П Me a River

Rare is the case in Environmental Science that we have an "answer" to check our results with, but there is an interesting phenomenon, as detailed in the 1996 paper <u>River Meandering as a Self-Organizational Process</u> and highlighted in this <u>Numberphile video</u> for "Pi Day" (March 14). Your assignment will be to support or deny the veracity of this report by selecting a sufficient sample size from the real world using Google Maps or Earth.

Criteria Assessed: Planning (Pl) Data Collection and Processing (DCP) Discussion, Evaluation, Conclusion (DEC)
