-

Dataverse Community Call 2 (10 AM Boston -

[https://time.is/compare/10am_25_July_2023_in_Boston_\)](https://time.is/compare/10am_25_July_2023_in_Boston_)

Dataverse Community Call 2 Agenda/Notes

- Miguel Silva on adding functionality to receive live, real-time, experimental data directly from a smart data acquisition device into Dataverse. (15 minutes + Q&A)
 - <https://tinyurl.com/ValidationDataOrigins>
- Preview of community news:  2023-09 Dataverse Community News
 - Dataverse 6.0, etc.
- (Miguel) Dataverse should have an API call for a data record, for realtime data measurement upload
 - Upload 1 row to an Excel file, for example
 - 100 measurements over some weeks
 - unique serial identification of the data record
 - md5 verification, maybe
 - UNF for verification
 - hardware has an integrated circuit, cryptographic

- <https://github.com/aeonSolutions/openScience-Smart-DAQ-to-Upload-Live-Experimental-Data-to-a-Data-Repository/wiki/Smart-DAQ-Specifications>
- Next call is October 17. No topic yet. Please feel free to propose one!
 - (Philipp) Brief presentation of use cases covered by the 5.14 and 6.0 releases.
 -
