**Over The Limit, Act 4. [It's That Man AGAIN!?!]**

[Opens with 3 shot fade in on Zanzibar, then have X-17 coming out of Warp in shot 3. X-17 comes into Land, Gate closes behind]

Phoenix Army get out

[Steve] Well I need some sleep.... That was fucked up.

[Ben] Tell me about it, I'm still hung-over.

[Insert Ringtone Here] [ Video-call starts on Wall-screen ]

[That Man] Hello phoenix army, how are you?

[Dan] It's that man again!?

[That Man] Stop answering my calls like that,

[Dan] Why?

[That Man] Because its annoying.

[Ben] What do you want this time?

[That Man] You will be happy to know that in the time that we had your X-17 prototype, we have gathered enough information to build our own vehicle, that is faster and more agile than your crappy prototype,

[Orange guy comes on video call and talks to that man quietly...]

[quietly overheard...] [Michael] We can't figure out their stealth system... or the automated repair system, we didn't get enough data on it.

[quietly overheard...] [That man] THEN MAKE IT WORK!

[Michael] But we can't.

[that man shoots Michael in the foot.]

[That Man] THEN TRY HARDER!

[Michael] ... Y-yes s-sir.

[Michael walks off]

[That Man] Now where was I... ah that's right. within the next week, you can kiss your freedom goodbye, as the weaponry we are fitting into our prototype is far superior to what was fitted to the prototype that you recovered... so this is your only warning that I will give you... cheerio!

[Ben] Dan, did you trace the call?

[Dan] Oh yeah, its coming from a factory about 5000 miles south of here

[Ben] Excellent, we shall launch the attack tomorrow, but for now I need to do stuff...

[Dan] Do I even want to know what you mean by that?

[Ben] Maybe.

[Dan] Oh god...

[fade out to 36 hours later] [fade back in]

[Ben] CRAP I OVERSLEPT!

[Ben runs in to Dan's sleeping quarters]

[Ben] Dan! Wake up you lazy shit!

[Dan] Give me another hour Ben.

[Ben] God dammit...

[ALARM SIREN]

[Dan] HOLY CRAP! THAT'S THE PERIMETER ALARM!

[Steve walks out of bathroom]

[Steve] What's going on?

[Ben] We have an intruder.

[Dan] Computer, Show me his location

[Screen zooms in on map of earth, (Google Earth) and then into Zanzibar... down to GUS!]

[Ben] He's got the Valkyrie army logo on his armour.

[Dan] Computer, this is a Code Red. Seal the FRONT GATE!

[Gate closes down at sea wall.] [Gus is stuck on outside]

[Gus looks at gate... while the X-17 lands behind him and de-cloaks.]

[Dan] Hold it right there!

[Fadeout to credits.]
