

[Click here to view the Observer Guides from Canvas.](#)

Steps to become an Observer (set-up is easiest from a desktop or laptop):

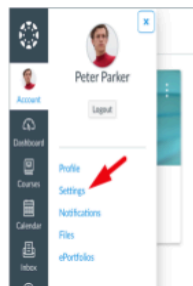

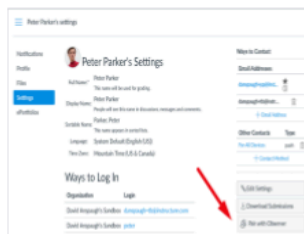

1. **Student** signs in to <https://my.ncedcloud.org> (**OR** access the **NCedCloud** link on the bottom left of the [Davidson County Schools](#) website).
2. Click on the red Canvas icon.
3. Click on Account (left menu).
4. Click on Settings.
5. Click on “Pair with Observer” in the bottom left corner. A code will appear. Write down the code and the student will log out of NCedCloud and Canvas.
6. In another tab/window or on another device, the **Parent** will visit <https://davidson.instructure.com/login/canvas>. (This works best, however, in the Parent App)
7. Click “**Parent of a Canvas User**” in the top right corner.
8. Complete Parent Information and enter the pairing code provided in Step 5 to set up your account.
9. Bookmark <https://davidson.instructure.com/login/canvas> to log into your account at a later if not using the Canvas Parent App. You can download the Canvas Parent app on your phone or mobile device.

STEP 1 : Student Creates a Pairing Code

- 1 From the global navigation of Canvas web, select **Account**, then choose **Settings**.

- 2 Select **Pair with Observer** from the sidebar of the settings page.

- 3 Copy or share the pairing code with an observer (Parent) to allow them to register. There is a time limit and **each code can only be used once per observer and will only be good for 7 days.**
