

Exposing Theriopology

Theriopology is a term coined by @feral_vll on Insta, someone formerly known as Esta the Harvest Therian, meaning the study of therianthropy. It is also the name of a discord server, made by the same person to study therians and dismantle misinformation amongst the community. The contents of that server are what I will be discussing in this document.

TW for heavy themes of NSFW, death, and mentions of cp. (For Ivory, this doc has a screenshot with your ex in it. Please read with caution.)

DISCLAIMER

I apologize if any of the images in this document don't have the best quality. I imported most of the images from my ipad and it may appear blurry to mobile users. I tried my best to fix this, but some screenshots may still be of bad quality. [Here](#) is a straw page with all the images in order incase some are unreadable.

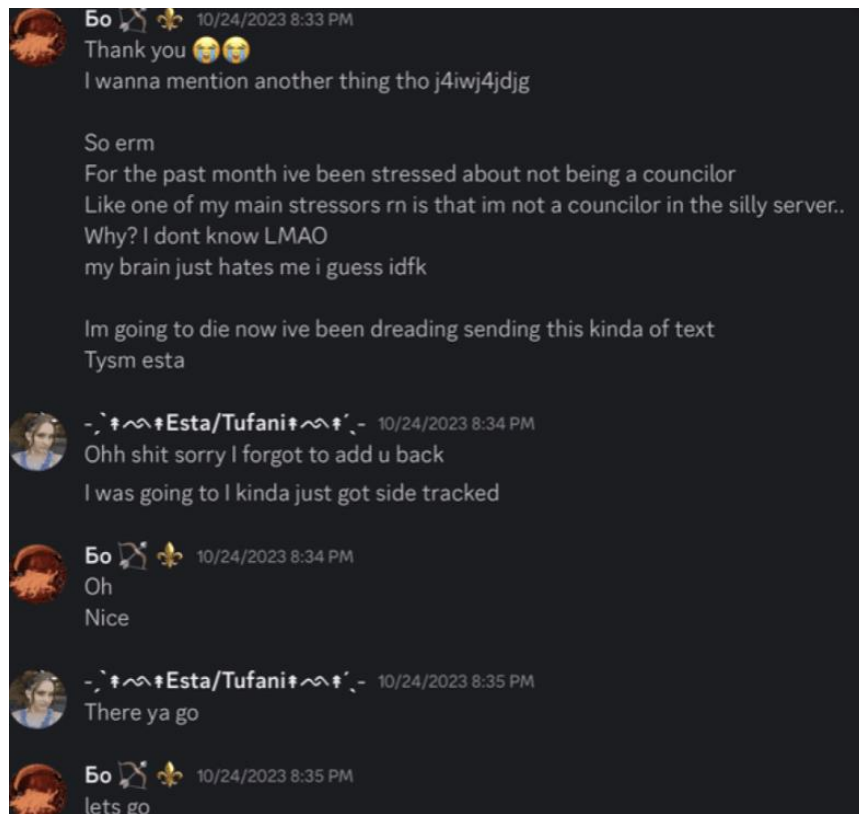

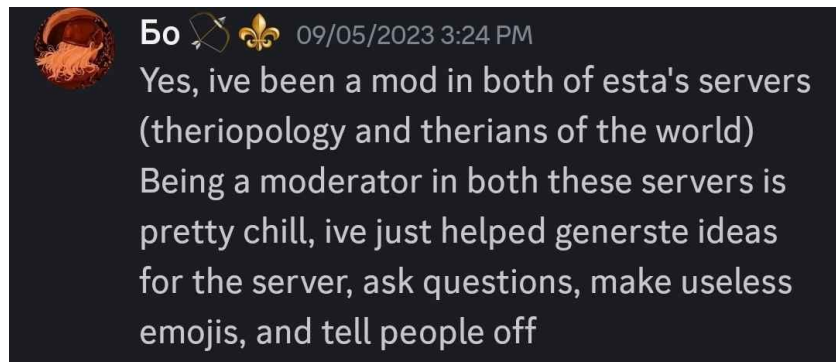

This doc was not written in attempts to start drama or to get people to attack the members of theriopology. I am merely sharing my experiences as a former council member of the group, please do not harass anyone mentioned here.

And to any theriopology moderators reading this, I apologized not because I forgave you, but I apologized to own up for my wrong doing. I still mean everything I said. This doc is not me going back on my word.

Also, in most of the screenshots, there is someone named Esta/Tufani.

*That is @feral_vll, the owner of Theriopology.
I will be referring to them as Ivory in this doc since that is their preferred name.*

One last thing before I start on the claims, I wanted to give some proof that I was a moderator / “council member” in the server 

Claims

This doc will discuss how theriopology supports endogenic systems / has a head moderator that is supports endos and is a “quoigenic plural,” the owner of the server endorsing minors to send nudes to one another, NSFW topics being discussed in detail in a server with minors in it, and how the owner let minors (some being 12-13) into NSFW channels where an adult discussed their sex life in detail

Evidence + Deep Dive of the Claims

Claim one: Theriopology and Endos

If you're unaware what a system is, a system is someone who has a CDD (complex dissociative disorder) and, due to repetitive childhood trauma, experiences things such as alters / “personality states,” dissociation, amnesia, flashbacks, and other symptoms. This disorder can ONLY be caused by trauma because, in order for alters to form, there needs to be trauma in order to form amnesia / dissociative borders between ego states.

Endogenic systems are “systems” that claim to not have trauma, which like I stated above, is impossible.

Unless they have forgotten their trauma, it is physically impossible for an endo to be a system.

In theriopology, there is a moderator by the name of Lynx. Lynx is someone who is open about their support of endos and also identifies as a “quoigenic” plural

 Francis [δ - Delta Coll... BOT] 02/22/2024 7:05 PM
honestly, i think syscourse and immediately writing off endogenic systems as a "mockery" is pretty dehumanizing and a complete disrespect to other peoples' experiences. you don't know what's going on in someone else's head, unless you're in it. we're quoigenic, but thats what most of us think. /gen /npa /lh (edited)

 @Bo I wasnt sure whether to put this in hot takes or here but Oh well What is everyones opinion on endogenic

 Lynx [δ] 10/28/2023 9:54 PM
endogenic systems are okay in my opinion most of the time they didn't even ask to be a system either, they just formed of reasons other than trauma

 Lynx [δ] 08/23/2023 12:55 AM
Ngl I've been questioning if I'm part of a parasian system (a type of median system where it will fade into singlet, then back into system, then back into singlet again repeatedly)
(TW: pet and human death) For me it happens in times of extreme general stress or traumatic things, like right after my cat died I think we faded back into being a system, and I've had plural experiences before this, like when my brother died this happened too

In addition, in the alterhuman definitions of the server, there are endogenic terms

alterhuman-and-therian-defs

 Ivory 10mo

Median: - Being neither fully multiple, nor fully singlet, but an experience

I am not saying the owner supports endos himself, but having a moderator that is under the endogenic umbrella and having members that support endos is strange.

