Dear _____,

I am greatly concerned about your plans for vaccination policy. It is my understanding that you are planning to update the Immunization Requirements for Students to include the COVID-19 vaccine.

Before you implement such a plan, I'd like you to consider that even though many university vaccination requirements for licensed and approved vaccines have been upheld in court, no court has ever upheld a mandate for an Emergency Use Authorization (EUA) vaccine, which all COVID vaccines are at present. In fact, a federal court has held that EUA vaccines cannot be mandated to soldiers in the U.S. military, who enjoy far fewer rights than civilians, *Doe #1 v. Rumsfeld*, 297 F.Supp.2d 119 (2003). That court remarkably held "....the United States cannot demand that members of the armed forces also serve as guinea pigs for experimental drugs." *Id.* at 135.

Federal law 21 U.S.C. § 360bbb-3(e)(1)(A)(ii)(III) requires that the person to whom an EUA vaccine is administered be advised, "of the option to accept **or refuse** administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks." The reason for the right of refusal stems from the fact that EUA products are by definition experimental. Under the Nuremberg Code, no one may be coerced to participate in a medical experiment. Consent of the individual is "absolutely essential." The liability for forced participation in a medical experiment, not to mention injury from such coerced medical intervention, may be incalculable. The consequences described in the statute mean medical consequences, not termination of employment or denial of in-person learning, as Rutgers contemplates.

Children's Health Defense (CHD) and Robert F. Kennedy, Jr. have recently filed civil complaints on behalf of citizens regarding EUA products. They have also filed an [FDA petition](#) to revoke EUA COVID vaccines and refrain from approving and licensing them. The FDA petition was imperative as our government health agencies continue to ignore the astonishing numbers of deaths and injuries being reported to the U.S. Health and Human Services (HHS) Vaccine Adverse Events Reporting System (VAERS). Updated each Friday, the May 21 data release reports [227,805 adverse events](#) and [4201 deaths](#) following vaccination with COVID-19 vaccines from mid-December, 2020 through May 14, 2021. Alarmingly, a [2010 HHS study](#) found that less than 1% of adverse events are ever reported to VAERS. Despite this, government agencies at local, state and national levels continue to promote uptake of these vaccines.

The research is growing every day that COVID-19 vaccines are not necessary and can be very harmful, [especially to young people](#). It is my sincere hope that you will reconsider your decision in light of the above facts.

Sincerely,

P.S. Also please see the document: [Notice for employers, universities and other institutions mandating COVID-19 vaccines](#).
