

## **Places for Possible Academic Publishing**

*Journal of Young Investigators* “JYI's mission is to improve undergraduate science training by providing innovative, high-quality educational experiences in science writing, publication and the peer-review process.” <http://www.jyi.org/site/>

*Journal of Student Research* “Journal of Student Research is based in Houston, TX. It is an electronic, peer-reviewed, multidisciplinary journal (ISSN: 2167-1907) devoted to the rapid dissemination of current research. Our aim is to familiarize student authors with the process of manuscript publication. Researchers strive to be successful at publications; and with JOFSR, students aspiring to publish will receive scholarly feedback once their submission is reviewed. This feedback will not only help authors identify areas of improvement to their submission, but will also help them better understand the process in order to be successful at publication. Once published, it will provide a global platform for them to showcase their work.”

*National High School Journal of Science*: The National High School Journal of Science is a free, online, student-run and peer-reviewed research journal that is targeted towards high school students. Striving to bring science to a wider audience and engaging students in learning beyond the classroom walls, our journal hopes to expose young people to new ideas and topics. This high school student-run science journal always welcomes aspiring scientists to submit articles and to get involved with our publishing process. <http://nhsjs.com/>

*Questioz* is an international online journal of high school research that is dedicated to promoting research and the spirit of intellectual enquiry spanning all academic disciplines - Humanities, Natural Sciences, Math, Engineering and Social Sciences - among high school students globally.

It provides high school students the opportunity to showcase and garner recognition for their academic work on an international platform, and to make their contributions to their field of study known to a global audience. <http://www.questioz.com/>