And also, I am not discrediting Lynx's experiences. I don't know what the inside of their head looks like. They most likely DO have something going on, or might've forgotten their trauma as most endos have, but being endogenic is impossible and the existence of endos mocks systems who actually experience CDDs. And I am aware they are not claiming to be disordered, but it is still impossible to have alters or experience "personality states" without going through trauma to separate the ego states.

(I will be linking resources for DID and other complex dissociative disorders at the end of this document)

Claim two: Endorsing the sharing of nudes between minors

When I was friends with Ivory, I would often ask them for relationship advice because they were much older (I was 12, they were 17) and more experienced with romance than I was.

At one point, I had asked them about nudes because I was actively sending them to my (now ex) boyfriend

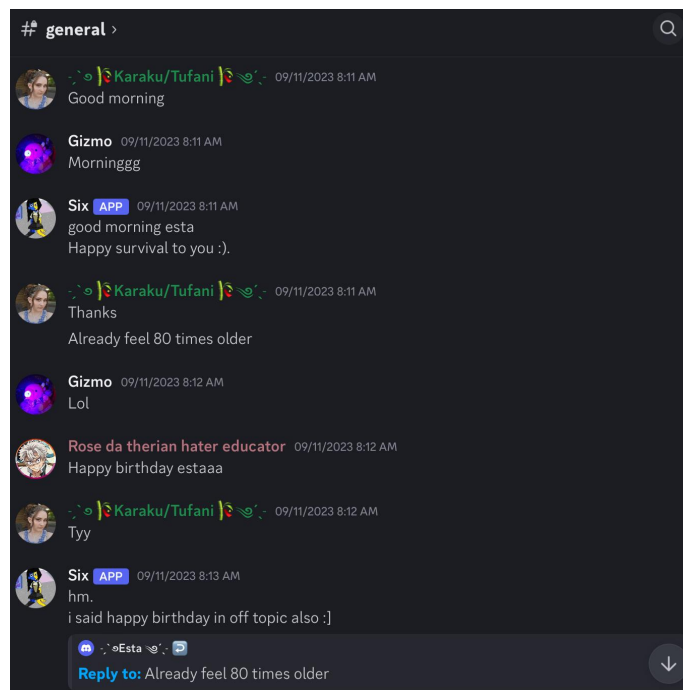

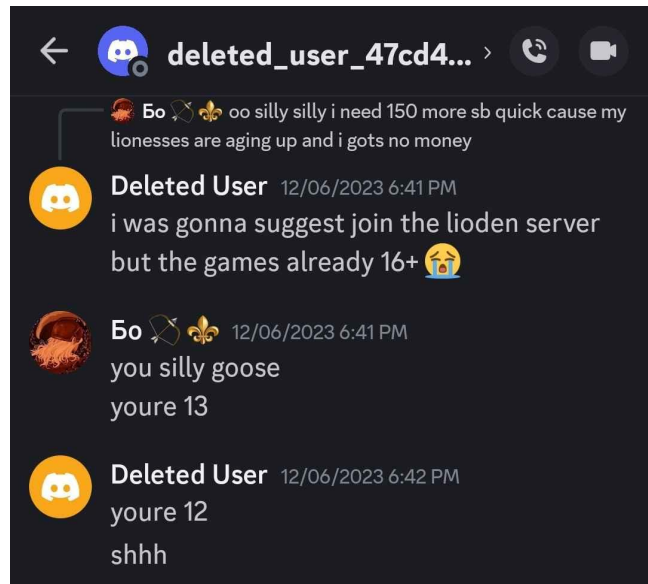

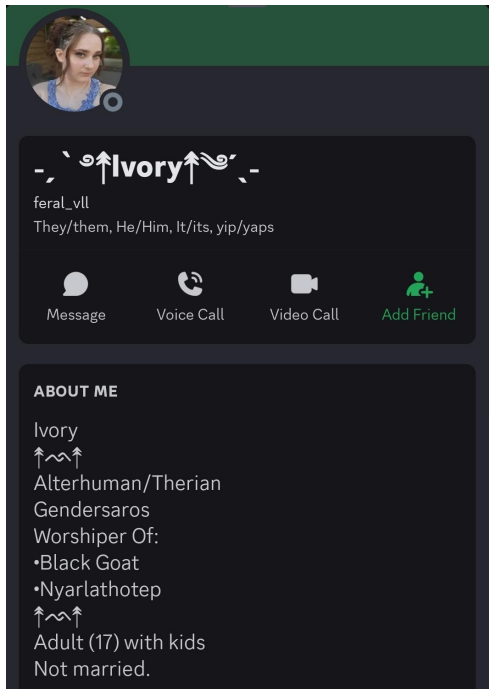

They responded with this:

In no way do I think their response was appropriate or okay. It is a crime to send and receive nude photos as a minor because it is child pornography. And also, a twelve year old should not be acting in a sexual manner with anyone, even if the two people are the same age.

Here is some proof of our ages as well

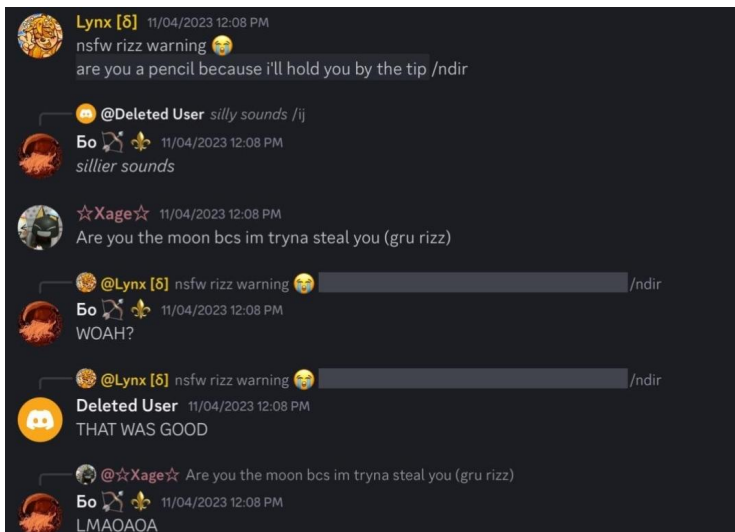

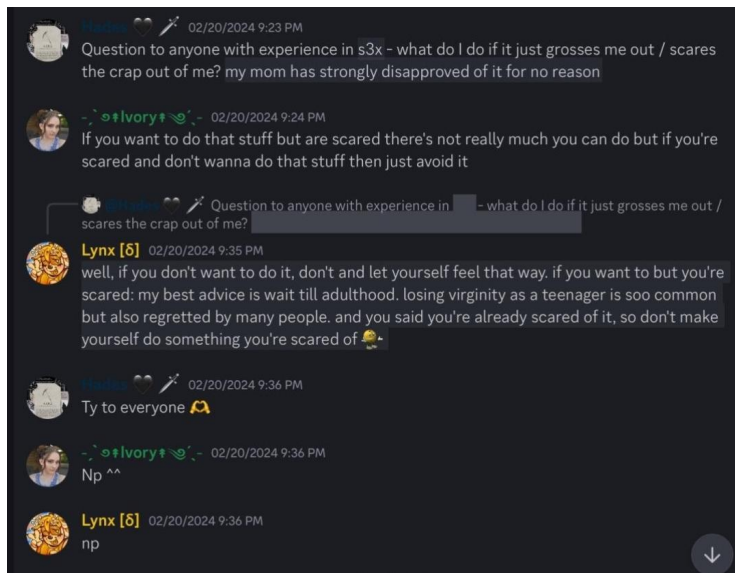

^ Ivory turned 17 on 9/11/23 (this will be more important later.)

