DEPRECATED. We're using this spreadsheet instead: Crowdsourced list of Dataverse features

To see what we're up to: https://github.com/IQSS/dataverse/pull/12000 and https://harvard.zoom.us/rec/share/MiwNy9p0-Kiz7tv9-iiz2D62qhsqiCCZ2ym9hmZIv2xu5-4KP3UY7jdoll2DbZ4I.7gVkWdSnarpQLWLZ and #docs > list of features

Old content below.

The new "features" list being introduced in https://github.com/IQSS/dataverse/pull/12000 can be previewed at https://dataverse-guide--12000.org.readthedocs.build/en/12000/admin/features.html

This document is for brainstorming what should be added to that new list. We can also brainstorm about where to mention features in other places in the guides. One goal is for the feature to be discoverable by searching, either with Ctrl-F on the list or by using the search.

Please feel free to leave comments and suggestions and join the discussion at #docs > list of features.

Add to features list

-

Add somewhere

- DMPTool/DMP
    - Since support comes only through the RSpace integration, we could mention it at https://dataverse-guide--12000.org.readthedocs.build/en/12000/admin/integrations.html#rspace
-
