

Insert the final article title in sentence case

Author One¹, Author Two², Author Three^{1*}

¹ [Department], [Faculty], [Institution], [City], [Country]

² [Department], [Faculty], [Institution], [City], [Country]

*Corresponding author: name, official email

Abstract

[150-250 words. Present purpose, methods, principal results, and conclusion. Keep the abstract self-contained and consistent with the final article.]

Keywords: [keyword 1; keyword 2; keyword 3; keyword 4]

ARTICLE IDENTIFIERS

ORIGINAL ARTICLE/REVIEW ARTICLE

Volume 9 - Issue 9 - 2026

Pages 1765-1771

DOI: 10.56338/ijhess.

ARTICLE HISTORY

Received: [DD Month YYYY]

Revised: [DD Month YYYY]

Accepted: [DD Month YYYY]

Introduction

[Final introduction text. Establish the problem, evidence, research gap, significance, and objective. Use concise paragraphs and current references.]

[The final paragraph should state the objective, research question, or hypotheses clearly.]

Methods

[Describe design, setting, participants or data source, sampling, measures, validity and reliability, data collection, analytical methods, software, and ethics. Report enough information to support reproducibility.]

Research Design and Sample

[Final text.]

Measures and Data Analysis

[Final text.]

Results

[Present results in the same sequence as the research objectives or hypotheses. Report estimates, uncertainty, model diagnostics, and relevant effect measures.]

Table 1. [Concise and informative table title]

No.	Variable or Category	n	% / Mean (SD)
1	[Category A]	[00]	[00.0]
2	[Category B]	[00]	[00.0]
3	[Category C]	[00]	[00.0]

Note. Define abbreviations and identify statistical tests where applicable. Do not repeat all table values in the narrative.

Discussion

[Interpret principal findings, compare them with previous evidence, explain theoretical and managerial significance, and avoid unsupported claims.]

Conclusion and Implications

[Provide a concise conclusion that directly answers the objective and identifies evidence-based theoretical, managerial, or policy implications.]

Limitations and Future Research

[State limitations transparently and propose focused future research.]

References

Authors are required to prepare all references using Mendeley Reference Manager (or compatible reference management software) and apply the American Psychological Association (APA) 7th Edition citation style consistently throughout the manuscript. All in-text citations must correspond to the entries listed in the reference section, and every reference should include complete bibliographic information and, where available, a valid Digital Object Identifier (DOI) or persistent URL. Authors are encouraged to cite recent, high-quality, and relevant scholarly literature, particularly articles published in reputable peer-reviewed journals within the last ten years.

Examples:

Journal Article

Author, A. A., & Author, B. B. (2025). Title of the journal article in sentence case. *Journal Title*, 12(3), 123–140. <https://doi.org/10.xxxx/xxxxx>

Book

Author, A. A. (2024). *Title of the book in sentence case* (2nd ed.). Publisher.

Report / Dataset

Organisation Name. (2026). *Title of report or dataset*. <https://example.org/resource>

Notes

Authors are required to prepare manuscripts using the official IJHESS manuscript template. The main text must be formatted using Cambria, 10-point font size, with single line spacing (1.0) and justified alignment

throughout the manuscript. Authors should ensure consistency in headings, subheadings, citations, references, figures, and tables in accordance with the journal template.

All tables must be created using editable table features (not as images) and formatted using Cambria, 9-point font size, with single line spacing (1.0). Tables should be numbered consecutively, include concise titles placed above the table, and present data clearly without unnecessary formatting. Only horizontal lines should be used where appropriate, and vertical lines should be avoided unless essential for readability.

Authors are encouraged to review the manuscript carefully before submission to ensure compliance with the journal formatting requirements. Manuscripts that do not conform to the prescribed template and formatting guidelines may be returned to the authors for revision prior to the peer-review process.
