

Social Media in MY Learning Environment

Three tools I use!

Social Media Tool	Activity/Assessment where it will be used:	How the use of this social media tool changes the learning	Concerns in using the tool
WeChat	Share life experiences and thoughts with friends and family.	Convenient and save money	Too easy to take up much time
Weibo	Focus on the discussion of important events and related topics	Real-time and interactive	A lot of diverse information, real useful information needs to be critically absorbed
WhatsApp	A tool for communicating with friends in the United States	Cheaper communication software	Communicating in English, too much life language makes me lost

I wouldn’t even think about it!

Social media tool (with link to the tool)	Describe the app and what it does	Why it WON’T be in my learning environment (this needs to be a robust, academic description)
TikTok	An app for sharing funny videos	I don't think there is anything worth me to care about or learn from this app. It's a waste of time for me to open it.
