Course Name as on Certificate	Management Development Program on Advanced Project Management
Certificate Issued by	IIM Jammu
Institute	Indian Institute of Management Jammu
Introduction	Projects have become recognized as a fundamental model for generating value for organizations and fostering economic growth for a nation. Developing nation, especially India is experiencing significant transformations, marking an era of innovation. Indian government has started working under many schemes, initiatives and mission in various sector such as service, manufacturing, IT-Infrastructure, construction, medical and many others. This significant expansion of sectors through executing the various projects leads to a rise in demand for project management experts. This project management MDP program teaches time-tested strategies, tools, techniques, and hands-on tools to achieve successful project outcomes.
Course Objectives	✓ To learn the concepts of Project Management for Agile planning, execution and post completion of projects covering entire project life cycle. ✓ Achieving Iron Triagle objectives: To handle multiple tasks simultaneously with limited time, money and resources to meet the deadlines. ✓ To comprehend the fundamentals of Project Procurement, Contract Administration, Costing and Budgeting. ✓ Comprehend contemporary global project management framework standards and optimal standard operating procedure (SOPs) to assure project compliances and success. ✓ To implement agile project management principles using Scrum and Sprint to handle risk, stochasticity and uncertainties while smoothly achieving project and product timelines ✓ Hands-on practices of corporate and industrial problems related to initiating, planning, execution, control and monitoring phases of a project using the next gen-tools such as Advanced Excel, Jira, Trello, Microsoft Project.