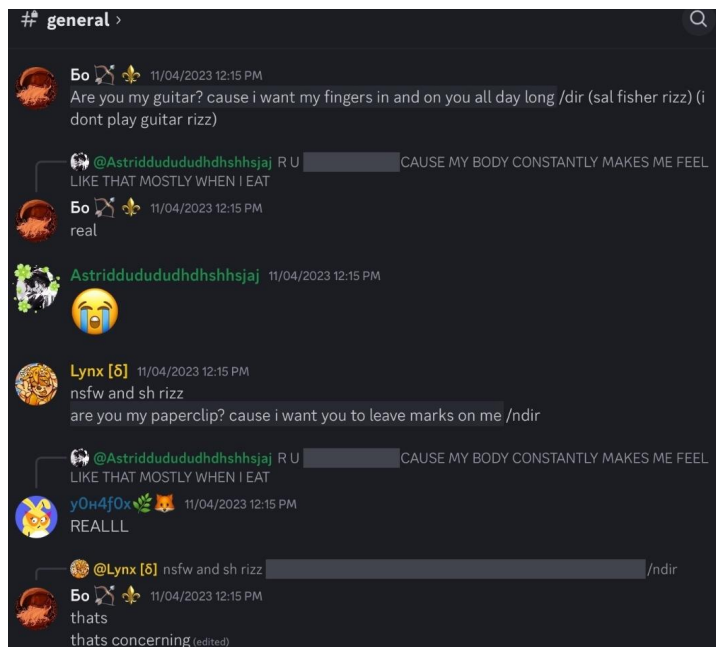

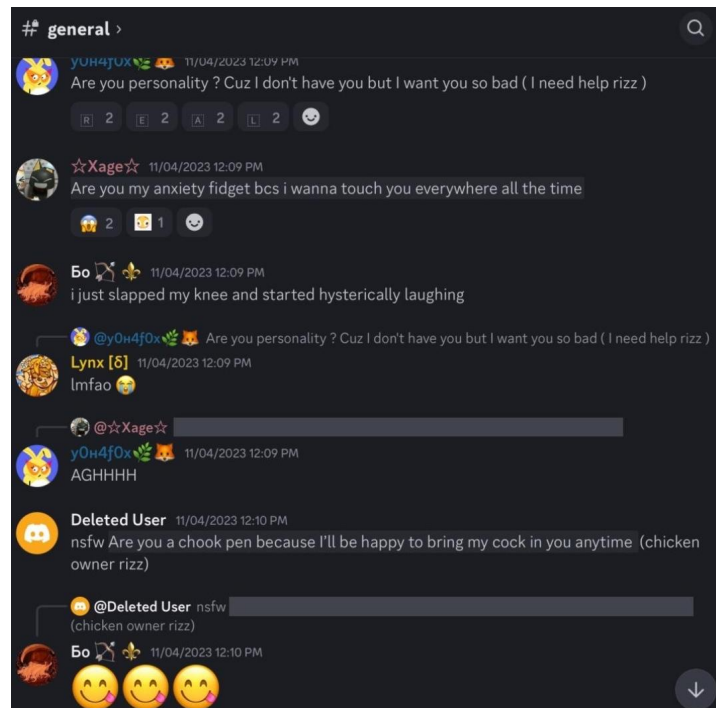

Claim three: Discussion of NSFW topics with minors

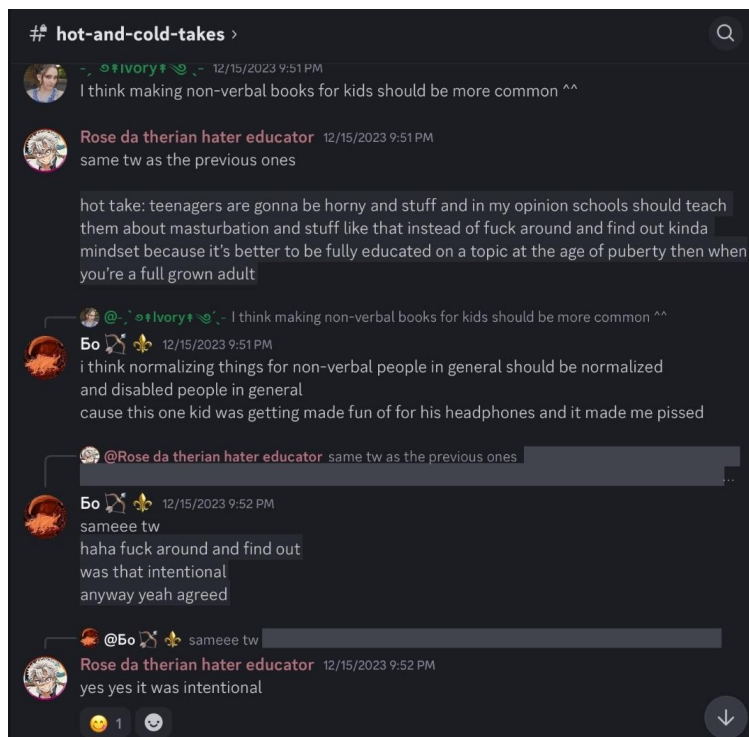

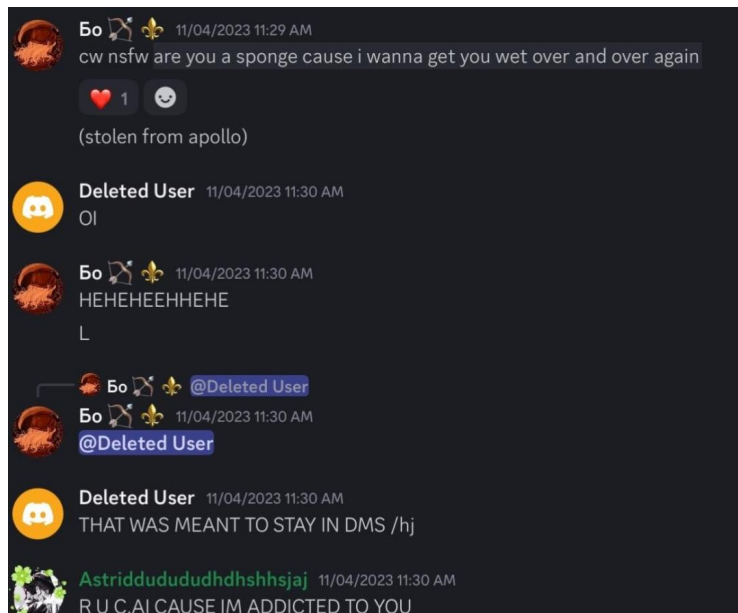

During my time on the server, heavy NSFW topics were discussed frequently amongst members.

