

## ***Race cars***

***By: Ethan***

<b>Table of contents</b>		
<b>Chapter 1</b>	<b>Where they race</b>	
<b>Chapter 2</b>	<b>Getting around</b>	
<b>Chapter 3</b>	<b>How they go fast</b>	

Introduction: i'm fast but i'm not a cheetah I am found at a stadiums  
but i am not a football player what am I . I'm a race car

## ***Chapter 1 Where They Race***

Race cars race at race tracks with other cars racing too.They also race on **dirt tracks** with a **co driver** no other cars with you.Lastly they race at **stadiums** too.

## Chapter 2 Getting Around

Race cars don't drive on the road because they would get dirty because all the dirt and dust would make it dirty. So they go in a truck's **trailer** or back of the truck. Or a plane will fly them there. Maybe a **helicopter**.

## ***Chapter 3 how they go fast***

**Carbon fiber** will help. **Carbon fiber** will be found on the bottom of the and on the spoiler of the car. **Aerodynamics** will make the air go around the car at high speeds. Different engines like a v8 or a v12 will help make the car go faster at a high speed too.

Those were 9 facts about race cars hope you enjoy

## ***Glossary***

<b>Carbon fiber</b>	Helps make the car lighter	
<b>aerodynamics</b>	Makes wind go around the car	
<b>trailer</b>	The back of a truck	

<b>helicopter</b>	A vehicle that flies and has a blade	
<b>stadium</b>	A place race cars race
