Updated April 15, 2019

Android App for Movi Cinema Robot

The Android app for Movi – The one with all the methods is here!

Movi Android Version 1.1.3 has the following new features:

- Camera UI enhancements that we think you'll love
- New high FPS options on some Samsung devices
- Movi Firmware 1.3.1 with Roll Trim
- Improved Movi Connection reliability
- and a bunch of bug fixes!

V1.1 Features

Movi Cinema Robot Android App has the following **features**.

- Echo Method
- Movilapse Method
- Timelapse Method
- Orbit Method
- Roll Method
- Smartpod Method
- Movi Sleep Screen
- Recording LED

Preferred Devices

With hundreds of Android models out there and most of them requiring customized support, it is a challenge for a small team like ours to provide quality experience for this platform. For this, we have decided to launch Movi Cinema Robot Android App with support for a **select list Android devices:**

- Google Pixel 1
- Google Pixel 1 XL
- Google Pixel 2
- Google Pixel 2 XL
- Google Pixel 3 (New!)
- Google Pixel 3 XL (New!)
- Samsung Galaxy S8
- Samsung Galaxy S8+
- Samsung Galaxy S9
- Samsung Galaxy S9+
- Samsung Galaxy Note 9 (New!)

Inclusion on this list indicates that we have performed testing and optimized UI for these specific devices, although some features and functions may vary.

All Them Bugs

We do our best to find and smash all the bugs in a timely manner.

If you have technical issues with a supported device, please contact support@freeflysystems.com .
Otherwise, let us know of any other feedback you might have by filling out the form or posting on forum here.