Adults (other than in the first screenshot) did not engage in these conversations, but at times there were people as old as 17 talking about NSFW topics with 12-14 year olds.

Hot take
NSFW topic / kink warning
Vorarephilia kink isn't bad

mind you, i am not talking about paraphiles
or people with fetishistic issues and such
who will do dangerous shit like actually
trying to eat animals alive. people like that
need actual help

but if you just have a kink for it and don't
involve animals or beings not intelligent
enough to speak and then consent... is it
really that weird or harmful

(how do you even define weird bro it's just a
social construct /ot)

i almost accidentally super reacted to my
own post help
being sexually turned on by eating someone
that's alive or getting eaten while you're
alive
it's generally impossible / a fictional kink
because y'know... humans can't eat humans

Real

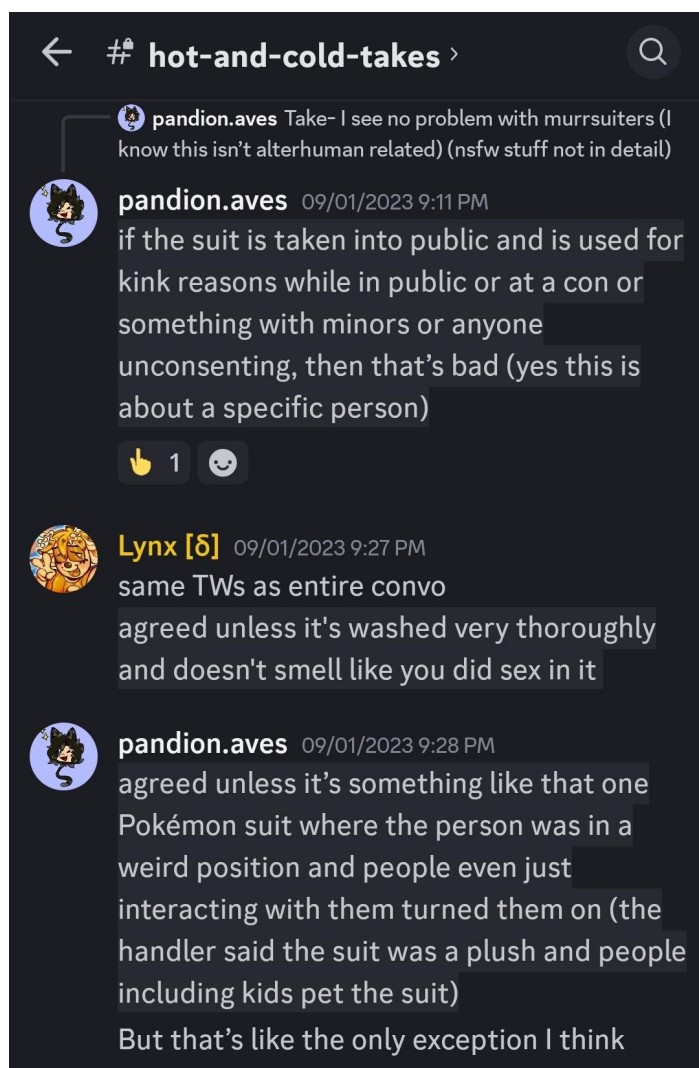

Otherwise you're just opening yourself up to bullies or danger (this mostly goes for if it's your family

Take- I see no problem with murrsuiters (I know this isn't alterhuman related) (nsfw stuff not in detail) as long as it's consenting adults and the suit is washed (preferably not taken in public or anything) then I see no problem. Same with other kink suits. As long as it's consenting adults it's fine. Unless it's zoophilia stuff which it usually isnt

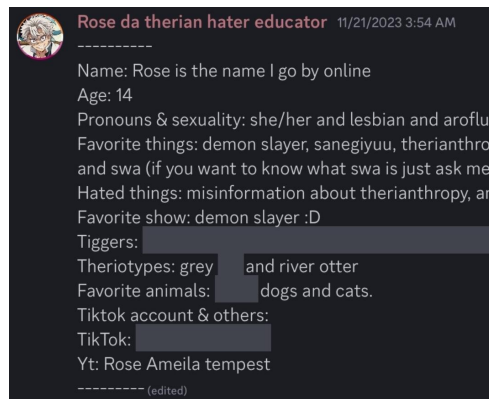

2

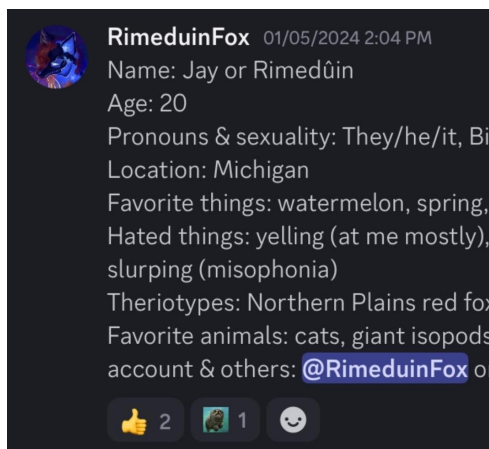

Also, here is proof that RimeduinFox was an adult discussing nsfw topics with minors (these images will be numbered because in the straw page they will be out of order.)

