor from scratch
- Creating a system that mirrors the existing design system for on-brand prototypes
- Avoiding the complexity and instability of connecting to a live production codebase
- Following a step-by-step process using a provided Figma file to build common UI components
- Producing clean, AI-readable code that is easy for engineers to use during handoff

Overall, this workshop provides a practical approach to integrating AI-assisted design workflows into our process.

The cost is [price]. I'll come back with a clear, actionable workflow that I can apply immediately and share internally.

Happy to provide additional details if helpful. Thanks for considering it!

Best,
[Your Name]
