Timekeeping Transformation: Baker Concrete's 75% Accuracy Boost with MobiClocks®

“A standout result was achieving over a 75% reduction in payroll adjustments across the board. This is proof of MobiClocks® immense value in optimizing our workforce management.”

The Challenge

Baker Concrete Enterprises, a construction powerhouse, sought to optimize payroll efficiency. Despite wrestling with manual processes with paper time sheets and tablets, their commitment to excellence remained unwavering. Yet, the three-day processing time underscored the need for a streamlined solution.

The Solution

Demonstrating their commitment to innovation and operational excellence, Baker seamlessly integrated MobiClocks® into their existing ERP framework. This introduced advanced features like facial recognition, geofencing, and offline capabilities.

By eliminating manual data entry and improving accuracy, MobiClocks® emerged as a transformative force in the company's payroll processing time, reducing it from 3 days to 1.

The Results:

1. **99% Reduction in Payroll Inaccuracies:** Dramatic improvement in payroll accuracy, achieving nearly error-free processing.
2. **Reducing payroll processing time from 3 days to 1:** MobiClocks® simplified the payroll process, cutting down on manual work and errors.
3. **100% Elimination of Buddy Punching and Ghost Employees:** MobiClocks® used face recognition and geofencing to prevent false clock-ins, ensuring accurate attendance.

About Baker Concrete Enterprises:

Baker Concrete stands as a testament to American construction excellence. With over 50 years of experience, Baker Concrete is celebrated for delivering high-quality, reliable concrete construction solutions across the United States. Baker has completed over 14,000 projects, leading the industry with its skilled workforce and dedication to safety, quality, and leadership. Ranked #1 on ENR's Top 20 Concrete Specialty Contractor list, Baker Concrete employs over 5,500 skilled workers nationwide, showcasing their ability to deliver top-notch results.
