

HR Positions at TheCatalystQuanta

What to expect from members of HR:

Recruitment-

Some of the HR staff will be responsible for reaching out to people. Whether it be classmates, family or simply people online who are enthusiastic about our cause, the HR team will promote the organization and encourage them to join. As the number of people involved increases, the influence of the publication also increases, making your positions as members even more reputable. We need your help too. If you know anyone who you think would be a great fit, don't hesitate to tell them!

Management-

Over the past few days this community has truly taken off with 150+ people in the subreddit and 60+ members in the Discord. This has made things extremely rushed and we have just paused to take a breather as the numbers begin to settle. As more people join, the three of us will not be enough to handle and overlook all operations. Therefore the HR team will also be making sure that members are meeting deadlines, editors are working in rotations with each issue, members are following guidelines, and roles are being effectively assigned to newcomers.
