

Thermodynamics

Zhigang Suo [@zhigangsuo](#)

[Everything about ES 181](#): schedule and homework

You are invited to [discuss this book on X](#)

[Preface](#)

[This play of thermodynamics](#)

Before the play

[Gas](#)

[Ice and water](#)

[Water and steam](#)

[Ice, water, and steam](#)

[Moist air](#)

[Thermomechanical transduction](#)

Act One

[Isolated system](#)

[Entropy](#)

Act Two

[Thermal system](#)

[Temperature as independent variable](#)

[Carnot cycle](#)

[Theory of phase transition](#)

[Free energy](#)

[Surface energy](#)

[Thermoelasticity](#)

Act Three

[Closed system](#)

[Gibbs function](#)

[Theory of ideal gas](#)

[Van der Waals model](#)

[Theory of pure substance](#)

Act Four

[Control volume](#)

[Power generation and refrigeration](#)

[Chemical reaction](#)

[Fuel cell and other power-generating reactions](#)

Act Five

[Open system](#)

[Chemical equilibrium](#)

[Summary of this play of thermodynamics](#)

[Tables](#)

[Readings](#)

[Notes not used in ES 181](#)
