Table of contents		
Chapter 1	Where they race	
Chapter 2	Getting around	
Chapter 3	How they go fast	

Introduction: i’m fast but i’m not a cheetah I am found at a stadiums but i am not a football player what am I . I’m a race car

Chapter 1 Where They Race

Race cars race at race tracks with other cars racing too.They also race on **dirt tracks** with a **co drive**r no other cars with you.Lastly they race at **stadiums** too.

Chapter 2 Getting Around

Race cars don't drive on the road because they would get dirty because all the dirt and dust would make it dirty.So they go in a truck's **trailer** or back of the truck.Or a plane will fly them there.Maybe a **helicopter**.

Chapter 3 how they go fast

Carbon fiber will help. **Carbon fiber** will be found on the bottom of the and on the spoiler of the car. **Arowdinamacts** will make the air go around the car at high speeds.Different engines like a v8 or a v12 will help make the car go faster at a high speed too.

Those were 9 facts about race cars hope you enjoy

Glossary
