

Activity Description:

The electoral college has existed in the United States for as long as the Constitution. This, however, does not mean that everyone would agree that it is a useful procedure. In a 3-minute-minimum video log, please do the following:

- Describe how the electoral college works and what its function is
- Describe a reason that it is effective/useful
- Identify one major problem with the electoral college
- Suggest your favorite of the "electoral college alternatives" and explain how it would solve your identified problem