#23

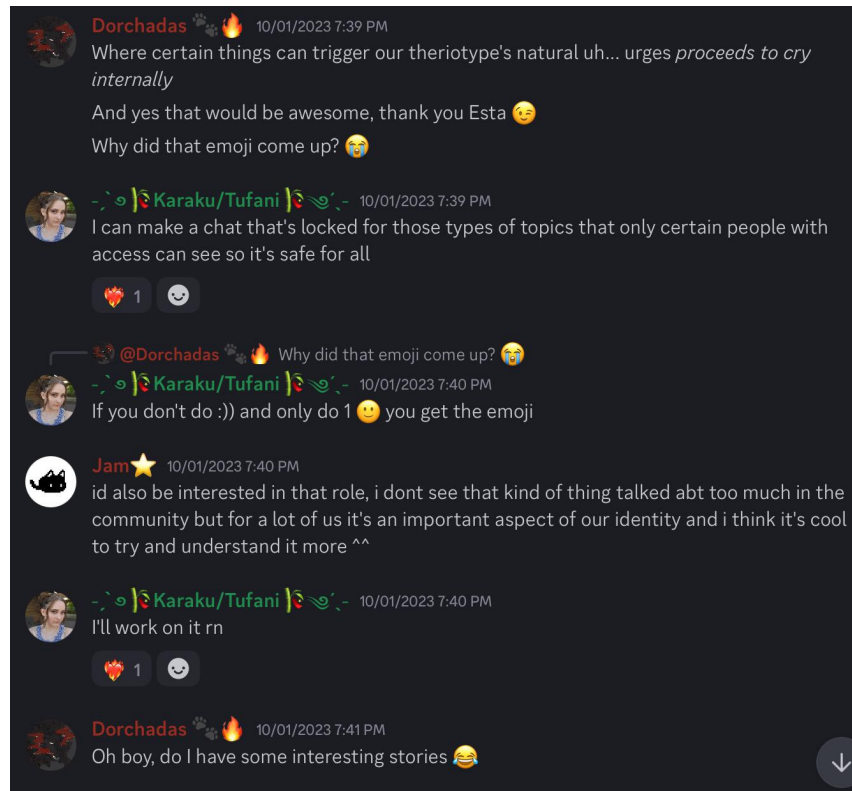

#24

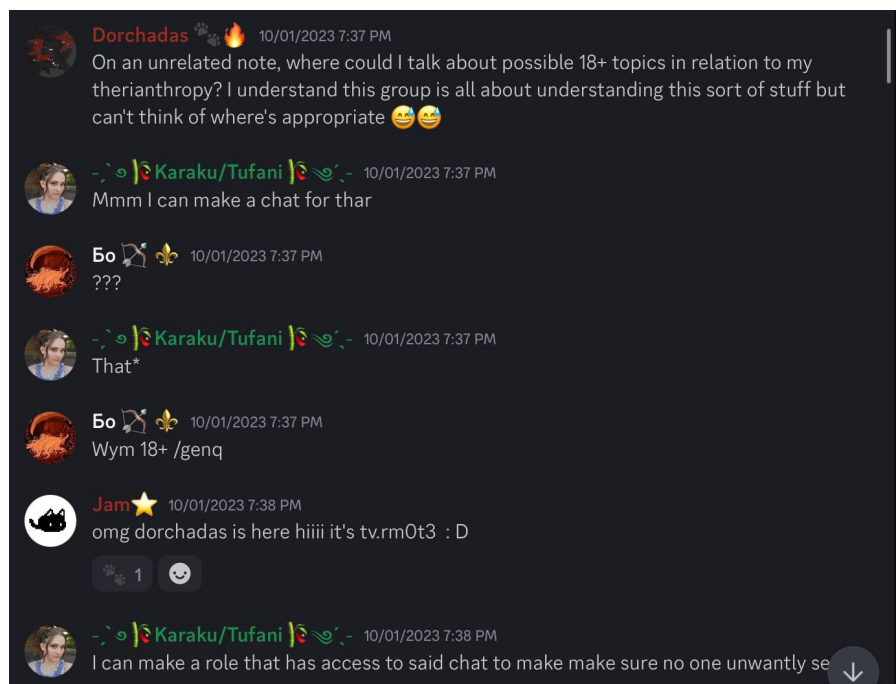

Emi is also underage, (16-17 I believe) but I sadly have no proof of this. Although, the situation would be just as weird if they were an adult because she was speaking to Rose, a 14 year old, about sex.

These chats should've never taken place in a server with minors (especially since there were minors as young as 11-12.) Even when censored, it still isn't appropriate. These conversations should've been shut down immediately, but they weren't, and are still able to be found on the server. If it was in a NSFW channel with ADULTS ONLY, fine. But these topics were being spoken about by minors to other minors.

There is now a "No NSFW" rule in Theriopology, but that was not the case until AFTER I called them out about it on the server.

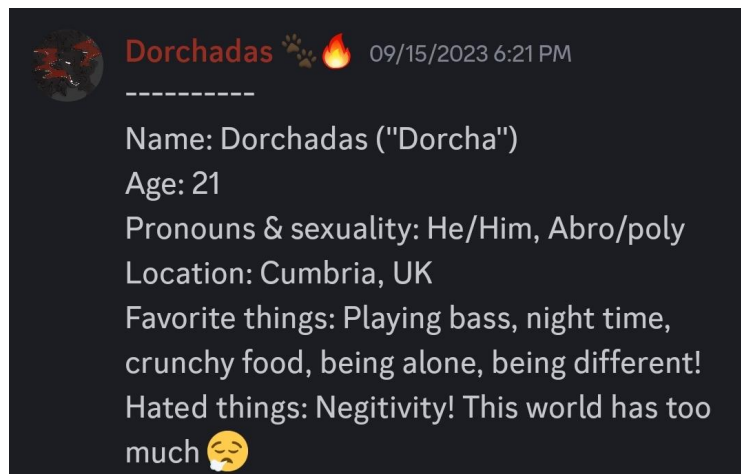

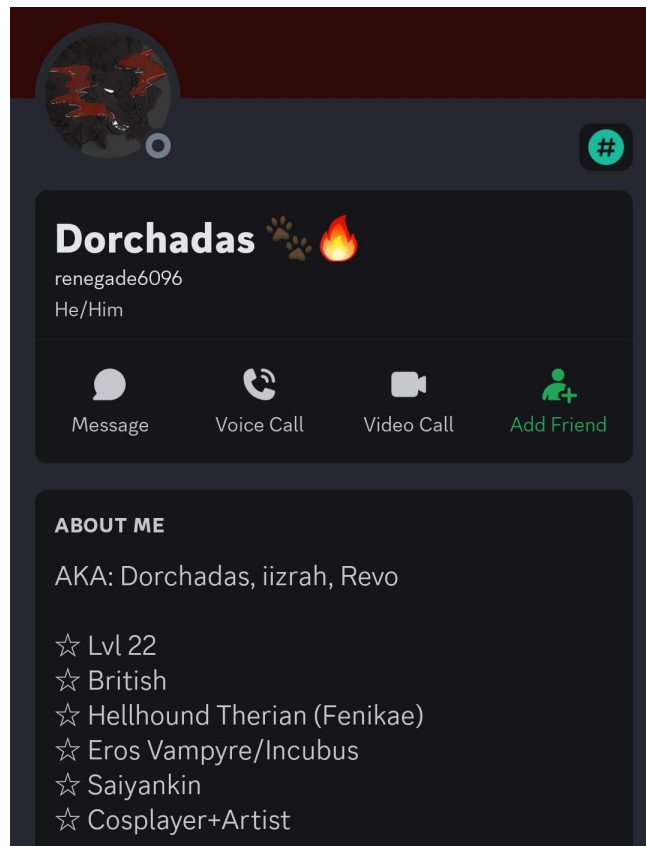

Back in October, Dorchadas (a 21-22 year old) requested for a NSFW channel to be made.

Below is evidence of Dorchadas' age.

This wouldn't be an issue if Ivory wasn't a *17 year old*. They had just turned 17 not even a month after Dorchadas requested for them to make an **18+** channel. As a 21-22 year old, you should know better as to ask a *minor* to make a NSFW channel for you.

