

Sharon MA has chosen the SNAP Health Portal for parents to better connect you with your child's health and wellness information on any device – anytime, anywhere. Because we require this health information to be in a secure environment, each parent has a unique username and password. You will receive an invitation to create an account via email. The initial email will contain a username and temporary password. Once logged in, you will be able to access the Portal and enjoy the benefits below:

- Electronically sign forms and provide permissions for over the counter medication
- Send/receive encrypted, secure communications to/from your school nurse
- Update your student's health info, including allergies and medical conditions
- Electronically send doctor's orders or changes to orders
- Receive notifications when prescription medicines are in need of a refill
- For additional information on how we protect student privacy and more, visit our [FAQs](#)
