

**[CLICK [HERE](#) TO ADD YOUR NAME!]**

To Dean of Humanities and Sciences Debra Satz and English Department Chair Gavin Jones,

We write as alumni, parents, faculty, staff, and current students deeply concerned by and opposed to recent changes to the creative writing department's Jones Lectureship program.

Last week, the current Jones Lecturers in Stanford's Creative Writing program were notified that the department would be eliminating their positions, with all 23 current lecturers moving instead to short-term contracts. The change comes less than a year after several Jones Lecturers petitioned the department for fair compensation, benefits, and a pathway to permanent teaching posts, considering that — until last year — many had effectively taken pay cuts to continue teaching at Stanford and were considered “very low income” by the state of California's standards.

Now, a year after meeting the lecturers' demands, Stanford's English department has announced that it will be ending their contracts and changing the Jones Lectureship to a position that will terminate after a couple of years, permanently ending the continuity in relationships that so many creative writing students have come to expect and cherish.

As alumni and current students, we are deeply alarmed and saddened by these changes. The 23 Jones Lecturers at Stanford taught some of our favorite classes at Stanford, and often took special care to cultivate lasting relationships with undergraduate students that extended beyond graduation. On paper, we learned how to write descriptive, concise prose and elegant, honest poems, but we also found in the Jones Lecturers willing mentors and instructors who offered us valuable perspectives during a formative, turbulent period in our lives. When the lecturers began asking, last year, for fair compensation, our natural response was to support them wholeheartedly.

Instead of continuing to compensate the Jones lecturers equitably, however, the department has chosen to terminate their contracts and permanently change the lectureship to a temporary position, in such a way that we believe fundamentally threatens the core of the creative writing program itself. What made the Jones lecturers so important was that they were often accessible and available to us in ways that other

faculty weren't. They not only provided feedback on our poems long after they had ceased to be our instructors on paper, but often provided a willing ear to listen to our problems. Over time, they watched us grow from anxious students into full-fledged adults. And whereas we, as alumni, were able to count on the Jones lecturers to be present for the vast majority of our undergraduate careers, the same cannot be said for current students, following the changes to the department's lectureship structure.

Our only hope in writing this letter is to earnestly encourage the English Department — and the University — to reinstate the lecturers whose contracts will be phased out, and to reconsider the changes to the lectureship structure. The Jones Lecturers are the heart of the creative writing program and formed a core part of our undergraduate experiences; we hope that future generations of Stanford undergraduates can share those same experiences.
