Open edX BTR working group
Meeting notes Nov 11, 2021, 15:00 UTC

Agenda

[Lilac.3](#) outstanding issues

- [Bulk course emails are rejected by email server because of an invalid "from" address](#) 4
  - Still in master email requires a setting change on edx.org will require a settings change and might a breaking change.
  - May not make change and will require a change on edx.org
  - Will be updated later
- [Bulk email templates contains many edX-specific reference (and are thus unusable)](#) 1
  - Will merge into maple branch
- [Non-MFE Payment Flow](#) 5
  - Adolopho max and jhonny were going to work on what was needed.
  - Will be worked on ecommerce migration in next sprint and redo what is needed and how this is scheduled going forward.
  - Will make changes into master maple branch
  - There is a workaround

Maple

- [Support other payment processors](#) 2
  - Will give regis a look at in maple will have a stab at fixing this
  - Cybersource issue in payments issue and will. Not working in devstack or tutor paypal does work in both
  - Custom payment backends
  - Code is separated should be able to implement and generic system @regis bypassing paymentmfe. Using old flow.
  - Will be work to implement new payment processors.
- [Support for Gradebook MFE](#) 1
  - Internationalisation is stuck and will keep investigating and some calls little feeback from the edx team in charge of the issue
  - Change pr raised to look at how calls are routed to mfes.
  - Changes to react app to allow this
  - [The Gradebook MFE makes undue calls to analytics services](#) 1
    - Can Closed call is a call that affects the mfe and change to modify this in edx.
    - New issue about calls back to servers
- [Support for the Learning MFE](#) 2
  - At point of needing testing can use on the maple branch for testing
- [Support Profile MFE](#) 1
  - At point of testing and working with internationalisation
  - Branding is to be addressed by new pr for mfe brading
- ["Uncaught TypeError: n is null" during login to LMS](#)

- o Pr awaiting review on edx core contributors to review changed by js function call is required. Some hard coding of staging environments
- [edx/configuration] Mongo 4.4 licensing issue 2
  - o Questions raised against issue not assigned users on the issue. Issue requires clarification
- What are we testing? (new features) Hooks, xAPI/caliper, (old features) Badgr
  - o Make a list of things being tested in the btr group and testes against maple
    - ▪ As a way of coordinating testing
    - ▪ Include things that do not need testing but include results in the
    - ▪ Confluence or github?
      - ▪
    - ▪

AOB Need volunteers

- Improving documentation around how to enable features

- If people can spare the time to work on these

  - Bulk course emails are rejected by email server because of an invalid "from" address 4
  - edx-platform triggers too many deprecation warnings 2
- Django 3.2.9 4
  - o Maple insclusion