After this channel was made, Ivory asked me and other council members if we wanted the role (mind you, all the council members they asked were minors under 17.) They told us we “weren’t responsible for any trauma we got from the channel” and then let us in. In the channel, there were adults talking about their sex lives and pet play in heavy detail, even actively discussing it with a 13 year old. I called them out soon after (after realizing how disgusting this was,) but the channel was not removed until much later, and all they did was take me out of it and scold me for ‘starting drama publically instead of DMing someone.’

Next time take it up with me. That was
between us and not the whole sever. I
understand you were upset and reasonably
so, but I asked you Multiple times if you
were sure. I explained and mentioned the
type of topics.

Next time don't take our problems to the
sever. Because you made a problem
between us a problem for others to see and
that isn't okay

Also

Sorry to dump

If you dont wanna read it ill censor it, i understand if you dont cause its a bit graphic and weirs Here

Tw: sexual things, alot of them

I think you remember esta

While, by my request they added me into a "therian nsfw" channel

Mind you, im 12.

And added another minor, a friens of mine, into the chat as well

I didn't know it was bad so i asked my friends and they thought it was horrible and begged me to leave for 20 minutes straight

But anyway, an adult therian begam talking about them and their partners sex live and how they have animalistic behaviors during it and that their partner finds it hot

Which disgusted me, and i am totally kink shaming here

Pet / animal play is fucking gross

Especially when youre in a shift

And sexual things trigger me alot so im having a panic attack rn

(I kinda asked for it tho)

And esta is just... allowing me and the other minor to hear this shit? The fuck is wrong with him? I am genuinely disgusted

Im so disappointed cause esta has been my friend for 7 months and i trust him alot

Im so sick rn but i cant leave the channels cause its drive me crazy not being able to see what theyre saying

