WRITTEN NOTICE to PARENTS
CONCERNING
EYE EXAMINATION REQUIREMENT
(Amended Substitute House Bill 95)

I have received written notice of the new law (Amended Substitute House Bill 95) requiring students initially identified with disabilities under the federal Individuals with Disabilities Education Act to have an eye exam by a licensed eye doctor within three months of the multi-factored evaluation, unless the student underwent such an examination within the nine-month period immediately prior to being identified under IDEA.

I understand that it is the parent's responsibility to pay for the eye exam in most circumstances. I will contact the nurse at my child's school or my child's physician if I need a list of eye doctors in my community.

I understand that my child will receive or continue to receive special education services from the district even without a completed eye exam.
