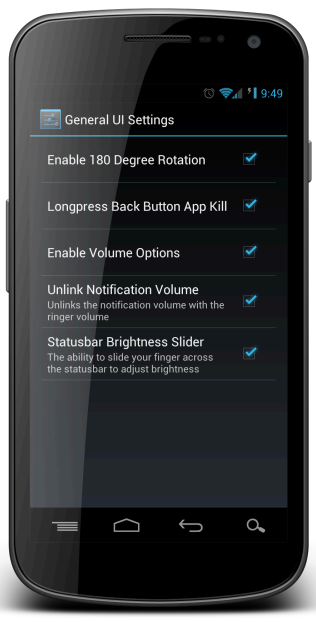
- Fixed font size bug
- Updated language translations

Please visit [the release page over at XDA](#) for details

Brightness slider - credit CM:

Unlink Notification Volume:



Under General UI settings you will find a couple new options

“Statusbar Brightness Slider”

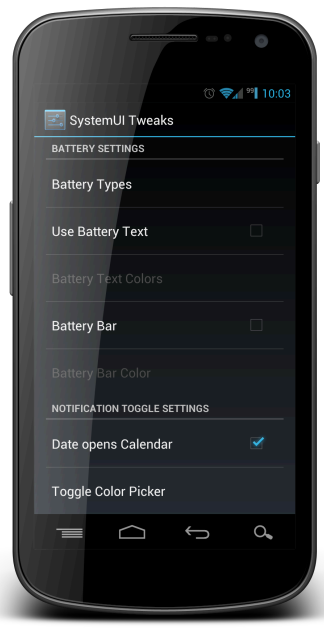
This option gives you the ability tk slide your finger across the statusbar to adjust brightness.. Note: it will only work is autobrighness is turned off

“Unlink Notification Volume”

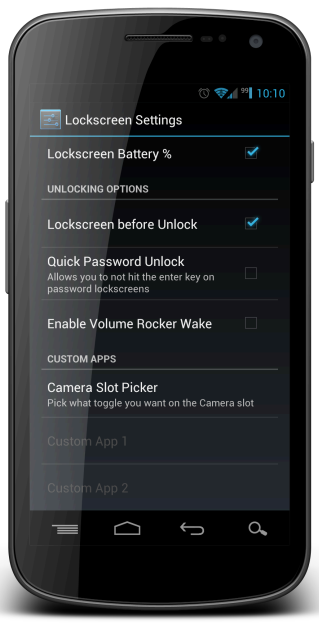
This option will recombine the notification and ringer volumes

Date opens Calendar:

Under SystemUI tweaks if you check the “Date opens Calendar” option, when selecting the date within the dropdown shade you will be taken directly to the calendar application.

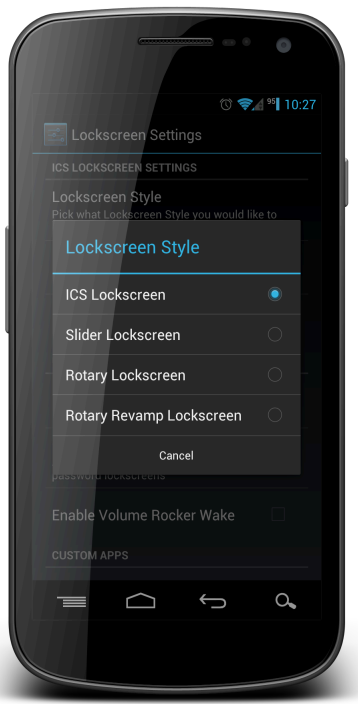


Lockscreen Settings (many new option):



Quick Password Unlock CM: Allows you to not hit the enter key on password lockscreens

Camera Slot Picker: on the default lockscreen you can now swap out the camera slot with a silent phone option

Oldschool lockscreens are back... Gummy now includes the slider / Rotary and Rotary revamped lockscreens :)


More to come.. such as Honeycomb and Rings