Again, really sorry for dumping, i just needed to tell someone

You dont have to read it at all if you arent in the mood to i promise

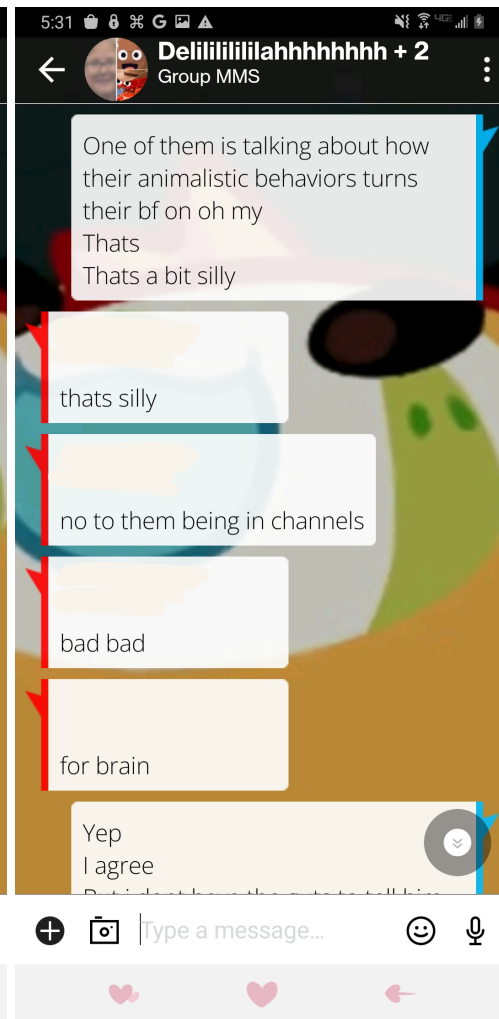

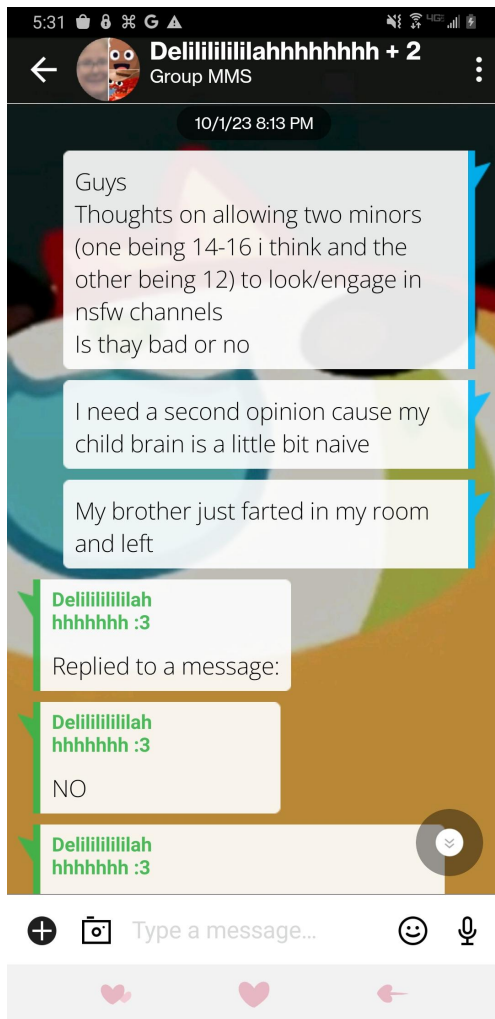

If you arent feeling well mentally then dont

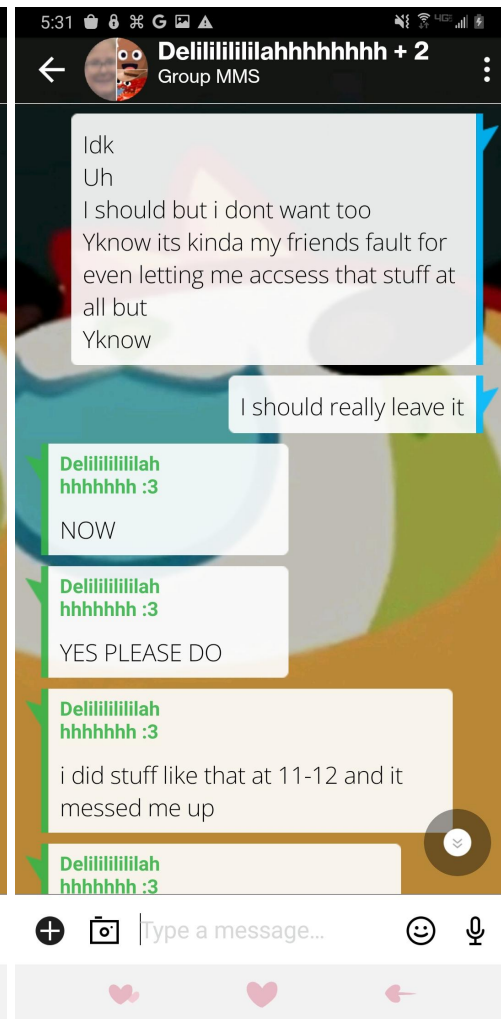

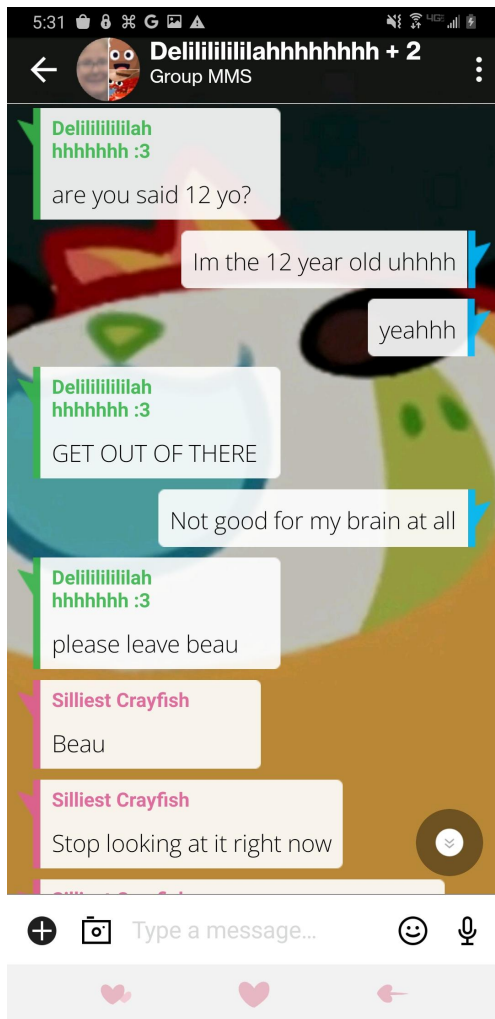

Sorry i keep saying sorry but

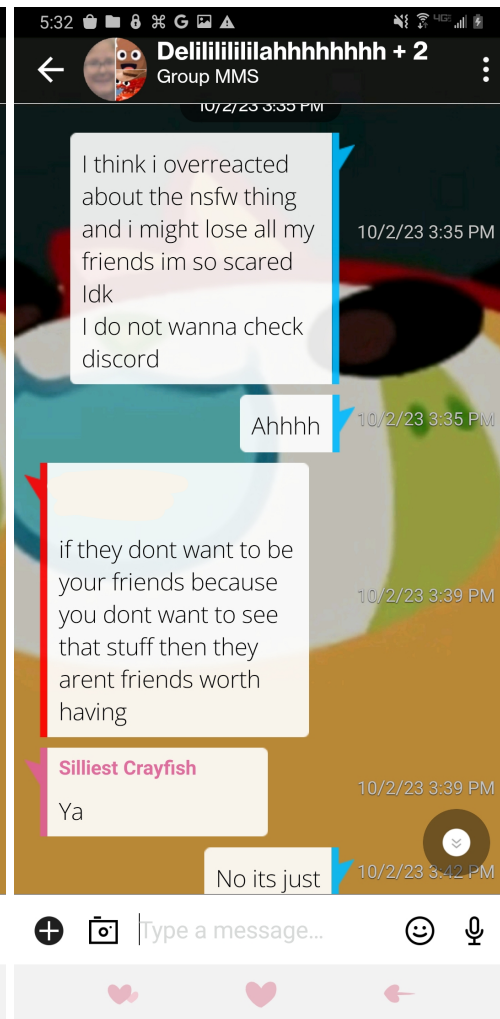

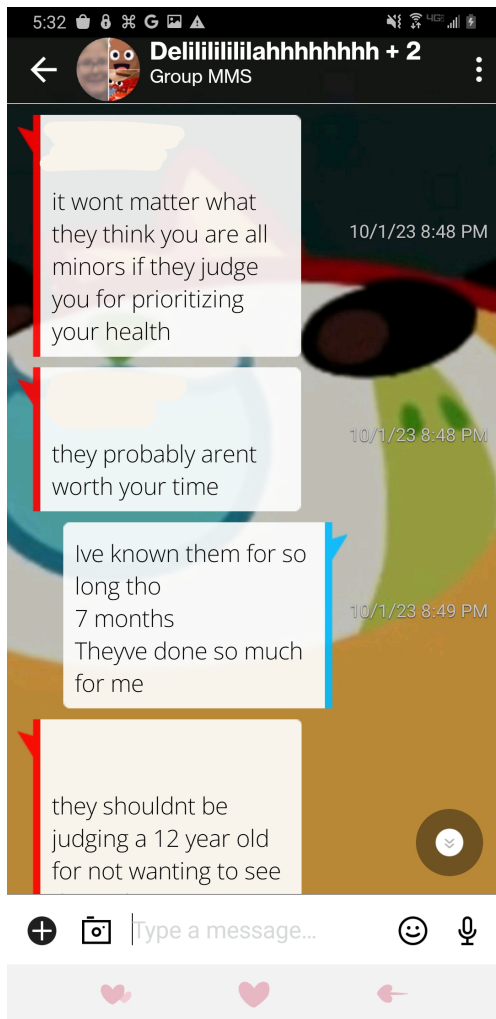

Sorry

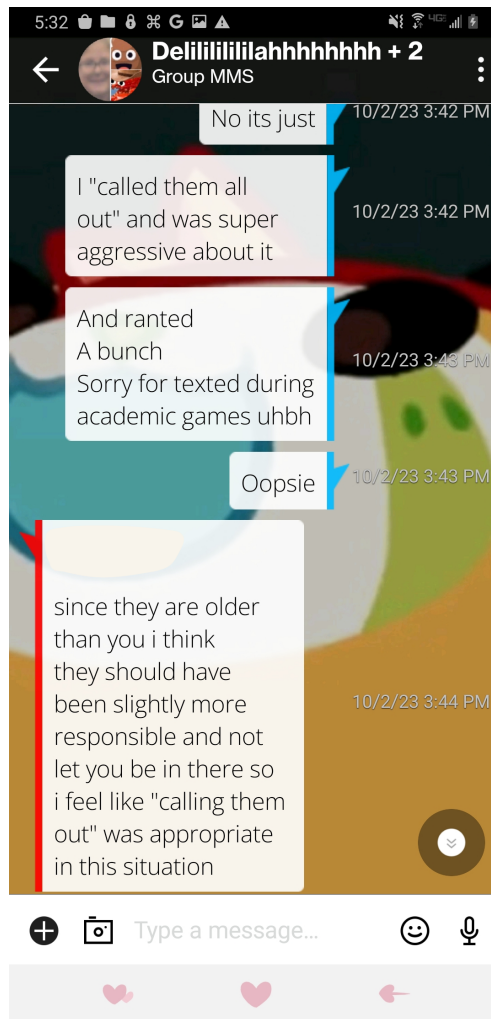

For randomly dumping

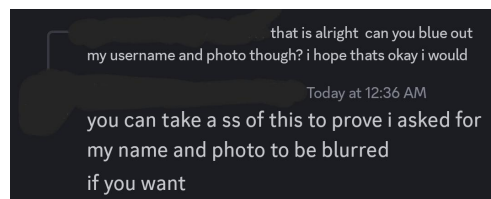

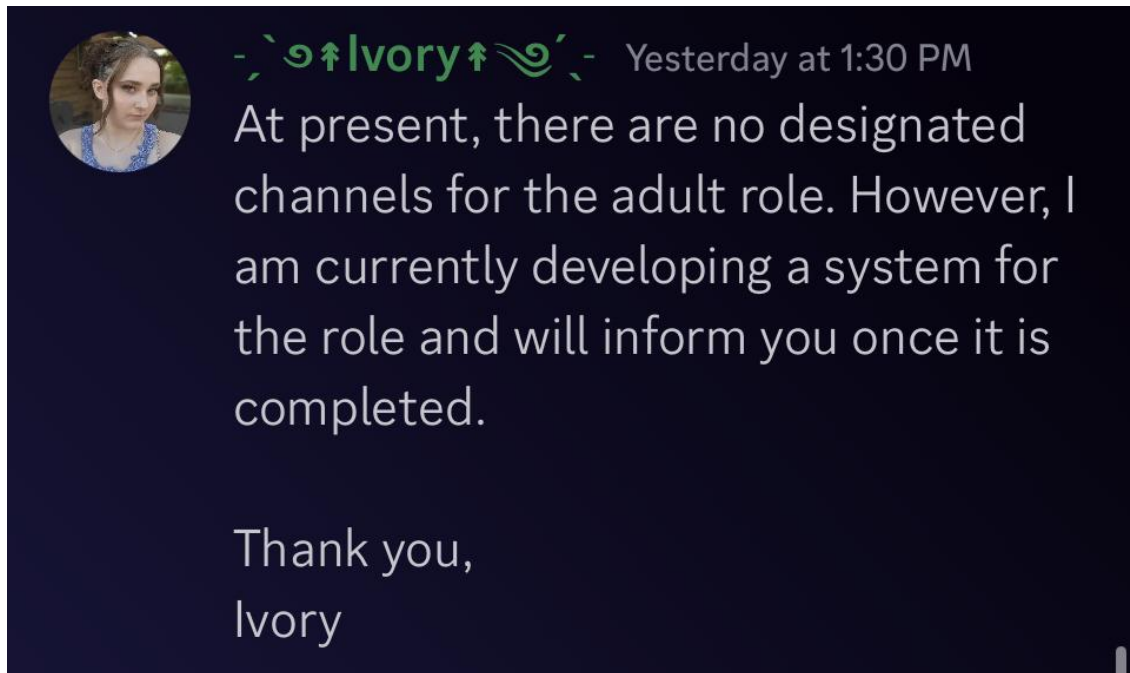

(Note, the user “Pink Diamond” is me, just from a long time ago.)

Also, my friend wanted their name blurred
I did not purposefully try to hide anything, they just wished to remain anonymous.

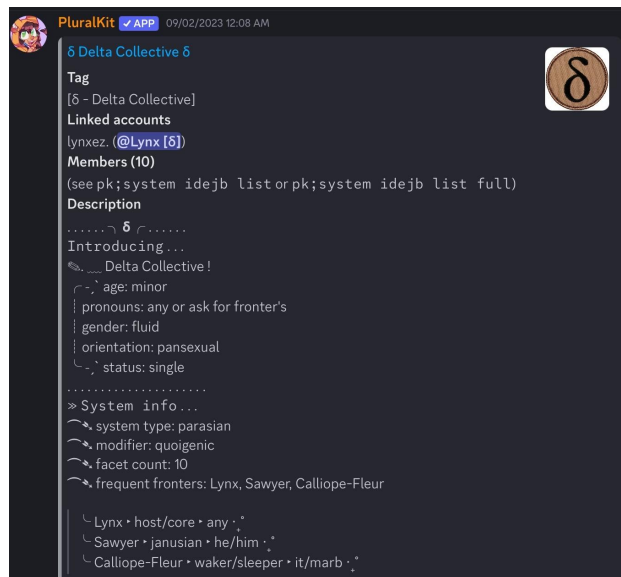

I do not have proper evidence for the contents of the NSFW channel,
as I wasn’t able to take screenshots when it happened and the

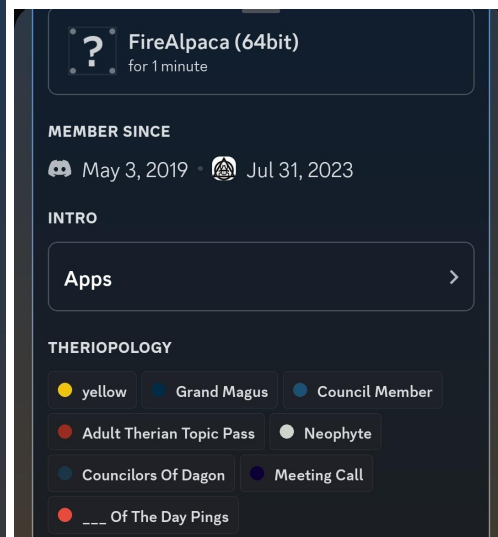

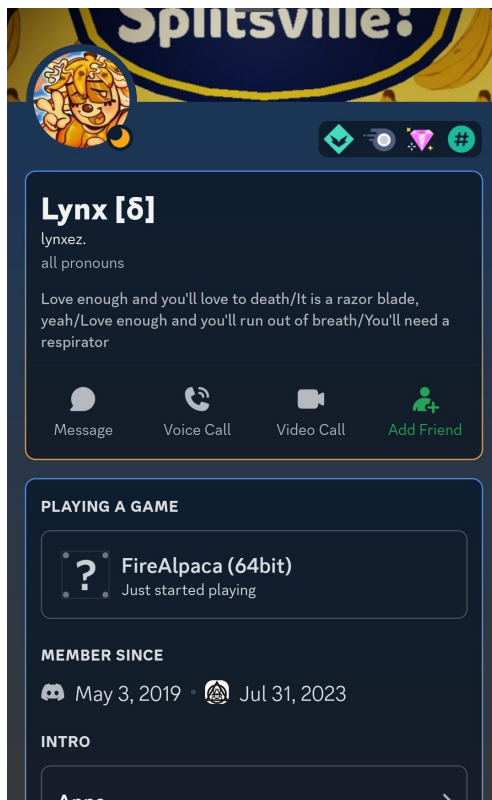

channel (to my knowledge) was deleted; do with this information what you will.

One more thing I would like to mention:
Lynx, a minor, still has the “Adult Therian Pass.” (The role needed to access the NSFW channel.)

Age in their desc clearly stating they are a minor.

^ roles saying they have the NSFW pass
(I had to split it into two images because it was too long to all fit in
one.)

Even if the NSFW channel doesn't exist anymore, it is still weird that a minor has this role as of recently, and that their role hasn't been revoked.

Afterthoughts

There are so many other things I could've put into this document, but that would cost me more time and energy that I am not willing to spend. And even if I wanted to, most things that have happened were erased off the server. It took much effort to dig up what I did.

Again, please do not harass the people in this document. They may not be the best people, but harassing them would solve nothing, and would only cause more problems.

More may be added to this document at a later date if more things come out about Theriopology.
