Abstract

are written in English. Font Times New Roman (10 pt) and preferably not more than 300 words. The abstract should be clear, concise, and descriptive. This abstract should provide a brief introduction to the problem, objective of paper, followed by a statement regarding the methodology and a brief summary of results.

Keywords: keyword1, keyword2, keyword3 Font Times New Roman (10 pt) and preferably minimum 3 words.

1. Introduction [Times New Roman 12 bold font]

The introduction should be clear and provide the issue to be discussed in the manuscript. Before the objective, authors should provide an adequate background, and very short literature survey in order to record the existing solutions, to show which is the best of previous researches, to show the main limitation of the previous researches, to show what do you hope to achieve (to solve the limitation), and to show the scientific merit or novelties of the paper.

At the end of the paragraph, the author/s should end with a comment on the significance concerning identification of the issue and objective of the research.

The introduction is typed in capital letters [Times New Roman 10 bold font] containing the background of overcoming a problem, the urgency and rationalization of activities, literature review, problem solving plans, activity objectives, and hypothesis development [Times New Roman font, 10, normal]. Notes to authors: Article length between 3000-4000 words (including bibliography, notes and tables). Each article will be tested for plagiarism / plagiarism.

Articles are typed in Microsoft Office Word format. Using Times New Roman font size 10, single spaced on A4 paper. People who want the Proceeding ADRI in printed form can contact the journal manager.

2. Literature Review

The research method describes: approach, scope or object, operational definition of variable/description of research focus, place, population and sample/informants, main materials and tools, data collection techniques, and data analysis techniques [font Arial, 10, Normal]

3. Methods

The research method describes: approach, scope or object, operational definition of variable/description of research focus, place, population and sample/informants, main materials and tools, data collection techniques, and data analysis techniques [font Times New Roman, 10, Normal]

4. Results and Discussion

4.1 Results

Main Heading of the Analysis or Results [Times New Roman, 10 bold, Sentence Case font]

This section is the most important section of your article. The analysis or results of the research should be clear and concise. The results should summarize (scientific) findings rather than providing data in great detail. Please highlight differences between your results or findings and the previous publications by other researchers.

The results of the research are presented in full and in accordance with the scope of the research. Research results can be supplemented with tables, graphs (pictures), and/or charts. Tables and figures are numbered and titled. The results of data analysis are interpreted correctly. The discussion section presents the findings logically, linking them with relevant reference sources. [Times New Roman, 10, normal]

Sub-heading of the discussion [Times New Roman, 10 bold, Sentence Case font]
Following main headings should be provided in the manuscript while preparing. The separation between main headings, sub-headings and sub-sub headings should be numbered in the manuscript with following example:

Tables, Chart and Figures
Tables and Figures are presented center and cited in the manuscript. The figures should be clearly readable and at least have a resolution of 200 DPI (Dots Per Inch) for good printing quality. Table made with the open model (without the vertical lines) as shown below:

Figure 1. Cover Proceeding ADRI

Chart 1. Graphic Bar

Table

Table 1. Experimental Design

Group	Pretest	Treatment	Posttest
Experiment 1 (Feedback attributional Oral)	T1	Xa	T2
Experiment 2 (Feedback attributional Posts)	T1	Xb	T2
Experiment 3 (Feedback attributional Confirmation)	T1	Xc	T2
control (without treatment)	T1	-	T2

Written briefly but describes the substance of the research and suggestions or recommendations for further research activities. [Times New Roman, 10, normal].

4.2 Discussion

The MBKM program is intended to address the challenges that higher education institutions face in producing graduates who align with the development of the times, advances in science and technology, the needs of the business and industrial world, and the dynamics of society (Supriati et al. 2022). The purpose of the MBKM policy, specifically the "hak belajar tiga semester di luar program studi" (the right to study three semesters outside the study program), is to enhance the graduates' competencies, both in soft and hard skills, in order to better prepare them and make them more relevant to the needs of the times. It aims to prepare graduates to be outstanding and personality-driven future national leaders. It is anticipated that experiential learning programs with flexible pathways will assist students in developing their potential through their passions and skills (Kuncoro et al. 2022).

5. Conclusion

Conclusion contains a description that should answer the objectives of research. Provide a clear and concise conclusion. Do not repeat the Abstract or simply describe the results of the research. Give a clear explanation regarding the possible application and/or suggestions related to the research findings. [Times New Roman, 10, normal].

Acknowledgements
Recognize those who helped in the research, especially funding supporter of your research. Include individuals who have assisted you in your study: Advisors, Financial supporters, or may other supporter i.e. Proof-readers, Typists, and Suppliers who may have given materials. [Times New Roman, 10, normal]

References
Contains a minimum of 15 referenced sources and a minimum of 80% in the form of literature published in the last 5 years. The reference list is written according to the American Psychological Association (APA) Fifth edition. All sources listed in the bibliography must be in the article manuscript. Writing scripts and situations referred to in this manuscript is recommended to use reference applications such as Mendeley, Zotero, Reffwork, Endnote and others. [Times New Roman, 10, normal]
