PRIVACY POLICY

One Line Puzzle

Last Updated: August 25, 2026

1. INTRODUCTION

Welcome to One Line Puzzle.

One Line Puzzle is a casual puzzle game focused on drawing, connecting, and solving one-line puzzles. This Privacy Policy explains how information may be handled when you use the game.

We aim to keep the game simple and enjoyable without unnecessarily asking players for personal information.

2. INFORMATION WE COLLECT

One Line Puzzle does not require you to create an account in order to play the game.

The game does not ask players to provide personal information such as:

- Name
- Email address
- Phone number
- Home address
- Contacts
- Photos or videos
- Precise location
- Passwords
- Payment information

However, the app or the services used by a particular version of the app may process limited technical information that is necessary for the game to work correctly.

We do not intentionally use such technical information to personally identify individual players.

3. GAME PROGRESS AND LOCAL STORAGE

One Line Puzzle may save gameplay-related information on your device so that the game can remember your progress and preferences.

This may include:

- Completed levels
- World and level progression
- Stars earned
- Coins or in-game currency
- Endless Mode progress
- Game settings
- Gameplay preferences

This information is used to provide and maintain the game's functionality.

When game information is stored locally on your device, it is associated with the game on that device and is not intended to personally identify you.

One Line Puzzle does not claim to provide cloud synchronization unless that feature is specifically included in the version of the game you are using.

4. DEVICE AND TECHNICAL INFORMATION

The application and Android platform may process limited technical information that is necessary for the application to operate correctly, maintain compatibility, or address technical issues.

The exact information may depend on the Android version, device, and services used by the application.

We do not intentionally use technical information to personally identify individual players.

5. ADVERTISING AND THIRD-PARTY SERVICES

The data practices of One Line Puzzle depend on the services actually included in the released version of the game.

If the game does not use advertising, analytics, crash-reporting, or other third-party services that collect user information, we do not intentionally collect such information through those services.

If services such as Google AdMob, Firebase, Firebase Crashlytics, Google Analytics, Google Play Games Services, or another third-party SDK are added to the game, those services may process information according to their own privacy policies and terms.

If our use of third-party services or our data practices change, this Privacy Policy and the applicable Google Play Data Safety information will be updated to accurately describe those changes.

We do not claim that any particular third-party service is currently being used unless it is actually included in the released version of One Line Puzzle.

6. HOW INFORMATION IS USED

Information handled by the game may be used for legitimate game-related purposes, including:

- Saving and restoring gameplay progress
- Remembering game settings and preferences
- Providing game features and functionality
- Maintaining app stability and performance
- Responding to support requests when a player contacts us

We do not use information for personalized advertising, profiling, or marketing unless those practices are actually introduced and properly disclosed.

7. DATA SHARING

We do not sell your personal information.

If a third-party service is used by the game, information relevant to that service may be processed or shared as necessary for the service to provide its functionality.

Any applicable third-party data handling will be described in an updated version of this Privacy Policy and in the Google Play Data Safety section where required.

8. DATA SECURITY

We use reasonable measures to protect information handled by the application and to reduce the risk of unauthorized access, alteration, or misuse.

However, no method of electronic storage or transmission can be guaranteed to be completely secure.

We therefore cannot promise absolute security, but we aim to handle information responsibly and in accordance with applicable requirements.

9. DATA RETENTION AND DELETION

One Line Puzzle does not require a user account for normal gameplay.

Game progress stored locally on your device can generally be removed by clearing the application's data or uninstalling the application, subject to the behavior of your device and Android.

Because the game does not require an account, there is no account-deletion process for an account that does not exist.

If online accounts or server-side personal data are introduced in the future, this Privacy Policy will be updated to explain the applicable retention and deletion process.

10. CHILDREN'S PRIVACY

One Line Puzzle does not knowingly collect personal information from children.

The game does not require players to provide personal information simply to play.

If you are a parent or guardian and believe that a child has provided personal information through the application, please contact us using the information below.

We will review the matter and take appropriate action where necessary.

11. CHANGES TO THIS PRIVACY POLICY

We may update this Privacy Policy when the game, its services, or its data practices change.

When meaningful changes are made, the "Last Updated" date at the top of this Privacy Policy will be updated.

We recommend checking this page from time to time so you can stay informed about how One Line Puzzle handles information.

12. CONTACT US

13. OUR PRIVACY APPROACH

One Line Puzzle is built around a simple idea: provide a fun and relaxing puzzle experience without asking for information that the game does not need.

We will keep this Privacy Policy aligned with the actual features and services included in the game.
