

Assessment Team 780 “All-Seeing Eye”

“Vigilate et firmiter agite”

Founded by the Bavarian Illuminati, North American Division

**“The order of the day is to put an end to the machinations of the purveyors of injustice,
to control them without dominating them.”**

A Handbook made by UNGOC Saskatchewan Mission

Assessment Team Lead

Jason “Static” Miller

History/Background

Assessment Team 780 “All-Seeing Eye” was founded in 20██ by Lord Heywood Maybach III, 14th Earl of Linlithgow, and Special Advisor of the Bavarian Illuminati to the United Nations Global Occult Coalition North American Task Force.

The purpose of Team 780 was initially to gather information on Foundation assets in Central Canada, as well as determine the presence of other occult groups in the region. In doing so, Team 780 has used its Illuminati benefactors to insert itself into local and regional government positions, and ensure that Foundation activity is limited, as well as determining the severity of known and unknown Threat Entities in the region.

Team 780 aims to use knowledge gained through espionage to better understand the threats contained in the Mission Region, and relay the intelligence to our Strike teams so they may dispose of any parathreats that might endanger the reality of a New World Order.

Operational Standards

Our mission requires the utmost in stealth and secrecy. Team members will be expected to follow the following standard protocols.

- **All members shall destroy any personal identification on their person before entering the area of operations.**
- **All members that plan to enter secured hostile sites shall first attempt to gain a cover before entering, ie; disguising in plain clothes similar to those worn by the local populace.**
- **Violence shall only be used when it is assured that the area is safe, and no witnesses are present, or if your cover has been compromised, and exfiltration is required.**
- **Blend into your surroundings, act as if you were the person you are supposed to be, and never expose yourself as who you really are, even if you must take your own life.**
- **Secure any sensitive documents you find as soon as possible, and after a successful mission, remember to complete a detailed Assessment Report Form.**

Special Instructions

Our benefactors have given Team 780 a number of unique guidelines to ensure that our overarching mission in the region is a success.

- 1. The Foundation is a rogue organization with a deadly arsenal of Threat Entities. You are to gain information on the most deadly of these, and if the Foundation plans to use them.**
- 2. The Foundation has a secretive leadership structure, you are to gain information on their leadership system and determine their loyalty to their flawed cause.**
- 3. The Foundation uses a system of combative personnel, similar to our Strike Teams, known as Mobile Task Forces. You are to determine their missions, and their strengths/weaknesses.**
